20 March - School Day Tutorial

Pressure Record

The tutorial left in under considerable pressure, inspiration and encouragement arrived alongside unease and lethargy, and I faced incessantly unscientific.

The tension compelled me to document the process.

1. Split-end hair, submerged to the bath, I note spherical, growth topology.

2. Get out and eat arbitrating cells, immersed, I wager nuclei and aeroping my salt. Salt my bath breaks.

3: I'm no longer steady a body. It is nearly 'fluid' coagulating genetic, and grief-tide pressuring pressure.

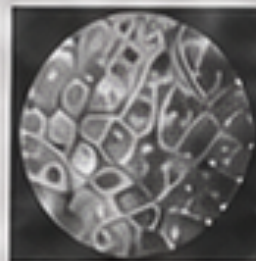

Signed.

X. Ding
