

# DREAM S VISUAL IDENTITY

Brand Guidelines

# BRIEF

String theory holds that the basic unit of the universe is not a particle, but because strings move through space, various particles are produced. The different particles are just different modes of vibration of the string. All of the interactions that happen in the world, when we take a violin and we play different strings, the strings vibrate because we play them, and different vibrations make different sounds. Behind every dream is a unique "melody".

## Die Traumdeutung

"Dreams are not accidental associations, but repressed desires. It may represent the source of the emotion that is important to the treatment, including the cause of a certain psychological. So dreams are a bridge to the subconscious mind."

The book introduces the concept of ID and describes Freud's subconscious theory, which is used to analyze dreams, and extends to psychology to interpret people's subconscious images in dreams.

# BACKGROUND INTRODUCTION

Everyone dreams. Dreaming is one of the most everyday states of consciousness. Every time you leave reality, close your eyes, and enter a dream, you enter a separate space of personal energy, a world that is the secret source of many of our thoughts, emotions, and actions.

If we want to truly understand ourselves and interpret ourselves, we have to dig into this subconscious secret channel, return to see the real self, balance the heart, and let out the deepest emotions. In today's increasingly competitive, information overload, fast-paced society, many people are under pressure and anxiety from different directions, followed by a variety of mental, health, relationship problems have also broken out, the future people need to work together to cope with the challenges and pressures of modern social life, dreams can be a breakthrough.

Dream rope can help people express the subconscious in dreams into reality by artistic means. Based on string theory, we use rope to actually show the energy relationship between dreams and psychology, and find hidden wishes in the interweaving of colors.

# VISUAL DESIGN ● ●

# VISUAL DESIGN ● ●

主视觉以点线为主，色彩选择了蓝橙配色，代表了梦境的荒诞与冲突。线条的形态与主题梦境绳索相对应。

The main vision is based on points and lines, and the color is chosen to match blue and orange, representing the absurdity and conflict of dreams. The shape of the lines corresponds to the theme dream rope.

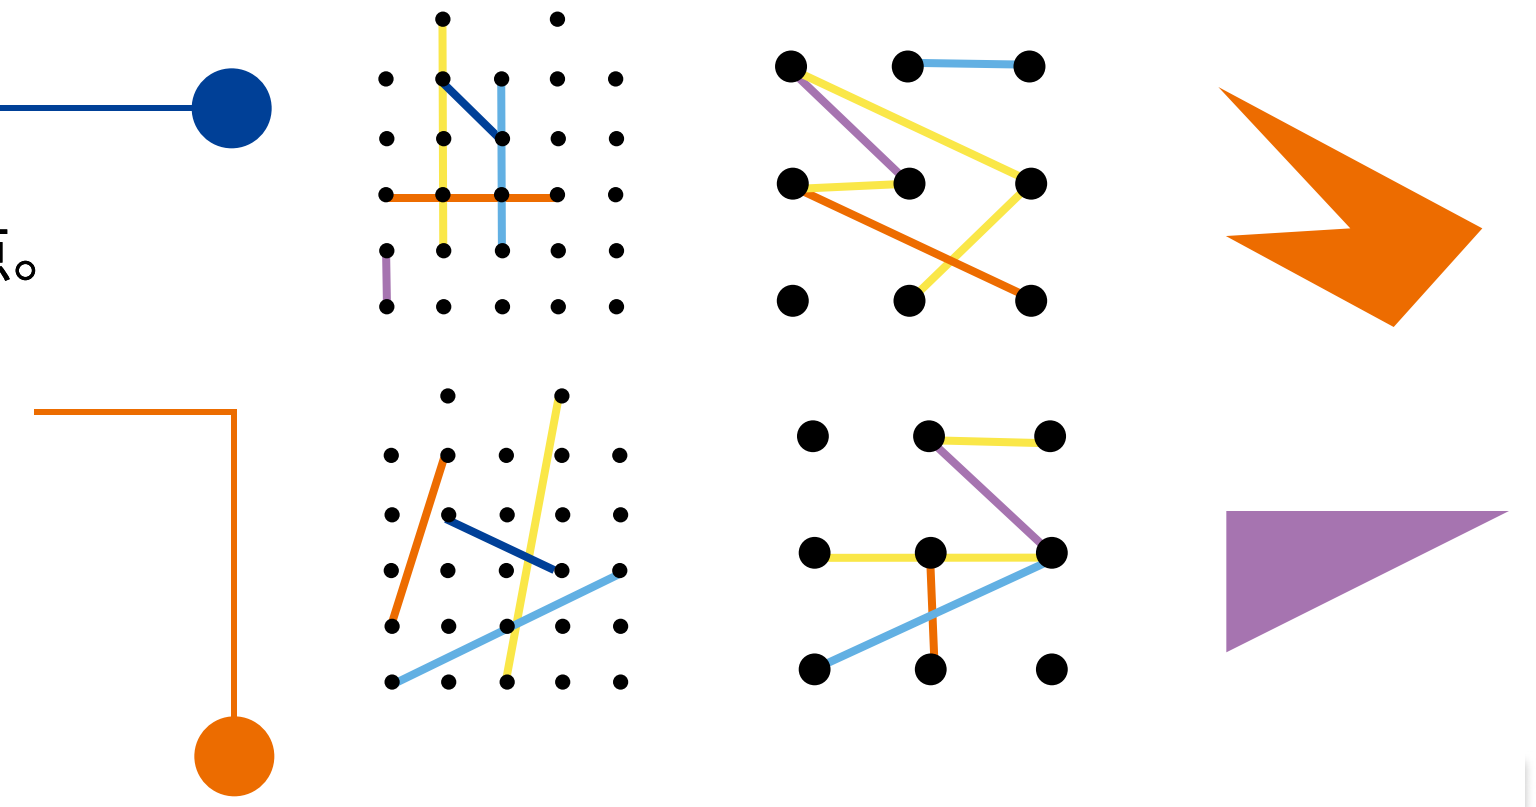

27个点分别代表不同的情绪，选出代表梦境的那些关键词并将它们用线连接，组成新的闭合视觉。

The 27 dots represent different emotions, select the key words that represent the dream, and connect them with lines to form a new closed vision.

衍生视觉使用方式：去掉除了连接部分的其他点。

Derived visual usage: Remove points other than the connecting part.

# LOGO

## ● Logo&Colour

蓝橙的对比用于表现梦境与现实的对立统一。

The contrast of blue and orange is used to show the unity of opposites between dream and reality.

**PREFACE**

In the pages that follow I shall bring forward proof that there is a psychological linkage which connects a projected, or latent, dream with the actual procedure in producing, or manifesting, it, and that if that procedure is projected, even a formula which can be regarded as a verifiable point in the mental activities of waking life.

在以下章节中，我将提供证据证明，在投射的、或潜在的、梦境与产生、或表现、它的实际程序之间，存在着一种心理上的联系，而这种联系可以被视为清醒生活中的心理活动的一个可验证的要点。
