Welcome to HomoWatt, we are a leading bioenergy technology company established to address the global energy crisis in 2049. Facing the rapid depletion of precious energy, we adhere to clear and sustainable goals, specializing in extracting and transforming the vitality of biological processes.

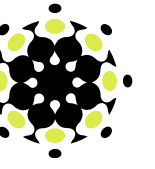

Our name, HomoWatt, interprets our core philosophy within each letter: "With people as the source, every action, every bit of energy, can be effectively converted into power." Guided by this concept, we delve into bioenergy technology research and strive to transform this concept into practical and powerful energy solutions.

- Sustainability
- Vitality
- Innovation
- Empowerment
- Responsibility

## 1.1 About US

## Vision

Harvesting vitality, nurturing tomorrow.

## Mission

Our endeavor is to spearhead the advancement and dissemination of sophisticated bioenergy technologies, masterfully converting the vitality of biological processes into secure, dependable, and eco-conscious energy solutions for a global clientele. We aspire to catalyze socioeconomic upliftment and enhance communal well-being through a steadfast commitment to perpetual research and groundbreaking innovation.

## Brand Story

In the context of a world facing energy depletion, our brand was born, aimed to tap into the potential of humans as bio-energy sources. We firmly believe that every individual possesses immeasurable inner strength, capable of becoming the bio-source that propels the world's development.

Our core mission is not just leading innovation and vitality, but also to urge every individual to realize the power they hold, transmuting themselves into a sustainable energy supply. Both scenarios are indispensable parts of our brand story, and it's our hope that as we lead the public towards a more vibrant, environmentally friendly future, you could be a part of it.

# 2.0 Visual Element

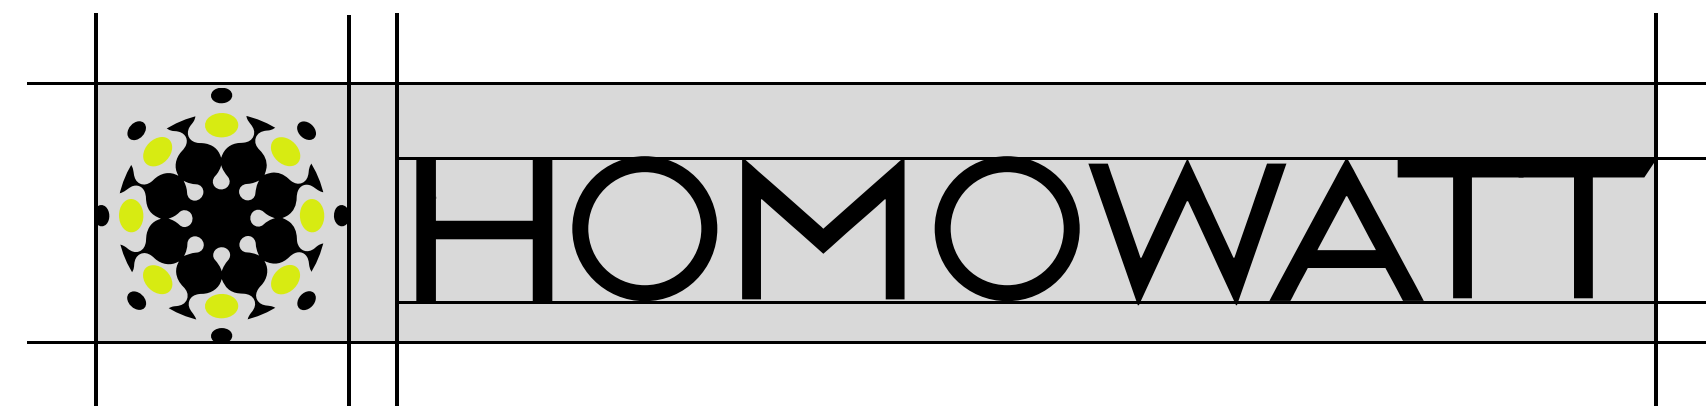

The title "HOMOWATT" is insightful and profound. "HOMO", from Latin signifies "human", emphasizing our commitment to unearth the boundless potential of humans as a source of bioenergy. "WATT", a unit of power represents our scrutiny on energy issues and the solutions we are offering.

The design of the logo ingeniously integrates a sense of divergence and energy. A divergent design element highlights our open-mindedness, encouraging innovative and unique viewpoints towards energy issues. The sense of energy embodies the core concept of the "HOMOWATT" brand - each individual is a latent source of power, poised to release infinite energy. The seamless cohesion of these two factors effectively communicates the mission and vision of our brand.

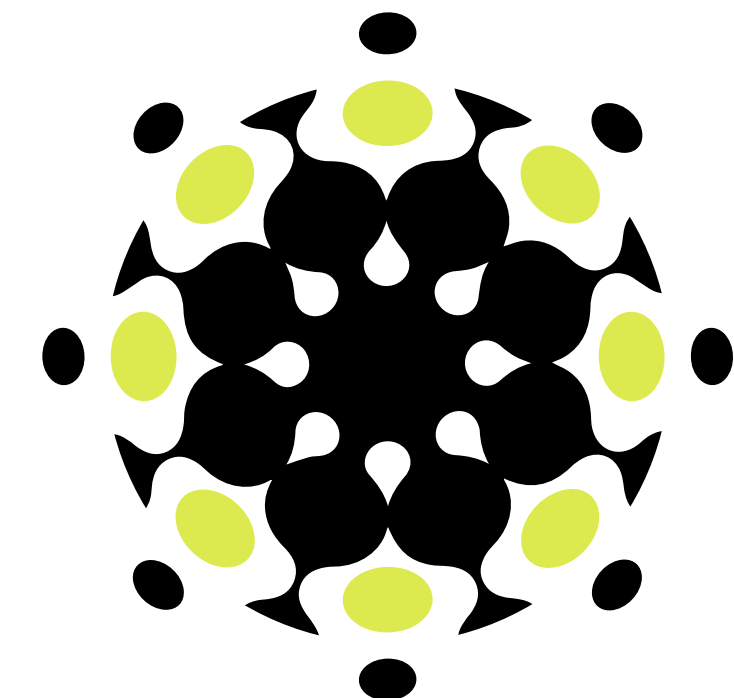

### Logo

### Proportion

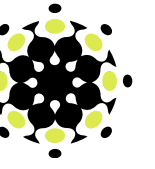

### Details

## 2.1 Logo & Usage

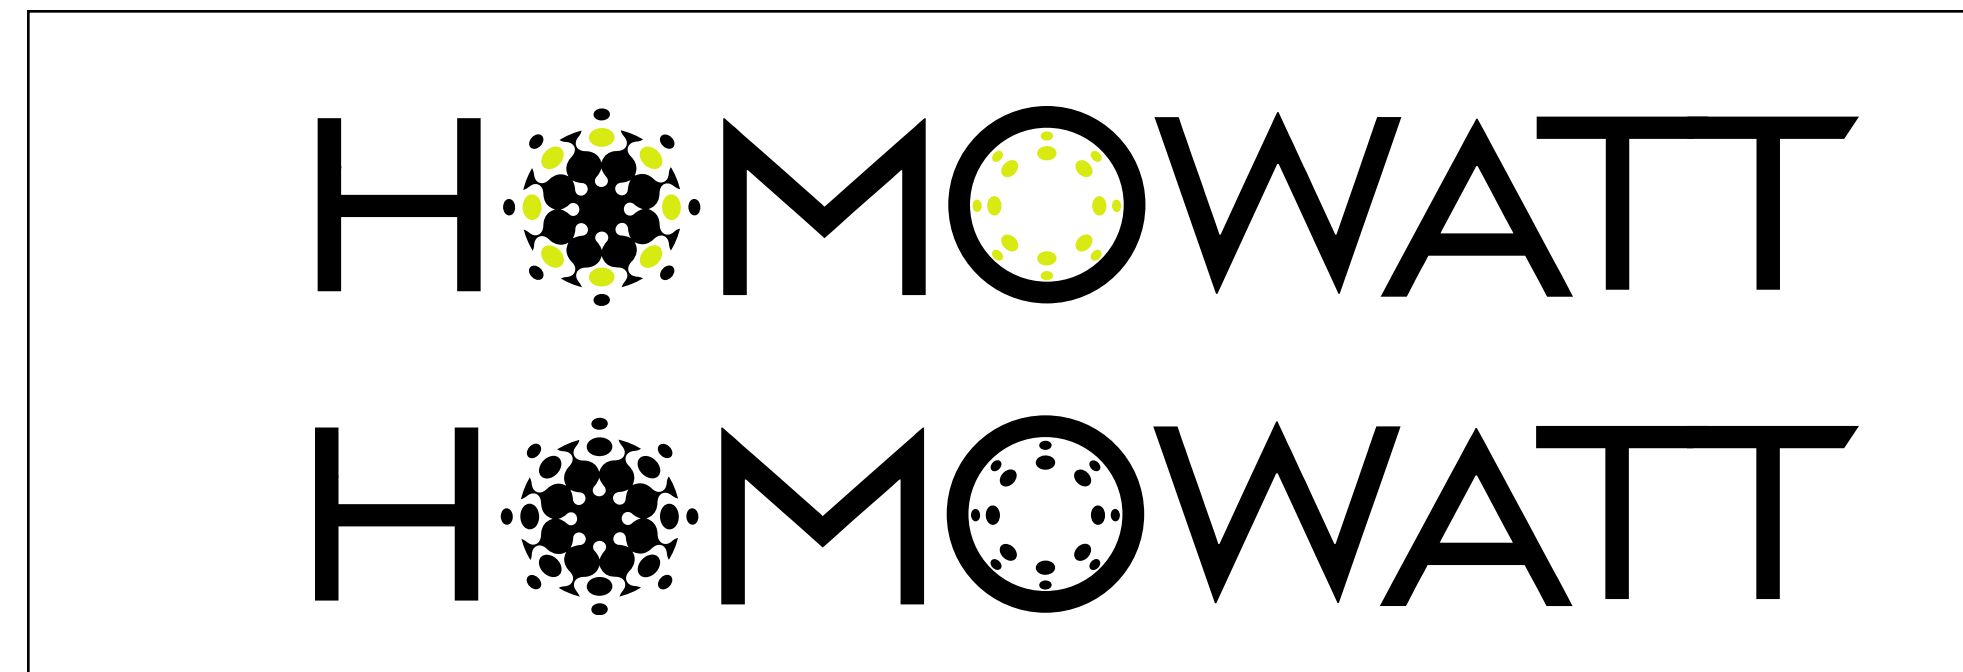

## Form

When using the "HOMOWATT" logo, ensure the image is clear and unaltered. The size of the logo must be appropriate to maintain its integrity and legibility. Avoid placing the logo on visually hectic or distracting backgrounds for its prominence and easy recognition. The colours, design elements, or proportions of the logo should not be altered for any reason, its depiction must always be consistent.

In special situations, you may adapt the logo's color based on the background, but the color selected should be within the brand's color range. To uphold the brand's integrity and consistency, any usage of the logo must undergo review and approval from the brand management department.

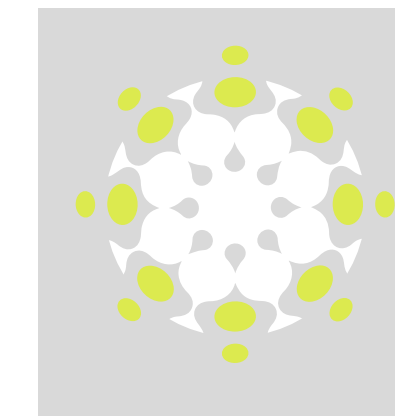

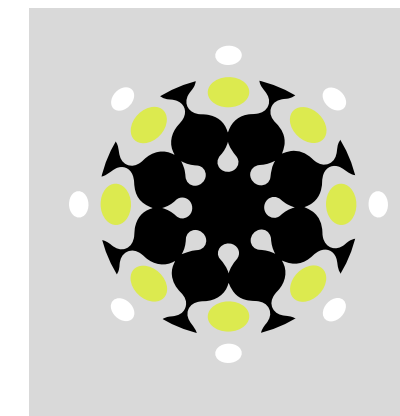

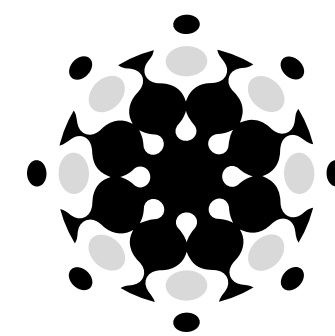

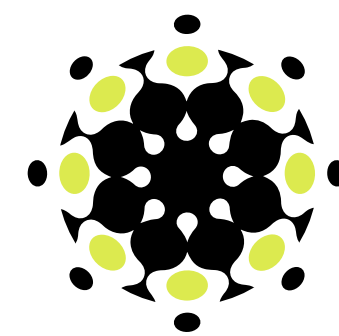

Basic Forms

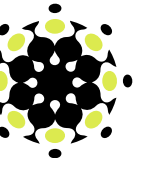

Variable Forms

## Brand Icon

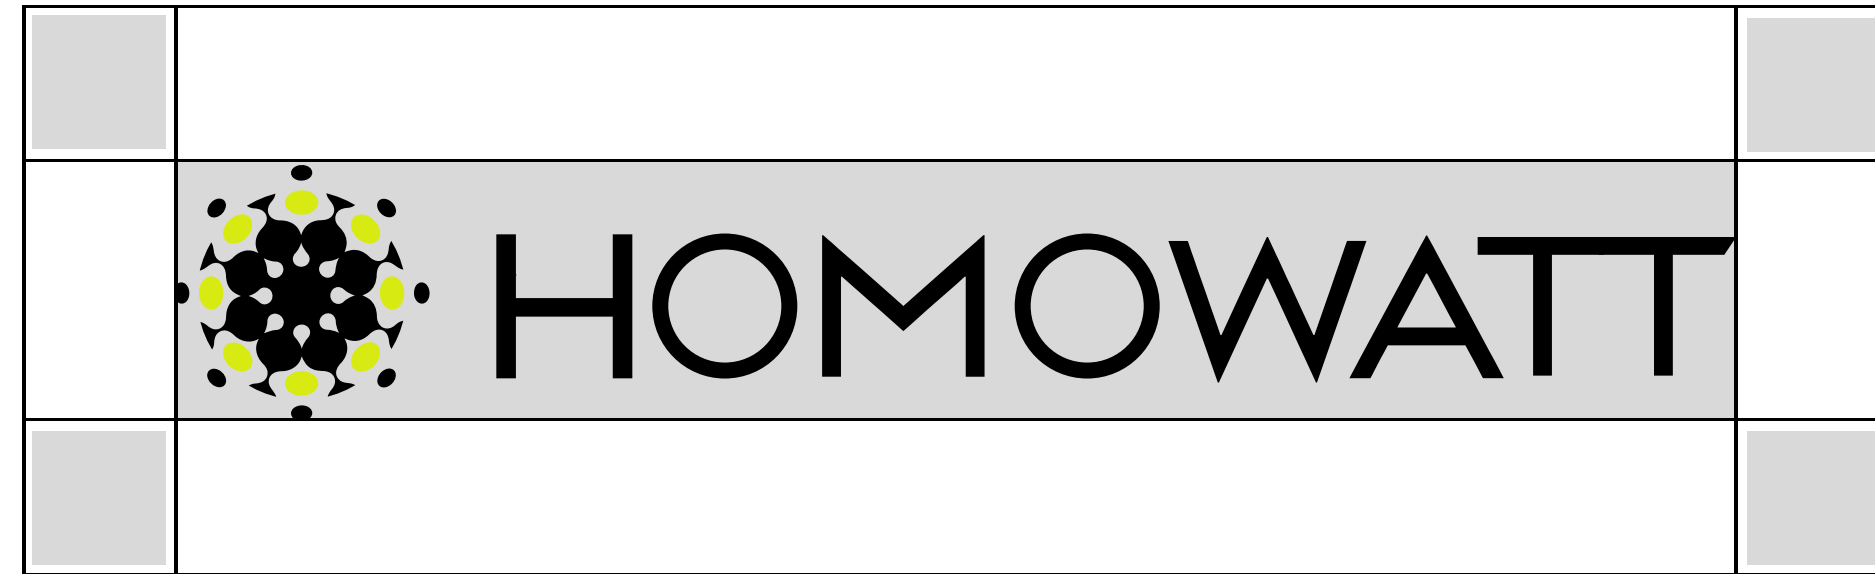

# 2.1 Logo & Usage

Do:

- + Keep Logo Proportions
- + Only Utilize Full Color Logo Mark
- + Keep Style Simple & No Effects
- + Ensure Logo is Readable on Imagery

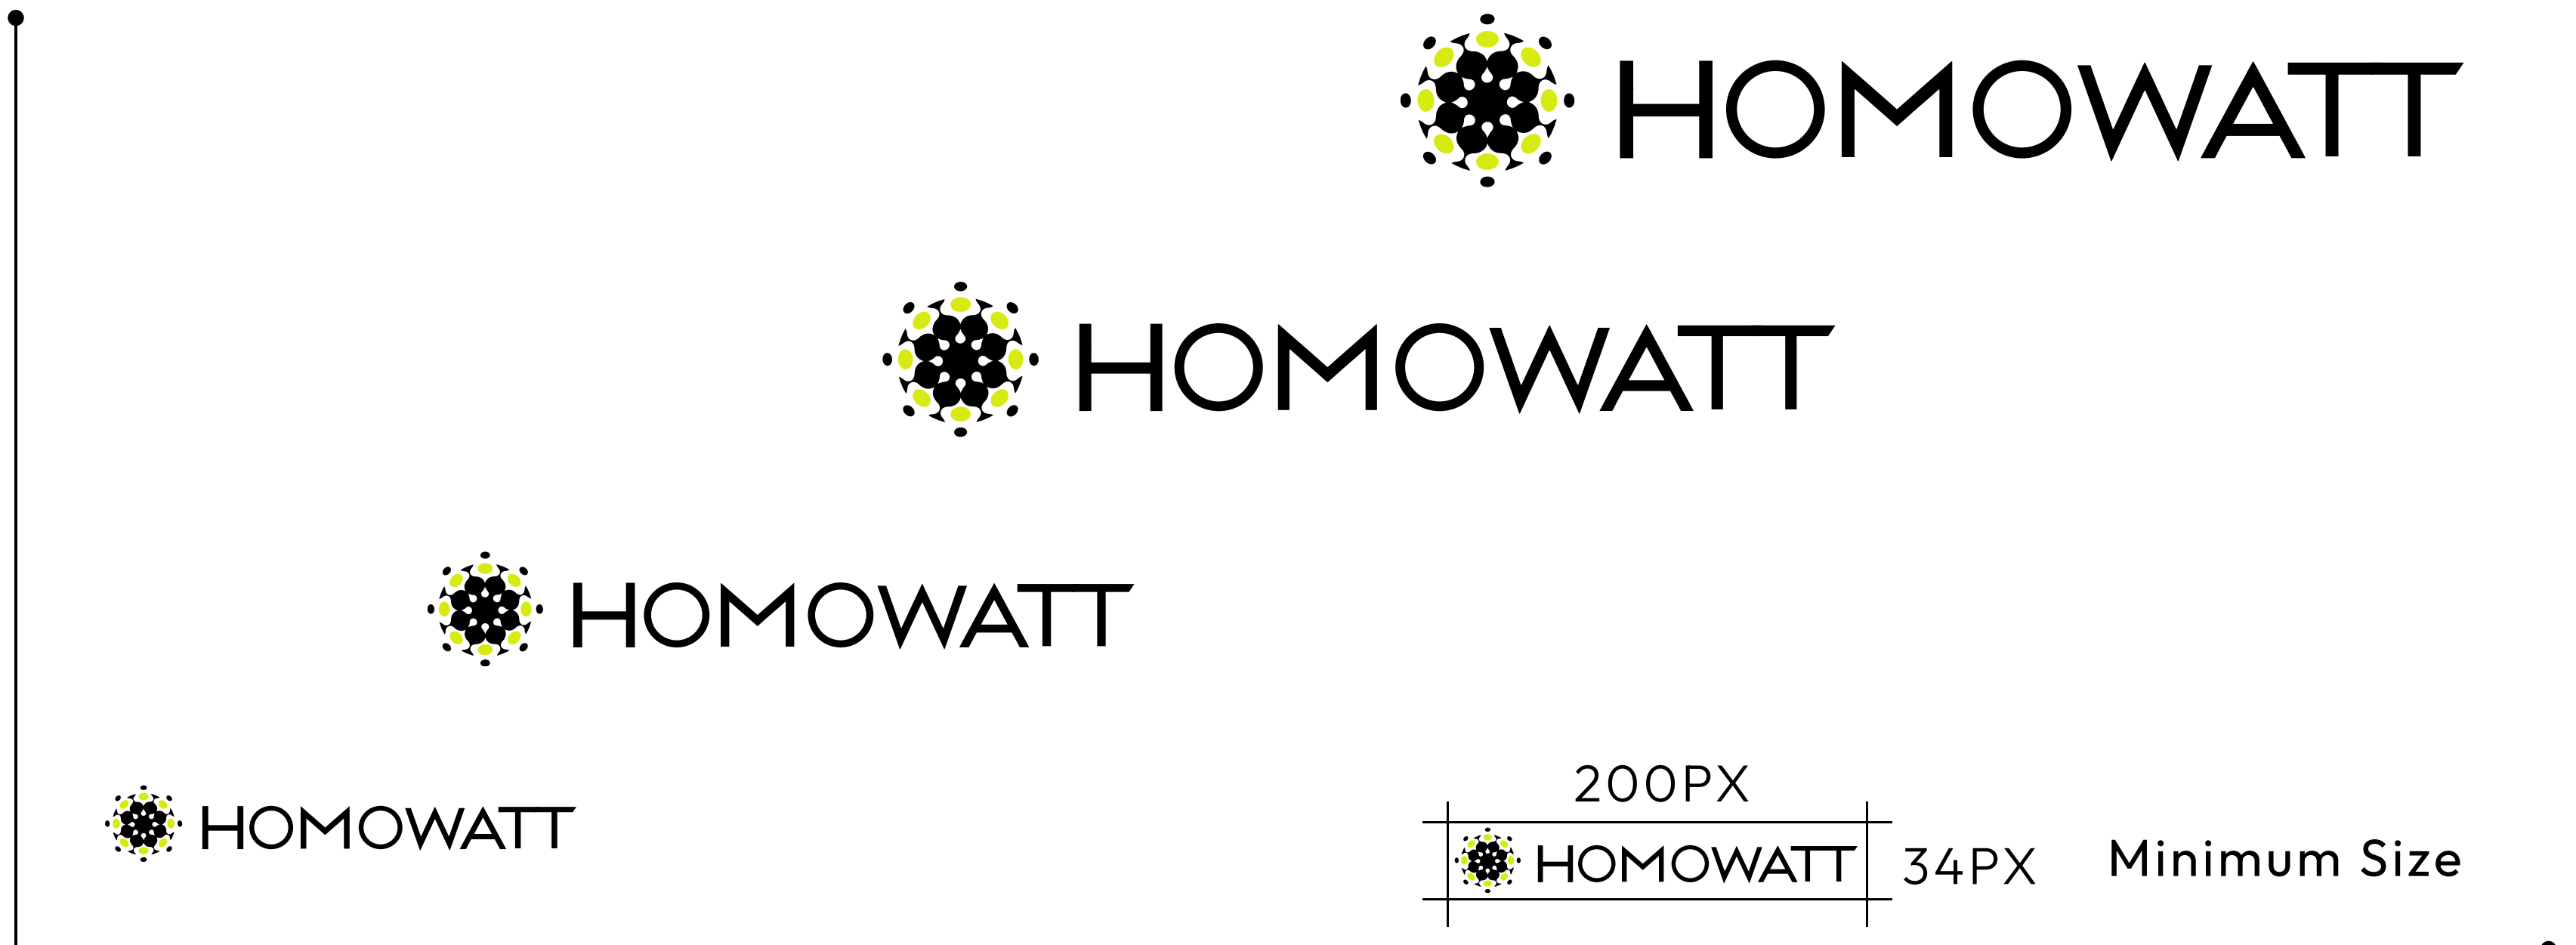

**Specs:**

- Top: 100 px
- Bottom: 100 px
- Left: 100 px
- Right: 111 px

Do NOT:

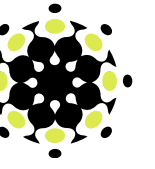

- + Stretch, Distort, or Change the Logo Proportions
- + Change the Color Outside the Defined Brand Palette
- + Add Effects or Elements Outside of HOMOWATT
- + Use a Logo Mark that has Low Readability

## 2.1

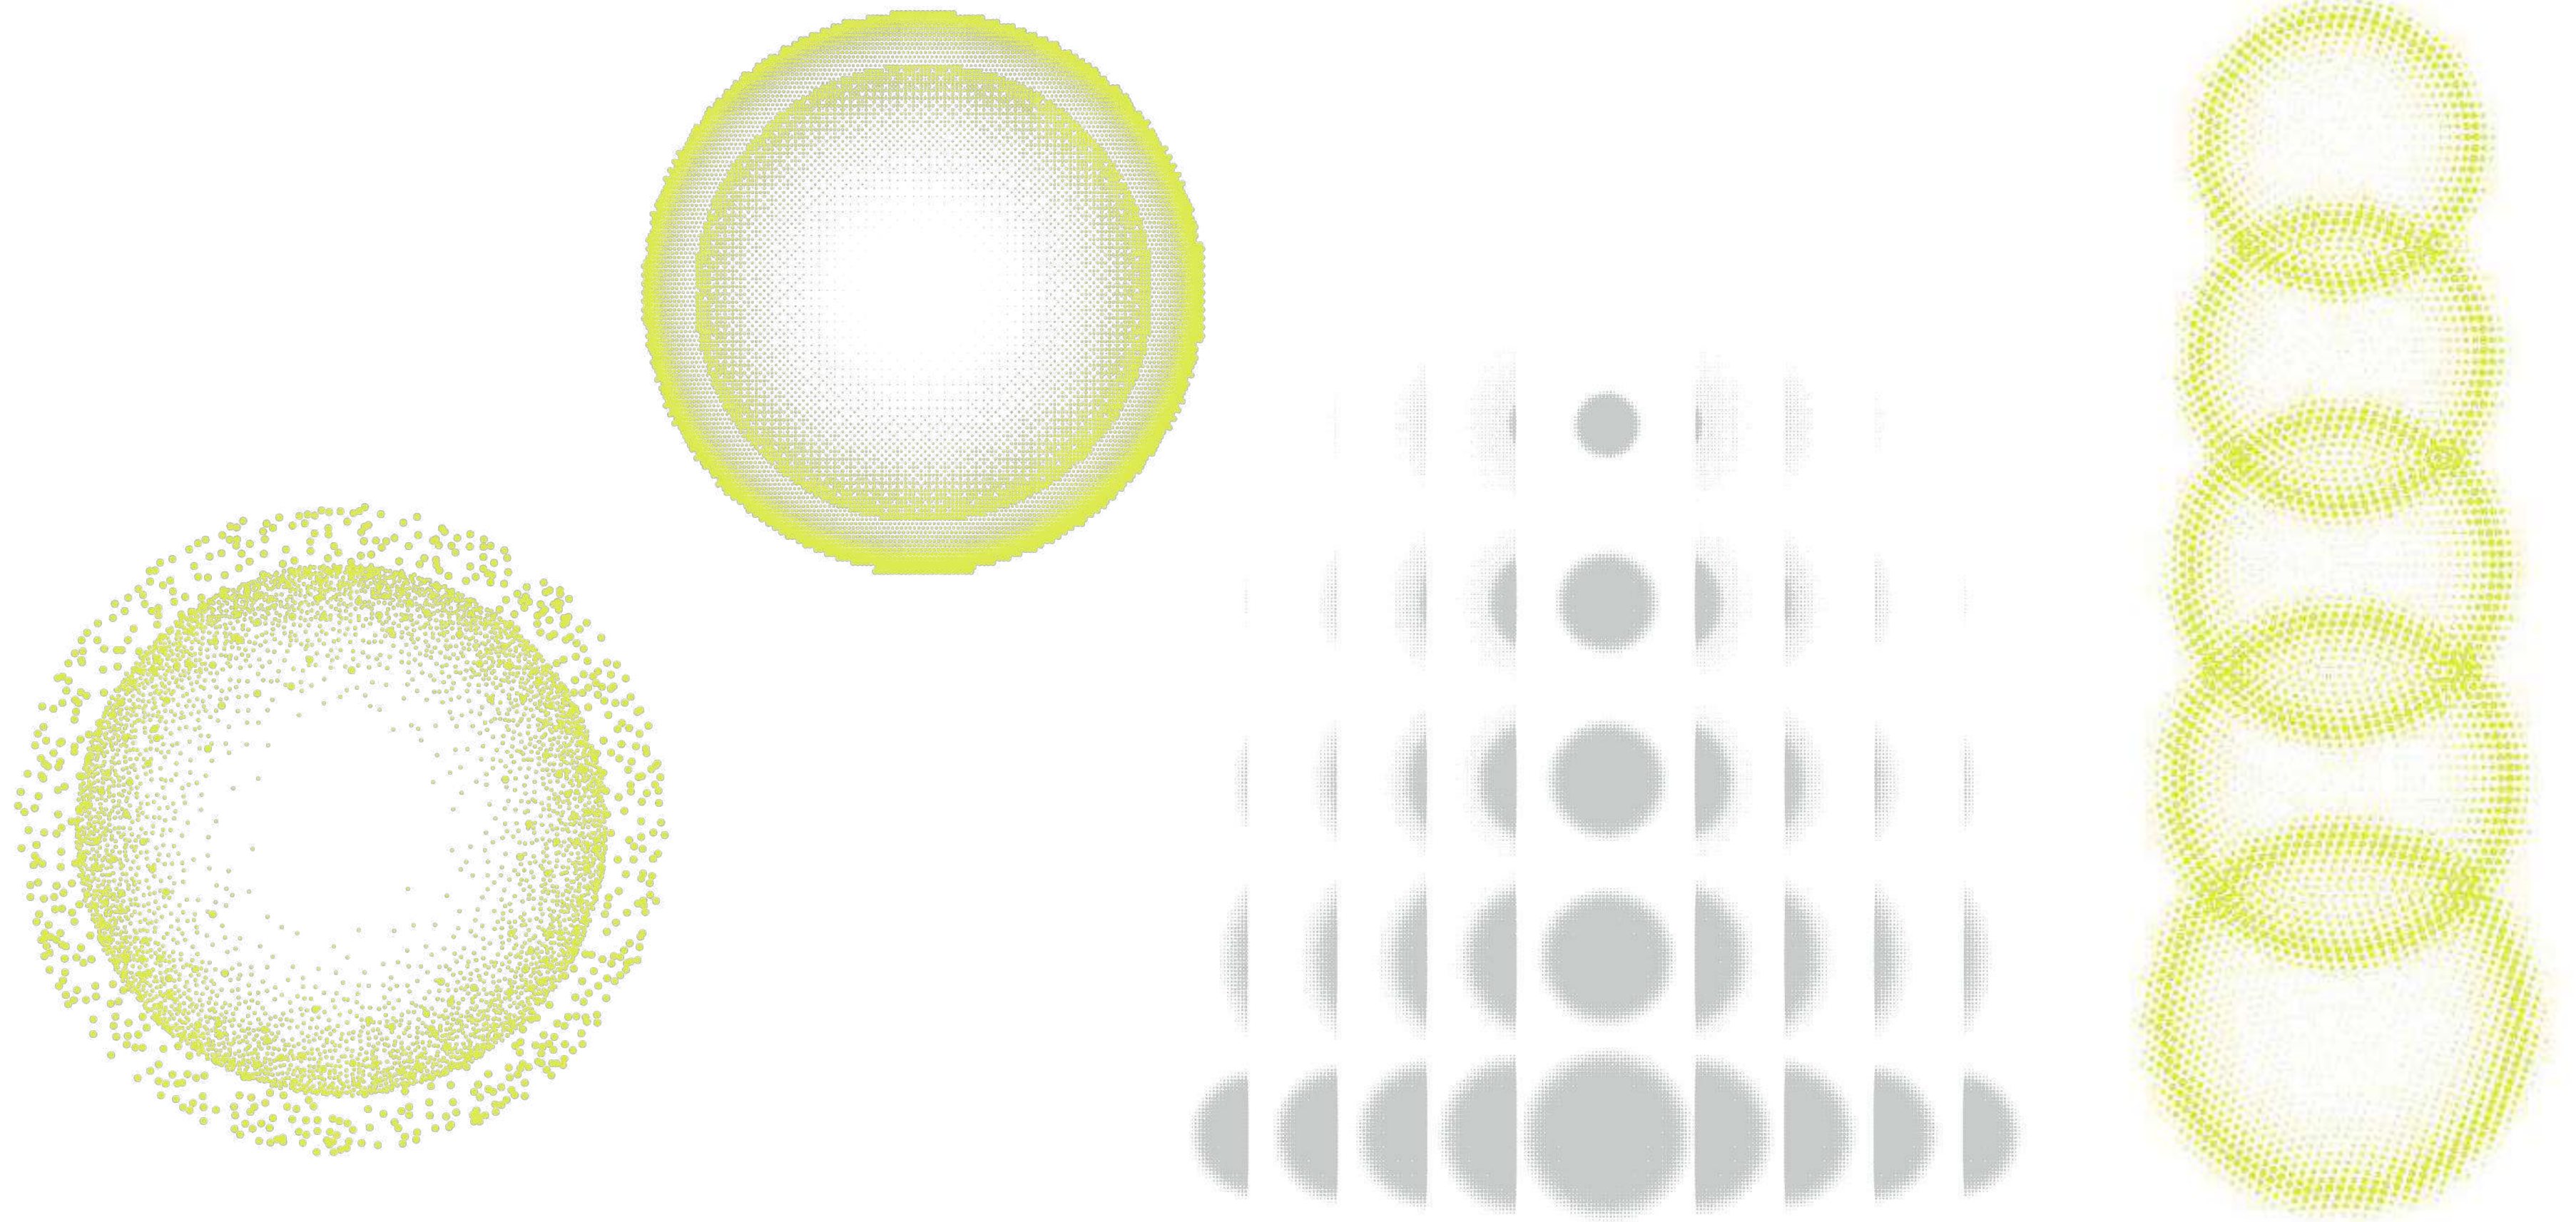

# Logo & Usage

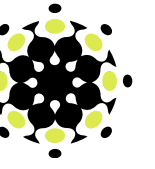

The brand's pattern is constructed from dot-like elements, which we regard as a symbol of energy and thus forming our unique visual language. These elements not only reflect the core values of our brand but also add diversity to our visual presentation. Moreover, this meticulously designed pattern holds an extremely important position in our brand identification system.

The application of this pattern is widespread, from our brand's work badges to the interface of our mobile application. The presence of these dot-like elements injects more vitality and vibrancy into our brand. This not only helps our brand stand out among many competitors but also enhances brand recognition and influence.

## 2.2 Pattern

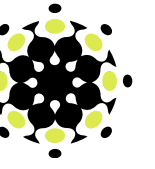

The right-hand side presents case studies of our brand pattern being put into actual scenarios. These exemplify precisely how the pattern is embedded into various design elements to enhance our brand's visual impact. Upon careful examination of these applications, you'll gain deeper insights into how our brand pattern elevates the overall appeal of the designs, maintaining consistency and recognisability across diverse applications.

This showcases the practical embodiment of our brand philosophy and is a significant part of our visual strategies.

## 2.2 Pattern

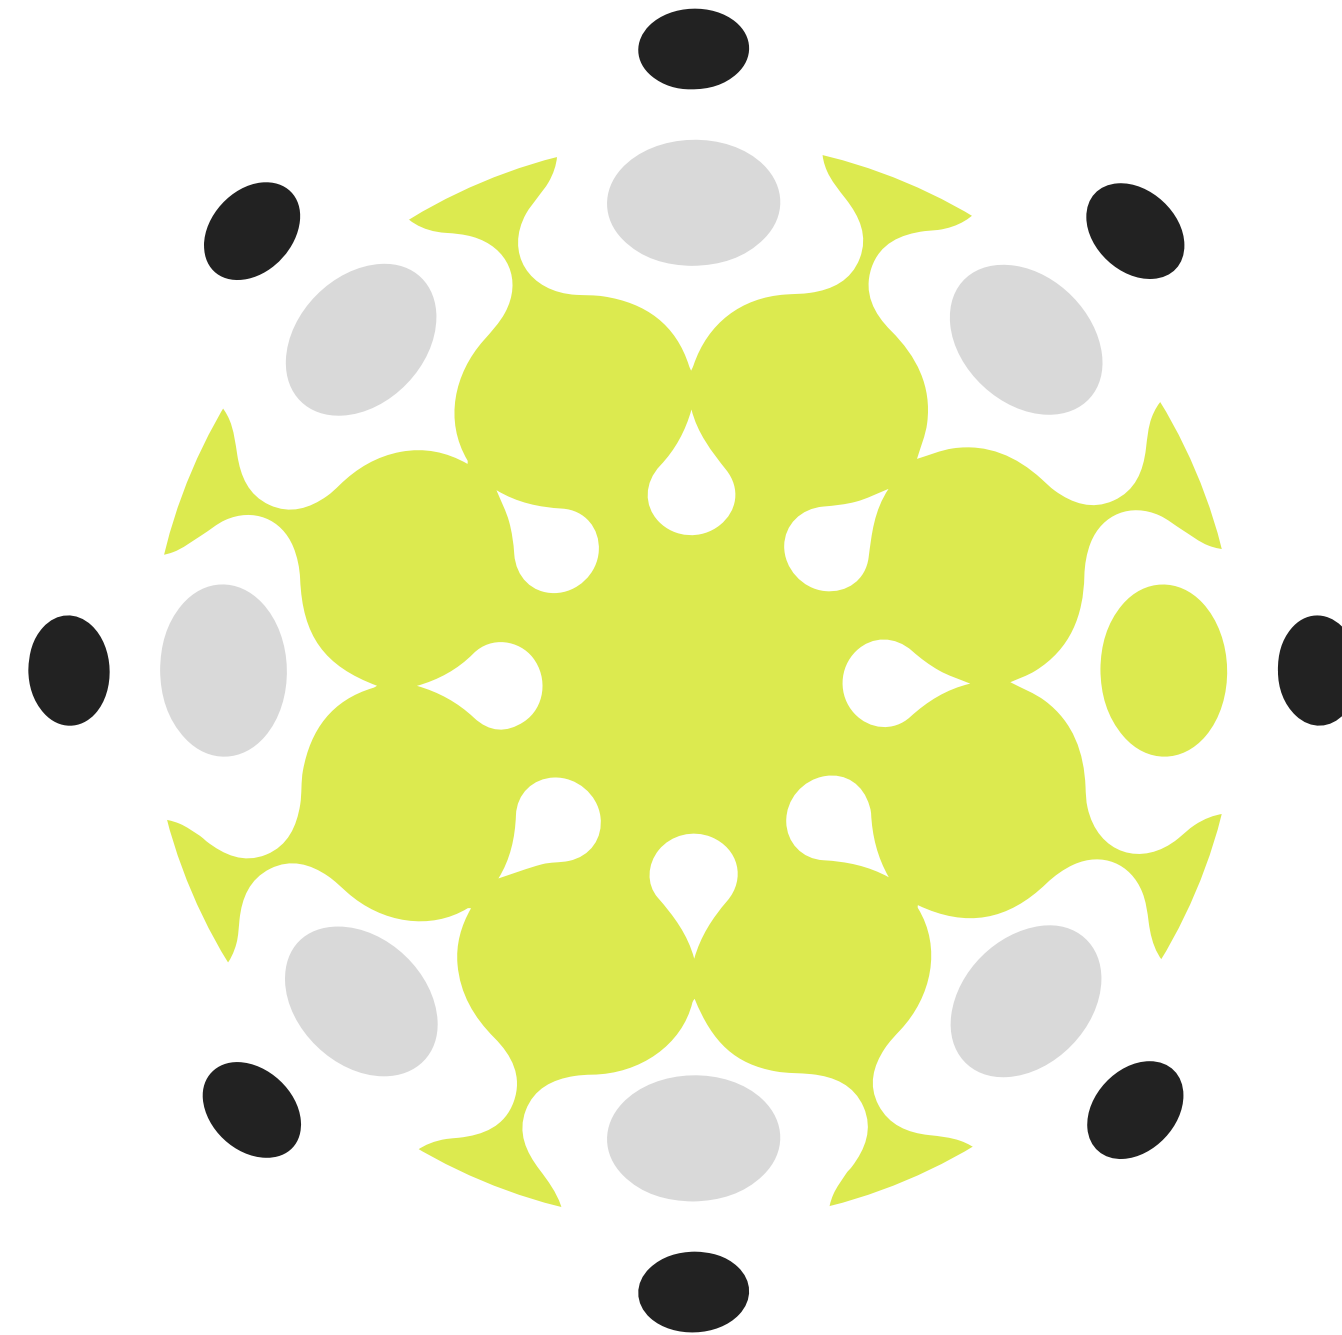

Our core colours includes:

White: Sets a clear backdrop and contrast.

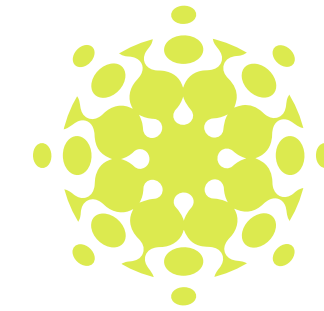

#DCEA4F Yellow: Our accent colour, symbolising power and energy, makes our brand stand out.

#222222 Black, #D9D9D9 Grey: As baselines, to generate a balanced and stable visual effect.

Together, these constitute our brand's palette, which reflects consistency in all visual materials.

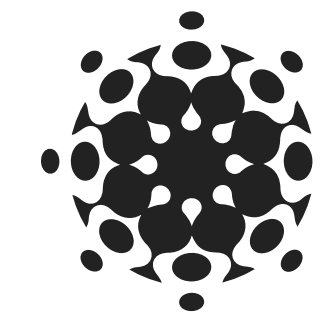

#DCEA4F

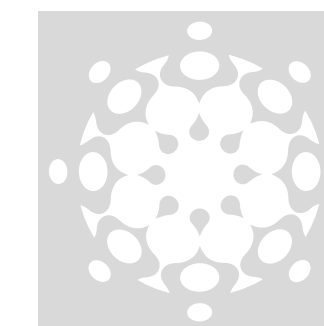

#D9D9D9

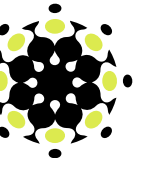

#222222

#FFFFFF

## 2.3 Color Pattern

In our brand's visual communication, type treatment plays a significant role. To highlight our brand's distinctiveness and visual style, we've chosen the fonts TT Alientz Trial Var and Outfit.

Primary Headlines: We've chosen to use TT Alientz Trial Var. This font adds a sense of modernity and avant-garde through its strong design and innovative characteristics, reflecting our brand's unique visual identity.

Sub-headlines and other text: For the rest of the typography, we use the Outfit font. This beautifully designed, easy-to-read font is ideal for sub-headlines and the rest of the text. The smooth lines and clear design offer a refined feel while adding elegant rhythm to the overall layout.

Link2

[Link in Text Style 02](#). Lorem ipsum dolor sit amet, consectetur. Highlighted Text Style. dipiscing elit, sed diam nonummy.

## 2.4 Type Treatment

The extendability of the design is critical, ensuring our brand expresses consistency across all elements and applications. To understand this notion deeper, let's examine the application of typography in specific elements such as buttons and lists.

These settings form the core visual language of our brand. Whether it's primary headlines, sub-headlines, or specific design elements like buttons and lists, we strive to maintain consistency and harmony in design to highlight the distinguishing features of our brand.

B1

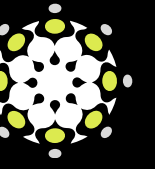

BUTTON 01

B2

BUTTON 02

## 2.4 Type Treatment

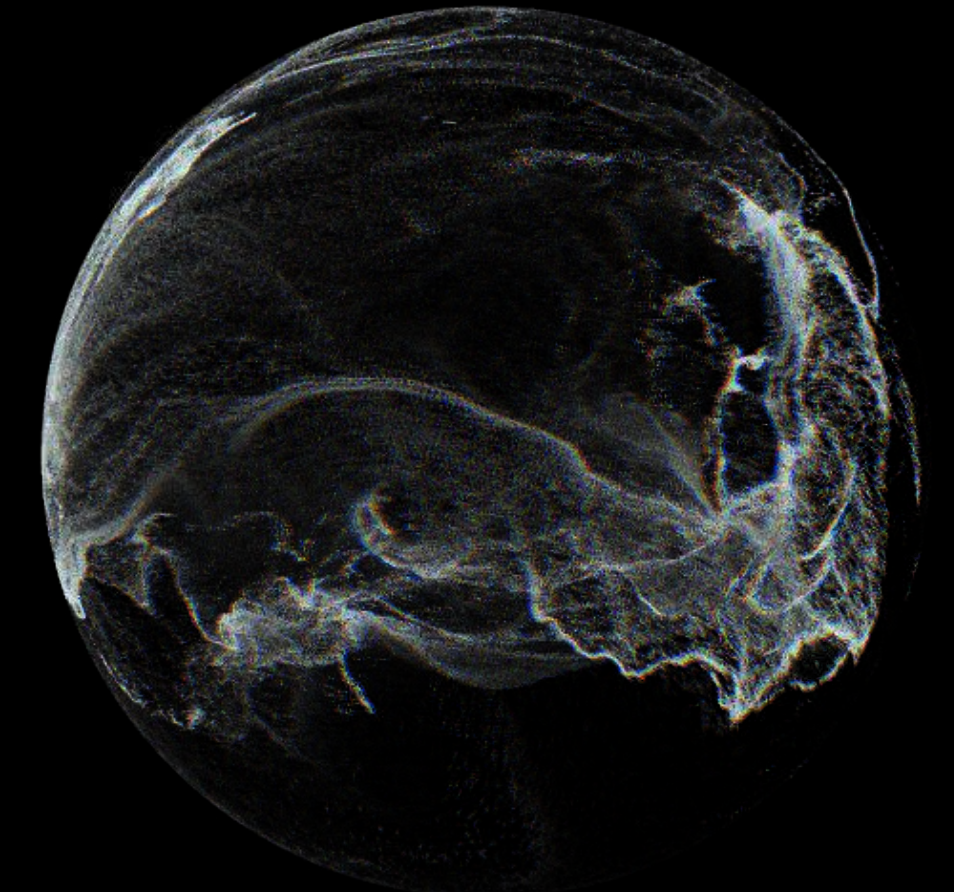

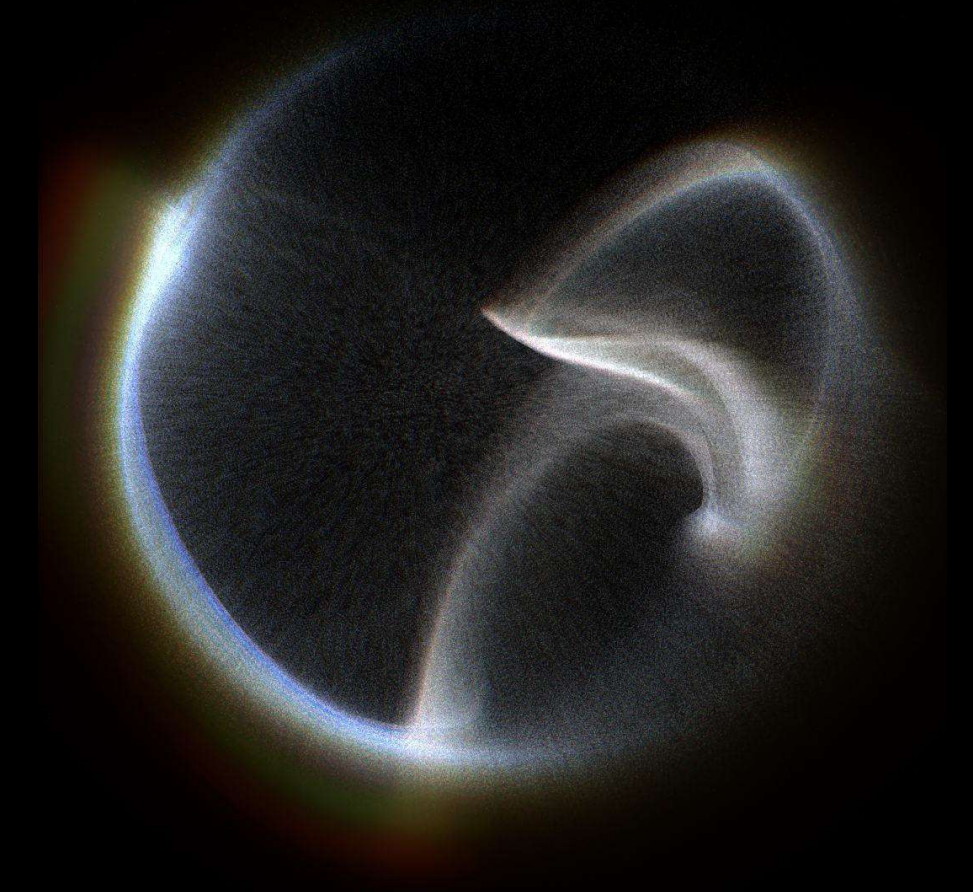

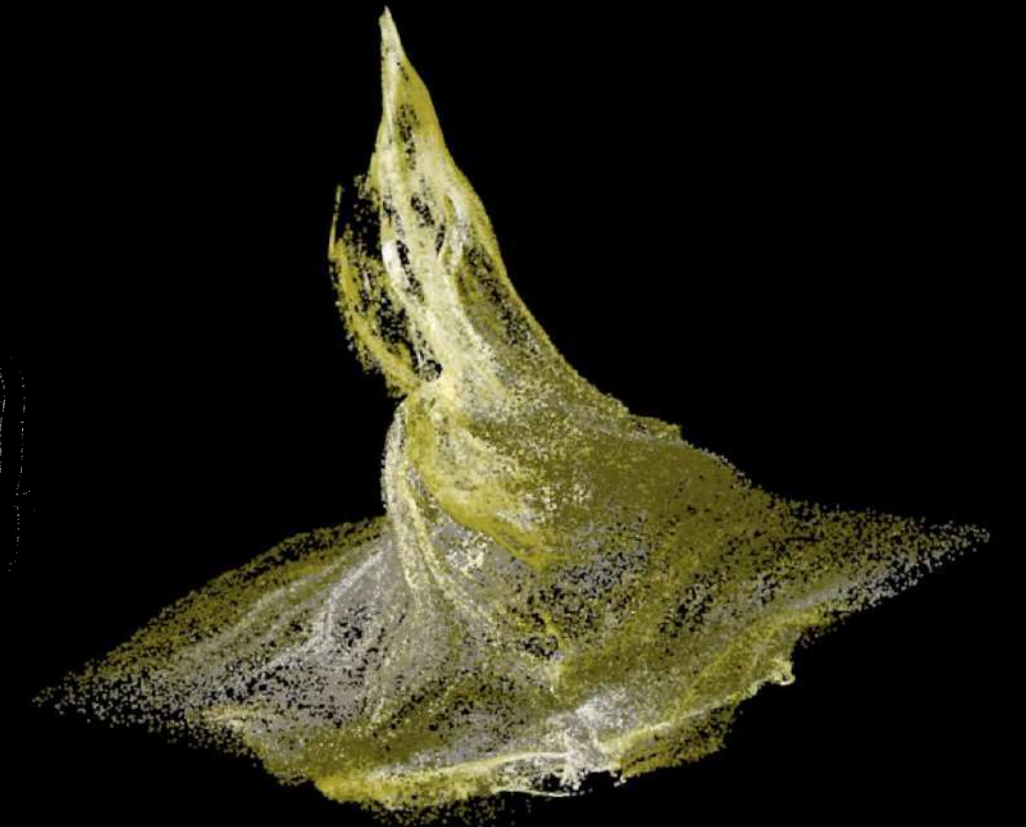

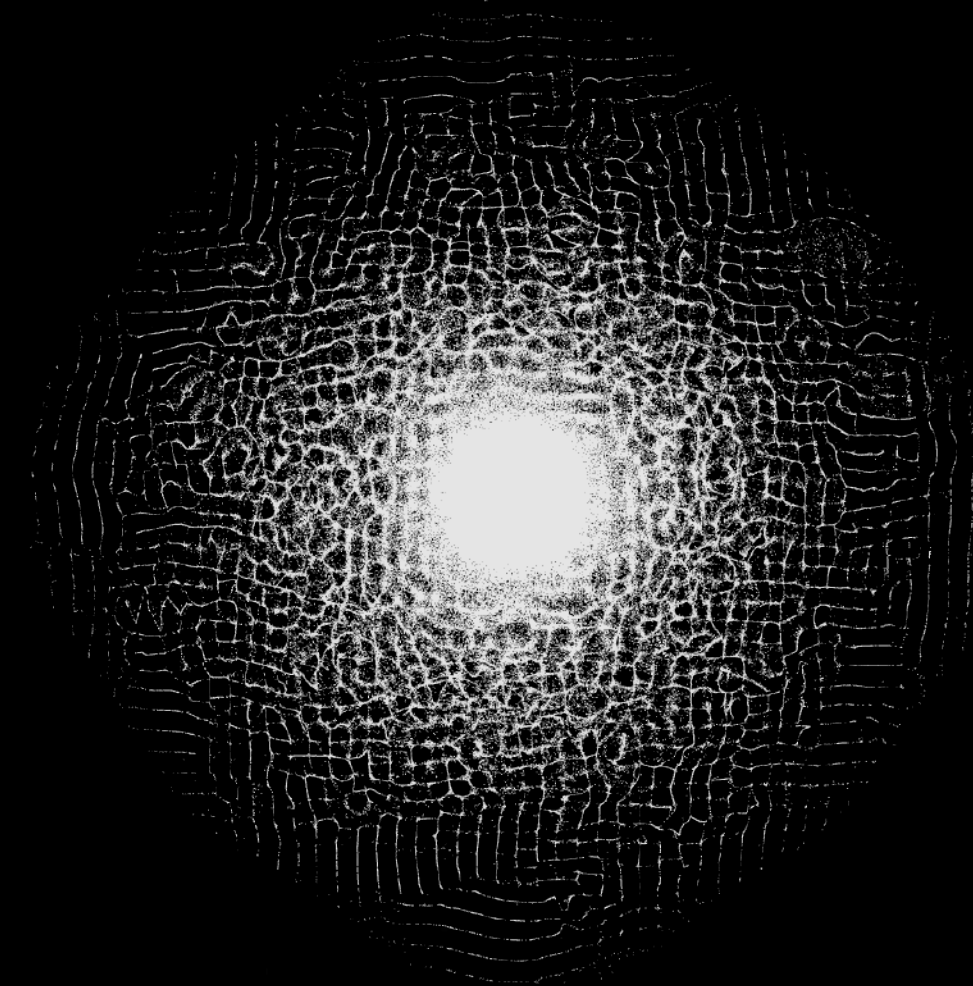

In our brand's image treatment, the focus is on the reflection of energy. To visualise this, elements like energy spheres are used, allowing our images to symbolise dynamism and innovation.

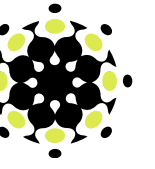

Moreover, particles are incorporated to further demonstrate the process of energy capture and absorption. These particles can be standalone or combined with other image elements like energy spheres to create unique and mesmerising visuals.

Thus, our image treatment is not merely about selecting and editing images; it's a creative process that vividly renders our brand ideologies visually.

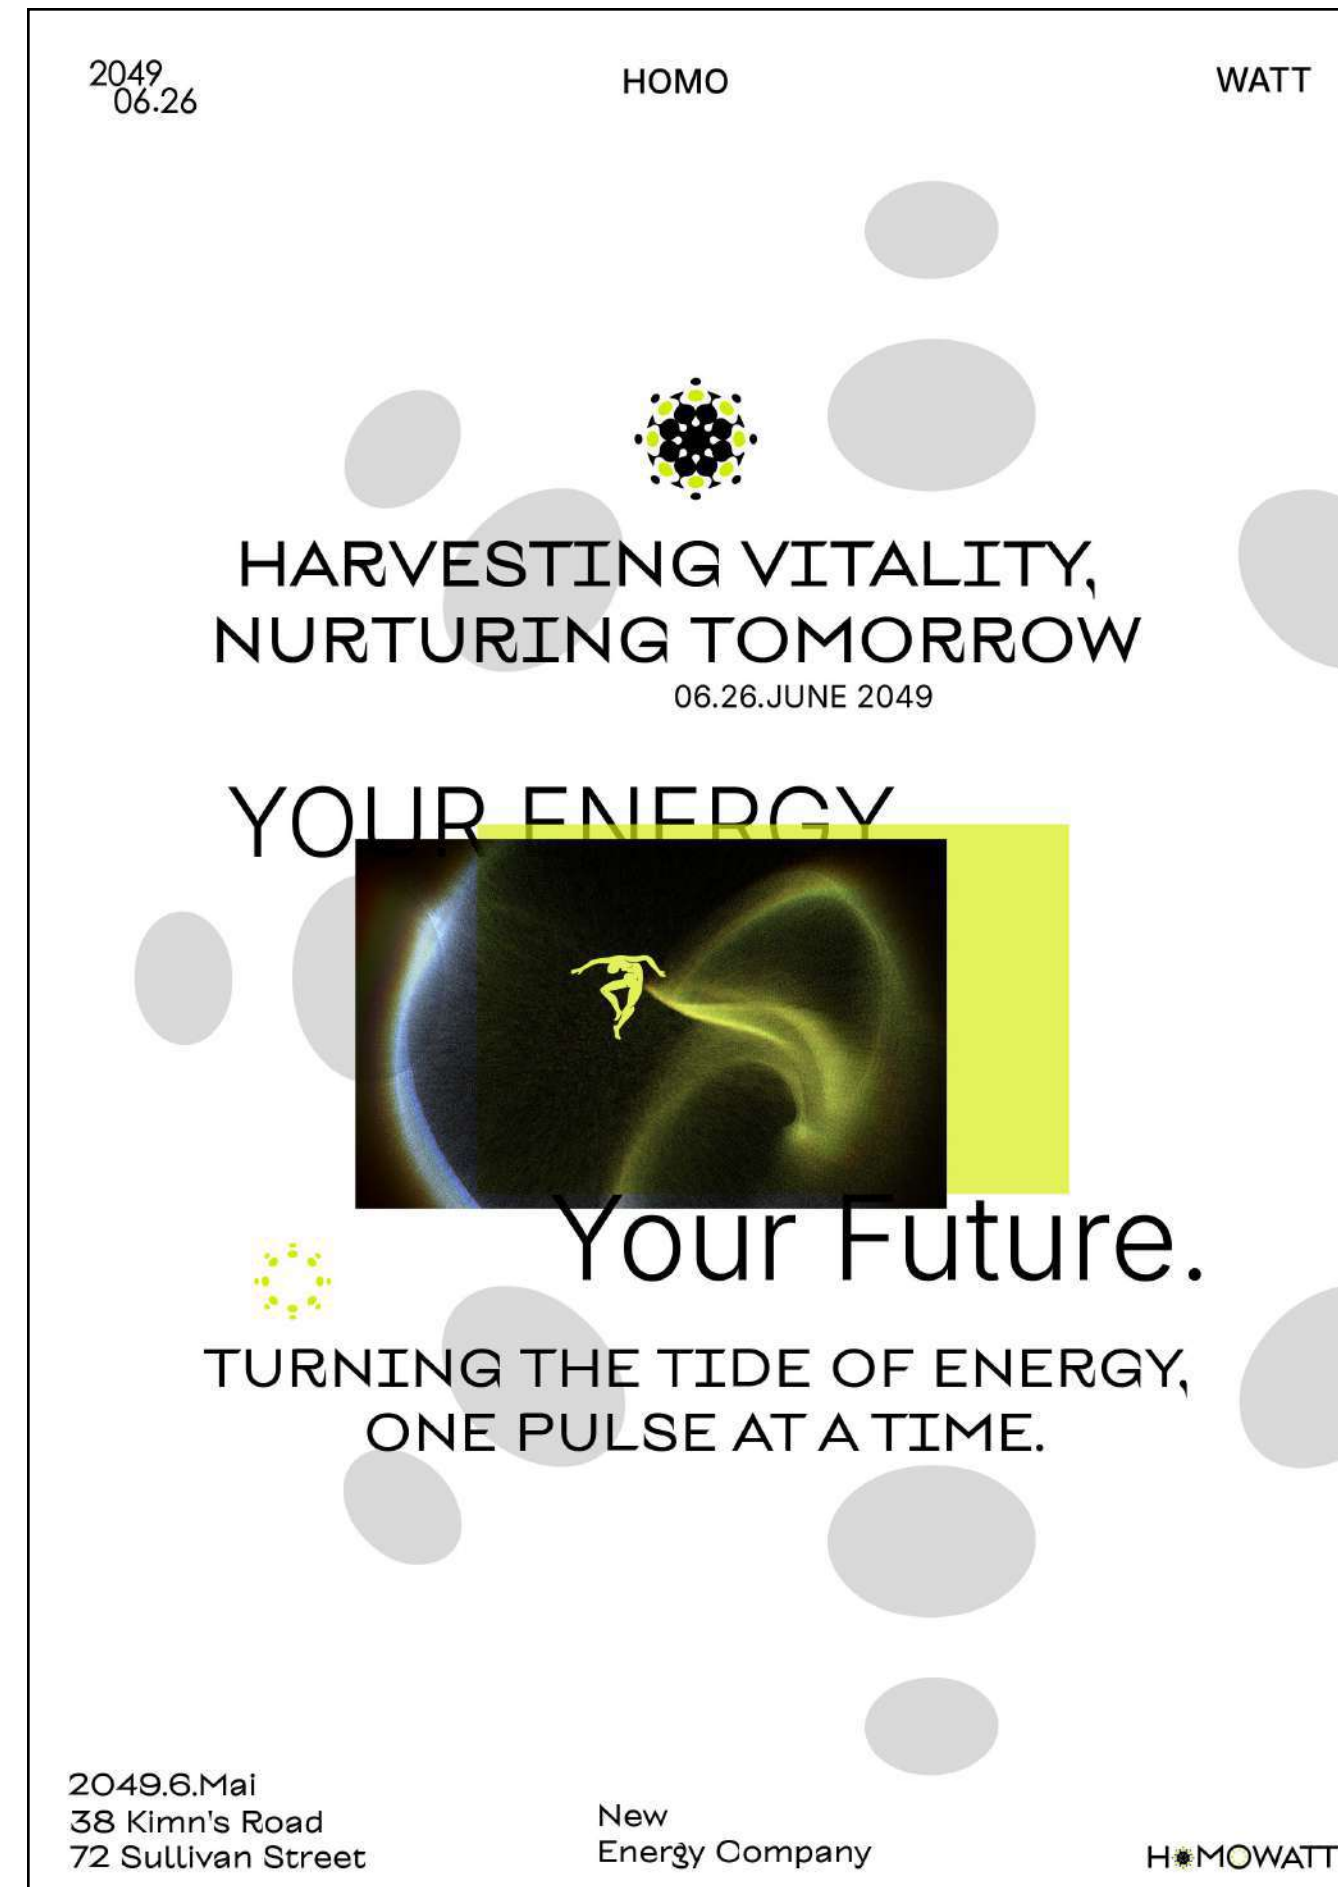

## 2.5 Image Treatment

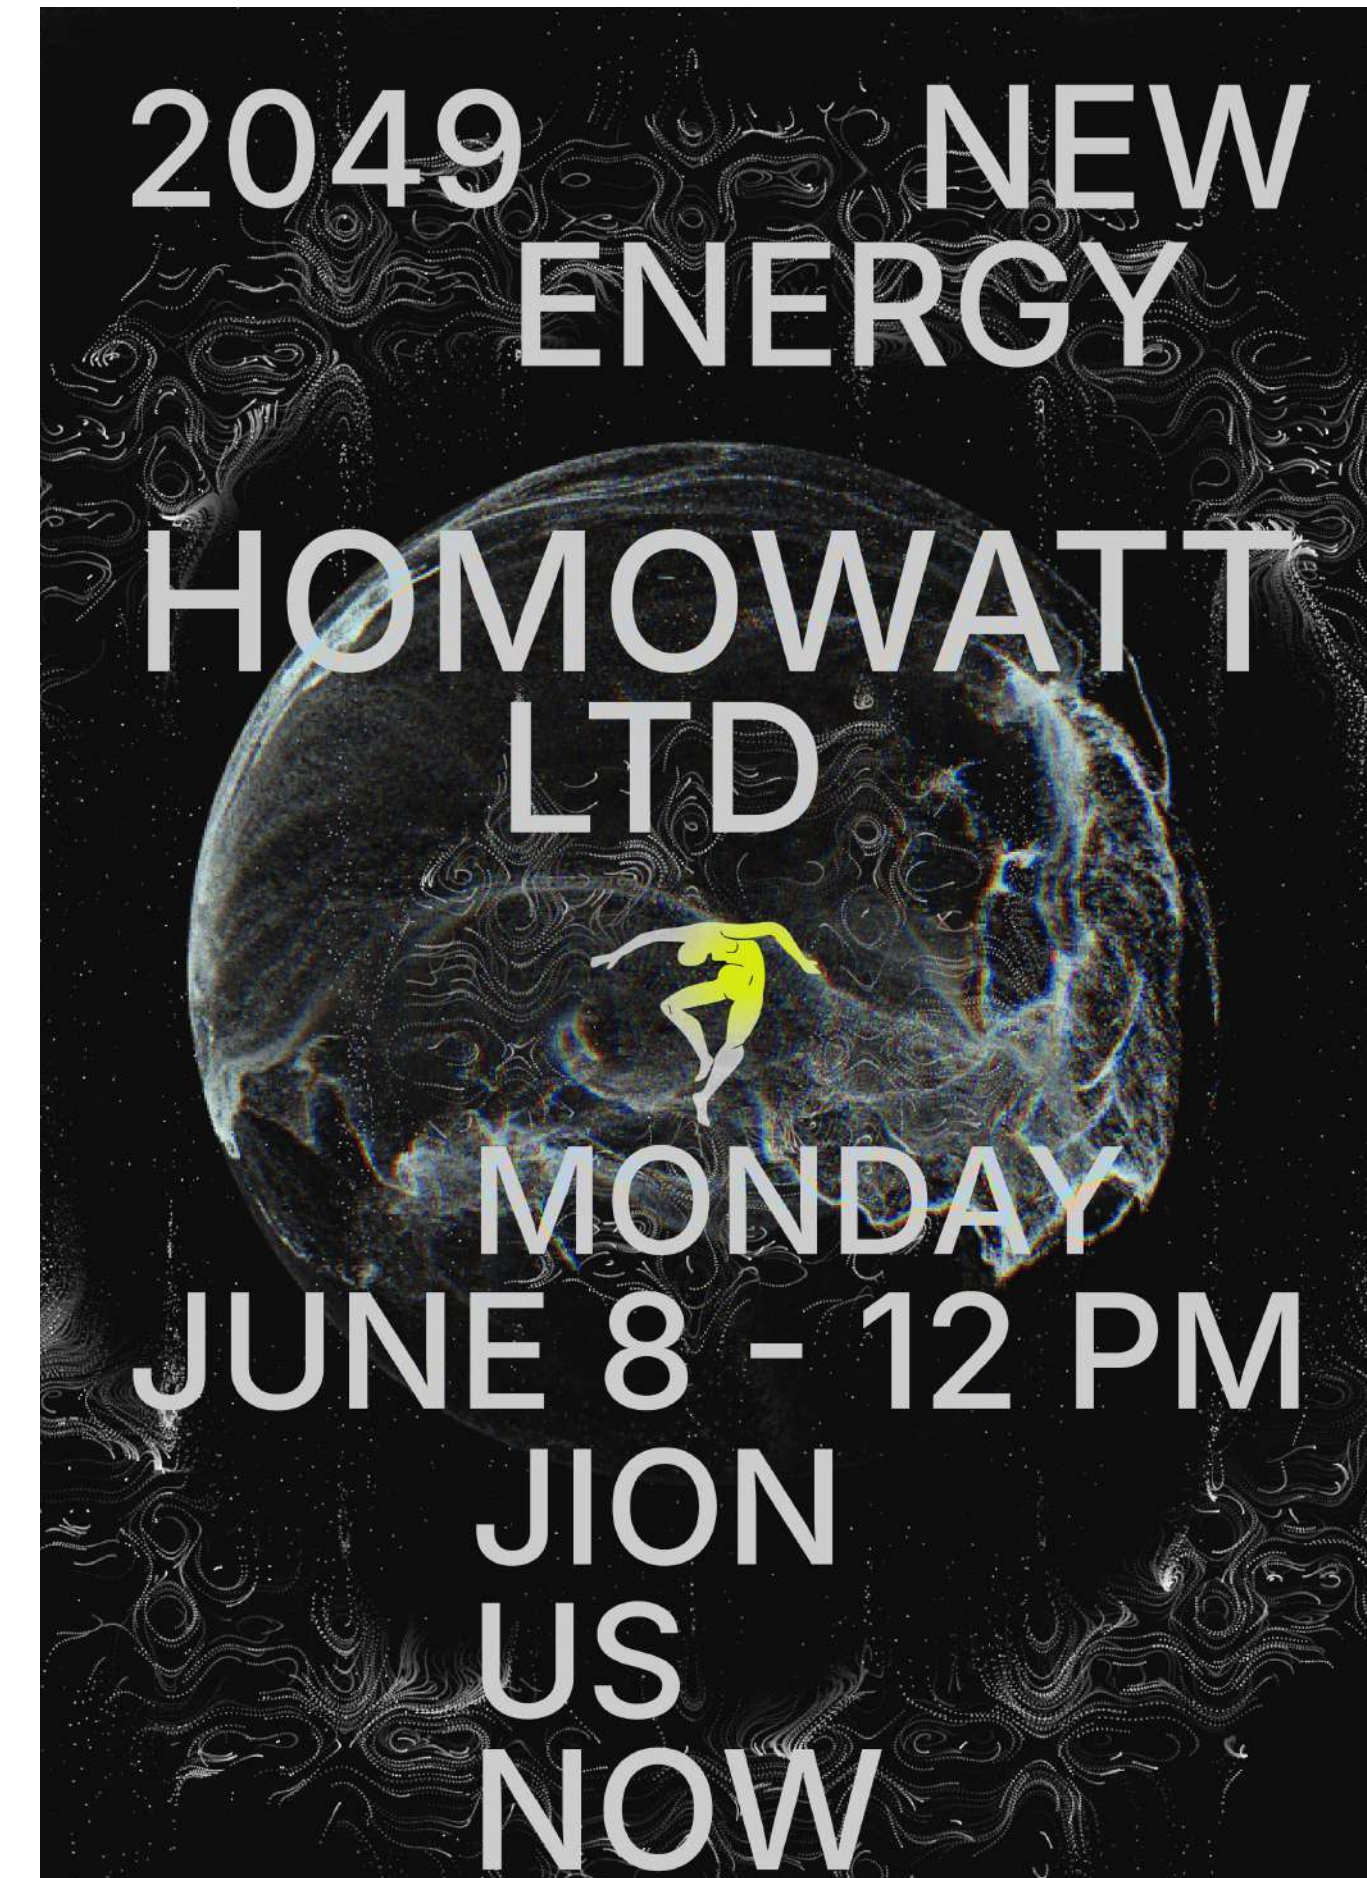

The right-hand side presents case studies of our brand pattern being put into actual scenarios. These exemplify precisely how the pattern is embedded into various design elements to enhance our brand's visual impact. Upon careful examination of these applications, you'll gain deeper insights into how our brand pattern elevates the overall appeal of the designs, maintaining consistency and recognisability across diverse applications.

This showcases the practical embodiment of our brand philosophy and is a significant part of our visual strategies.

## Statement

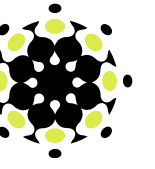

Human Body Heat Collector:

An innovative device that harnesses body heat to create energy, transforming everyday life into a force for eco-friendliness.

1.0  
Product-1

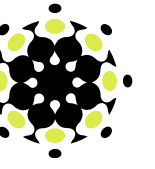

## Human Body Heat Collector:

With the core concept of using the human body as an energy source, we have developed this innovative human body heat collector. Designed with a simple but dramatic conical structure, it can capture and convert heat energy into electrical power, tapping into the endless potential of body heat. By simply stepping in, the machine can instantly start collecting heat generated by the human body. Every use reflects our company's commitment to the future of green technology and encourages individuals to adopt sustainable lifestyles.

# 1.0 Product-1

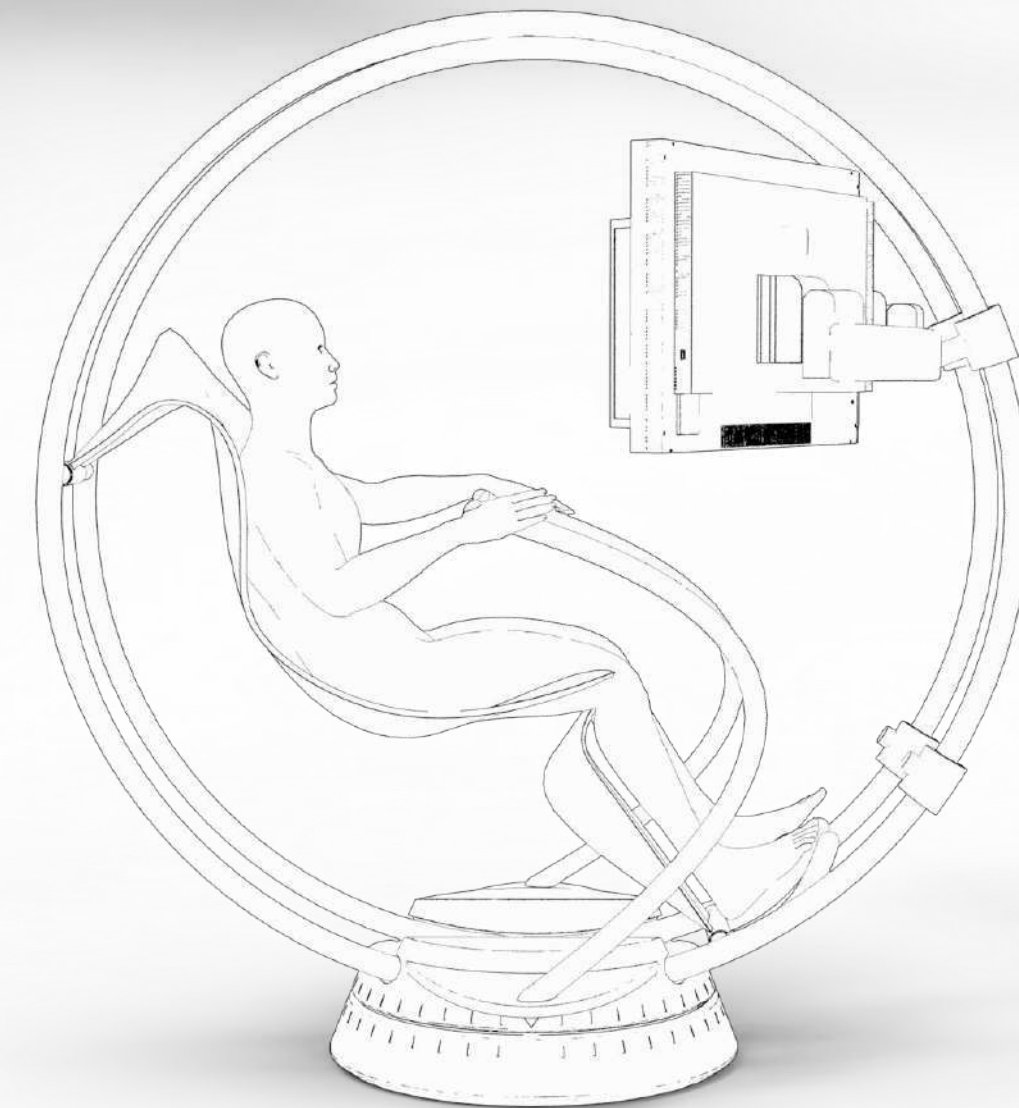

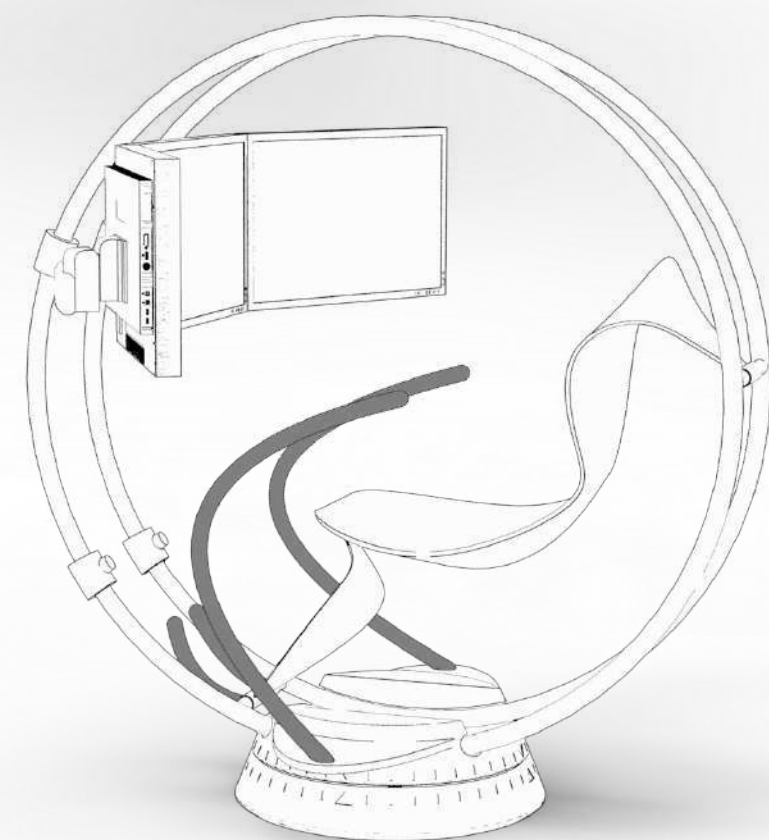

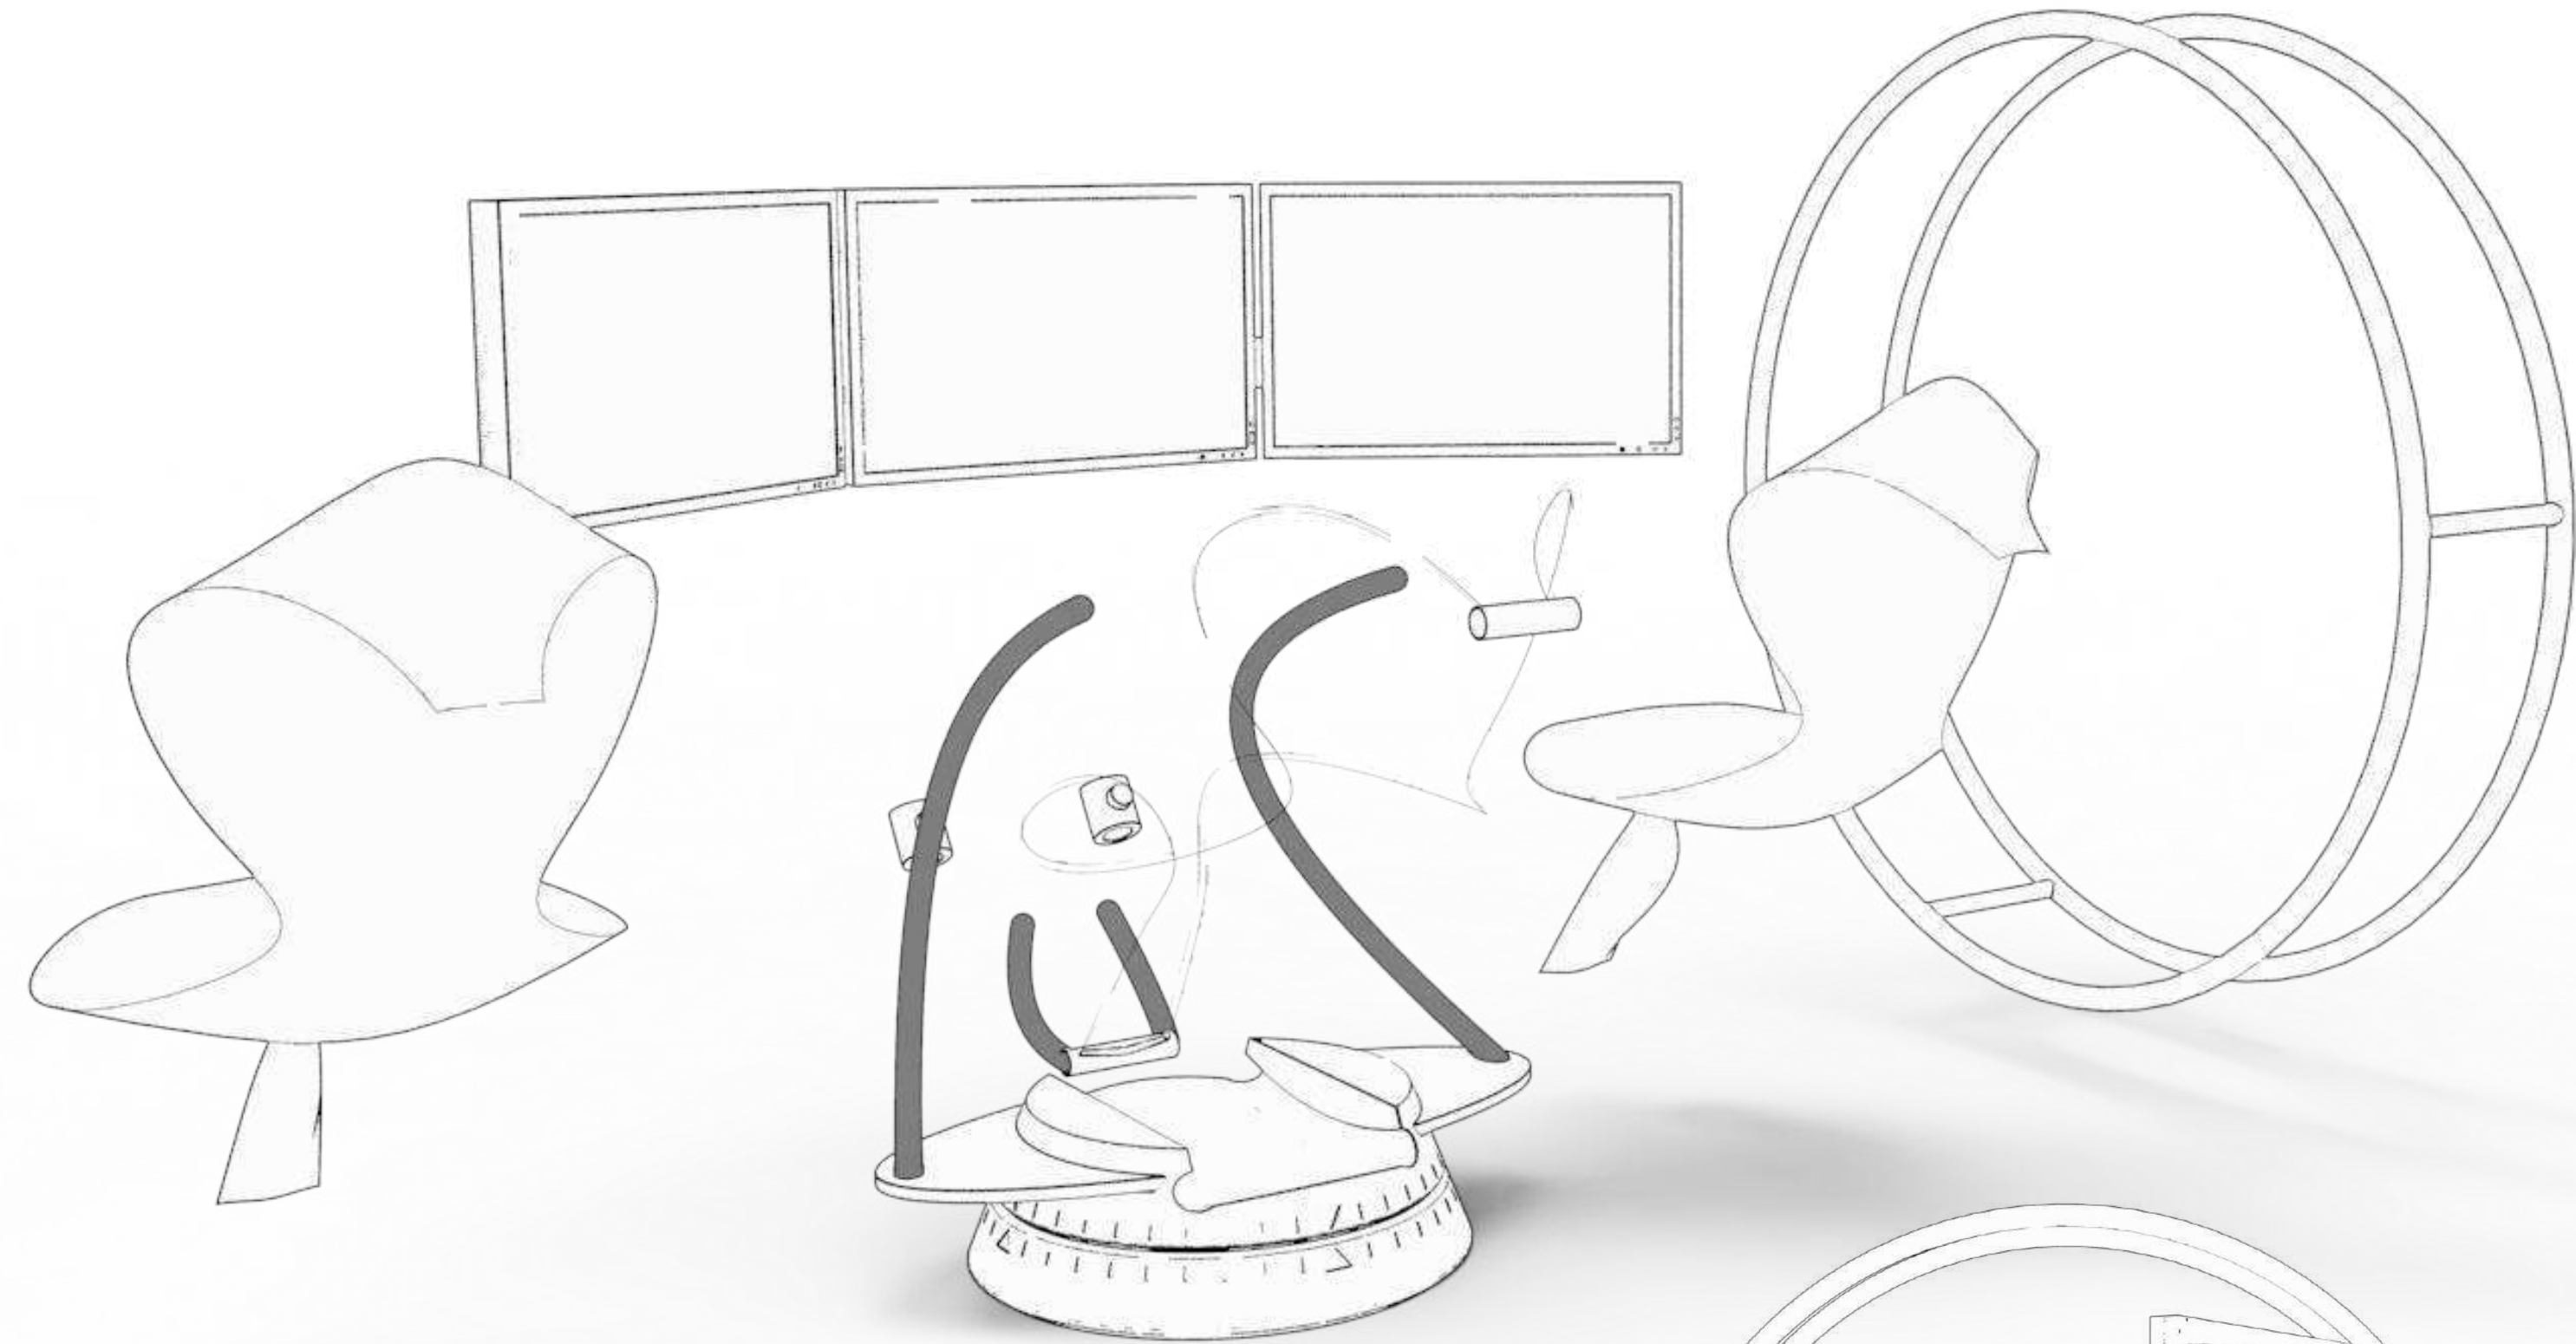

## Statement

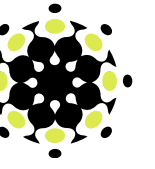

Mechanical Energy Collector:

Combining fitness and energy collection, making every workout a contribution to energizing the planet.

2.0  
Product-2

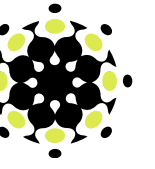

### Mechanical Energy Collector:

This mechanical energy collector breaks the boundaries of traditional fitness equipment, combining exercise and energy collection. With a fashionable design adaptable to all age groups, it aims to encourage people to generate energy through daily exercise. A large screen entertainment system provides a win-win scenario for exercise and entertainment. Be it running, pulling, or pedaling, in an instant, your workouts can provide energy for the world.

## 2.0 Product-2

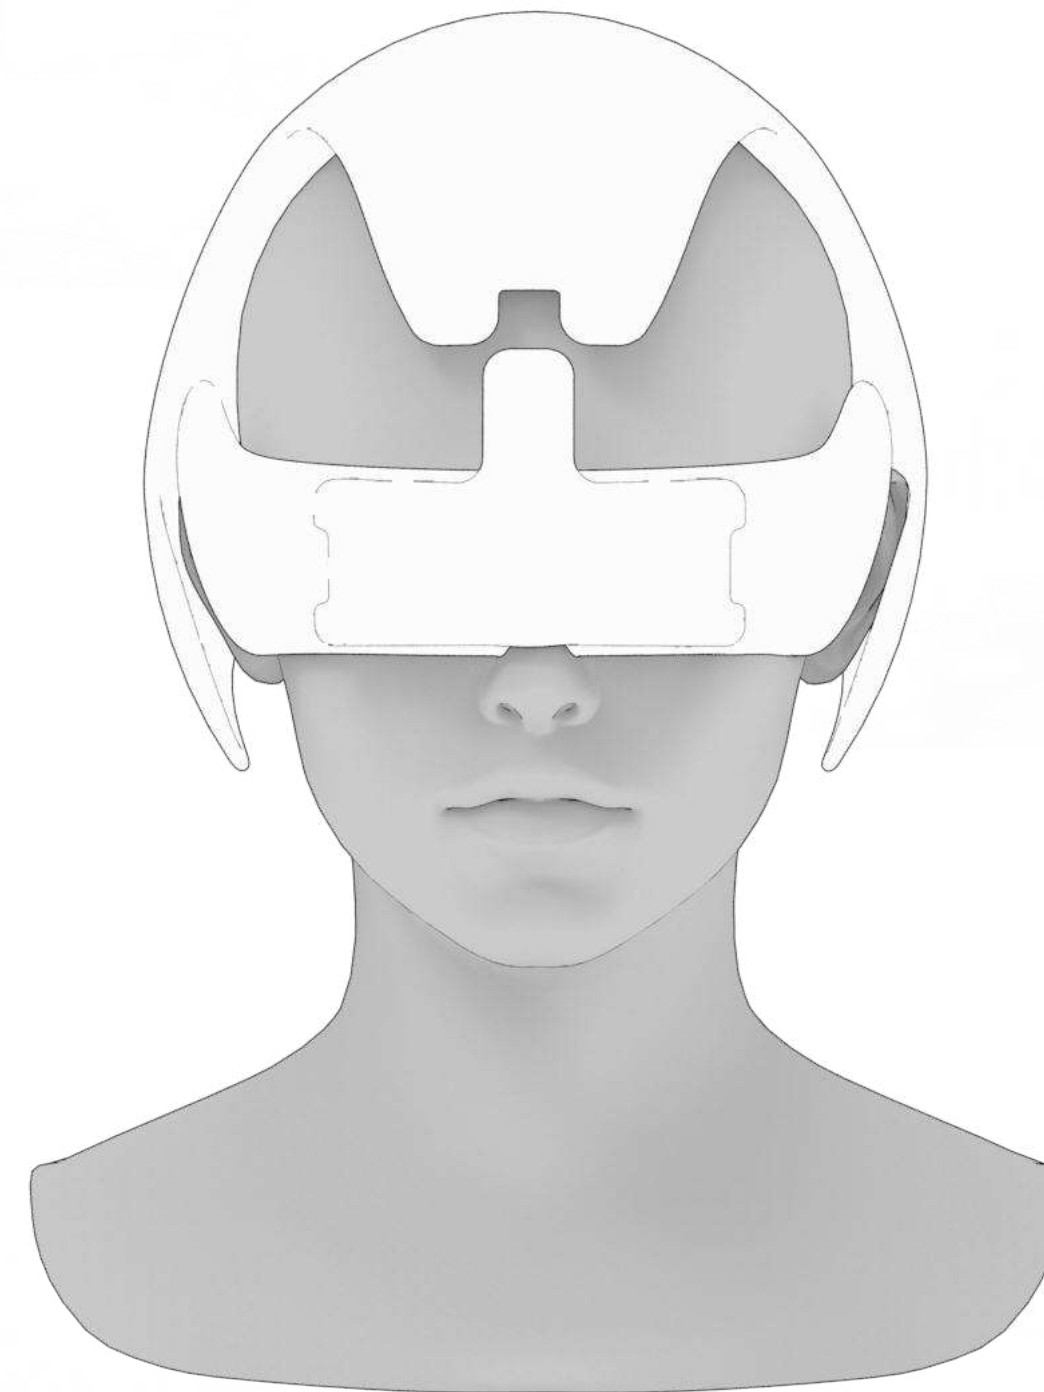

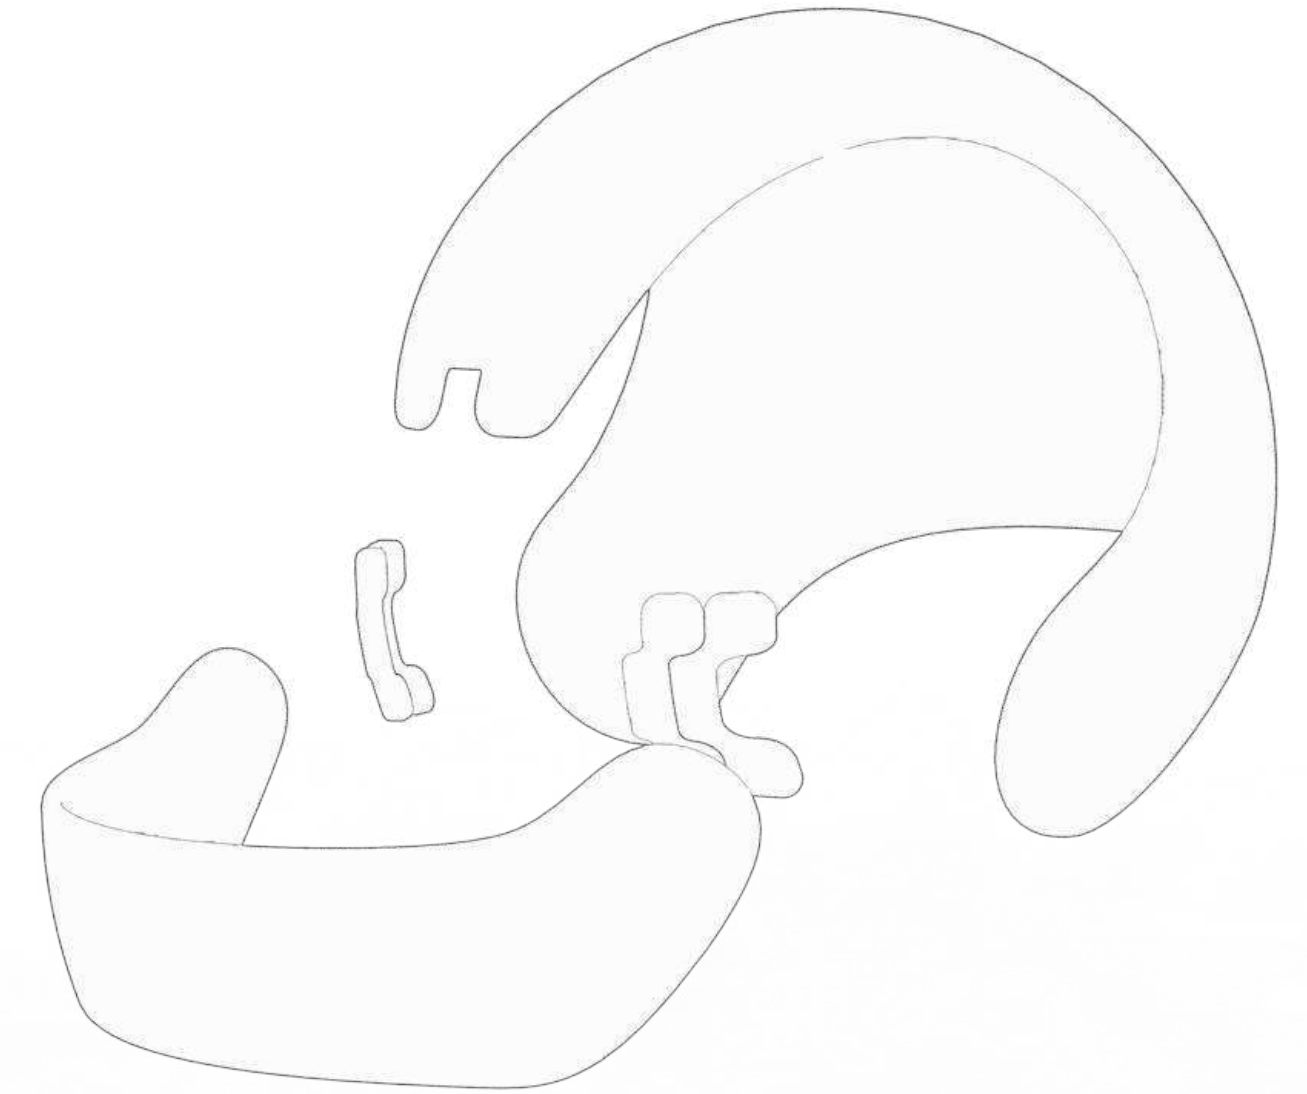

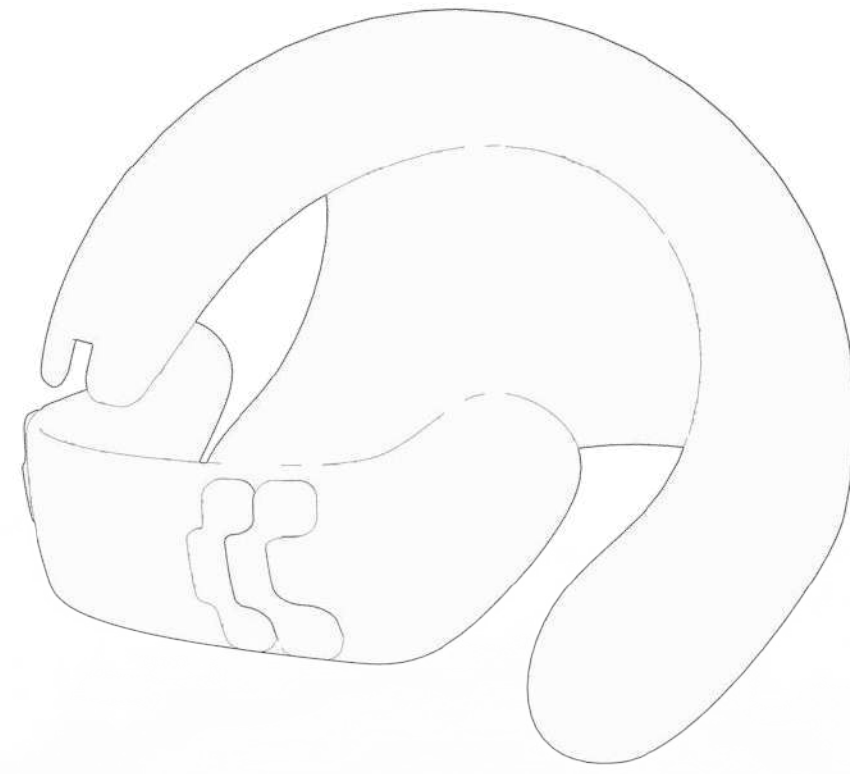

## Statement

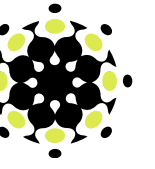

Brain Electrical Signal Collector:

Transforming the power of thought into tangible energy, your wisdom, lighting up the world in an instant.

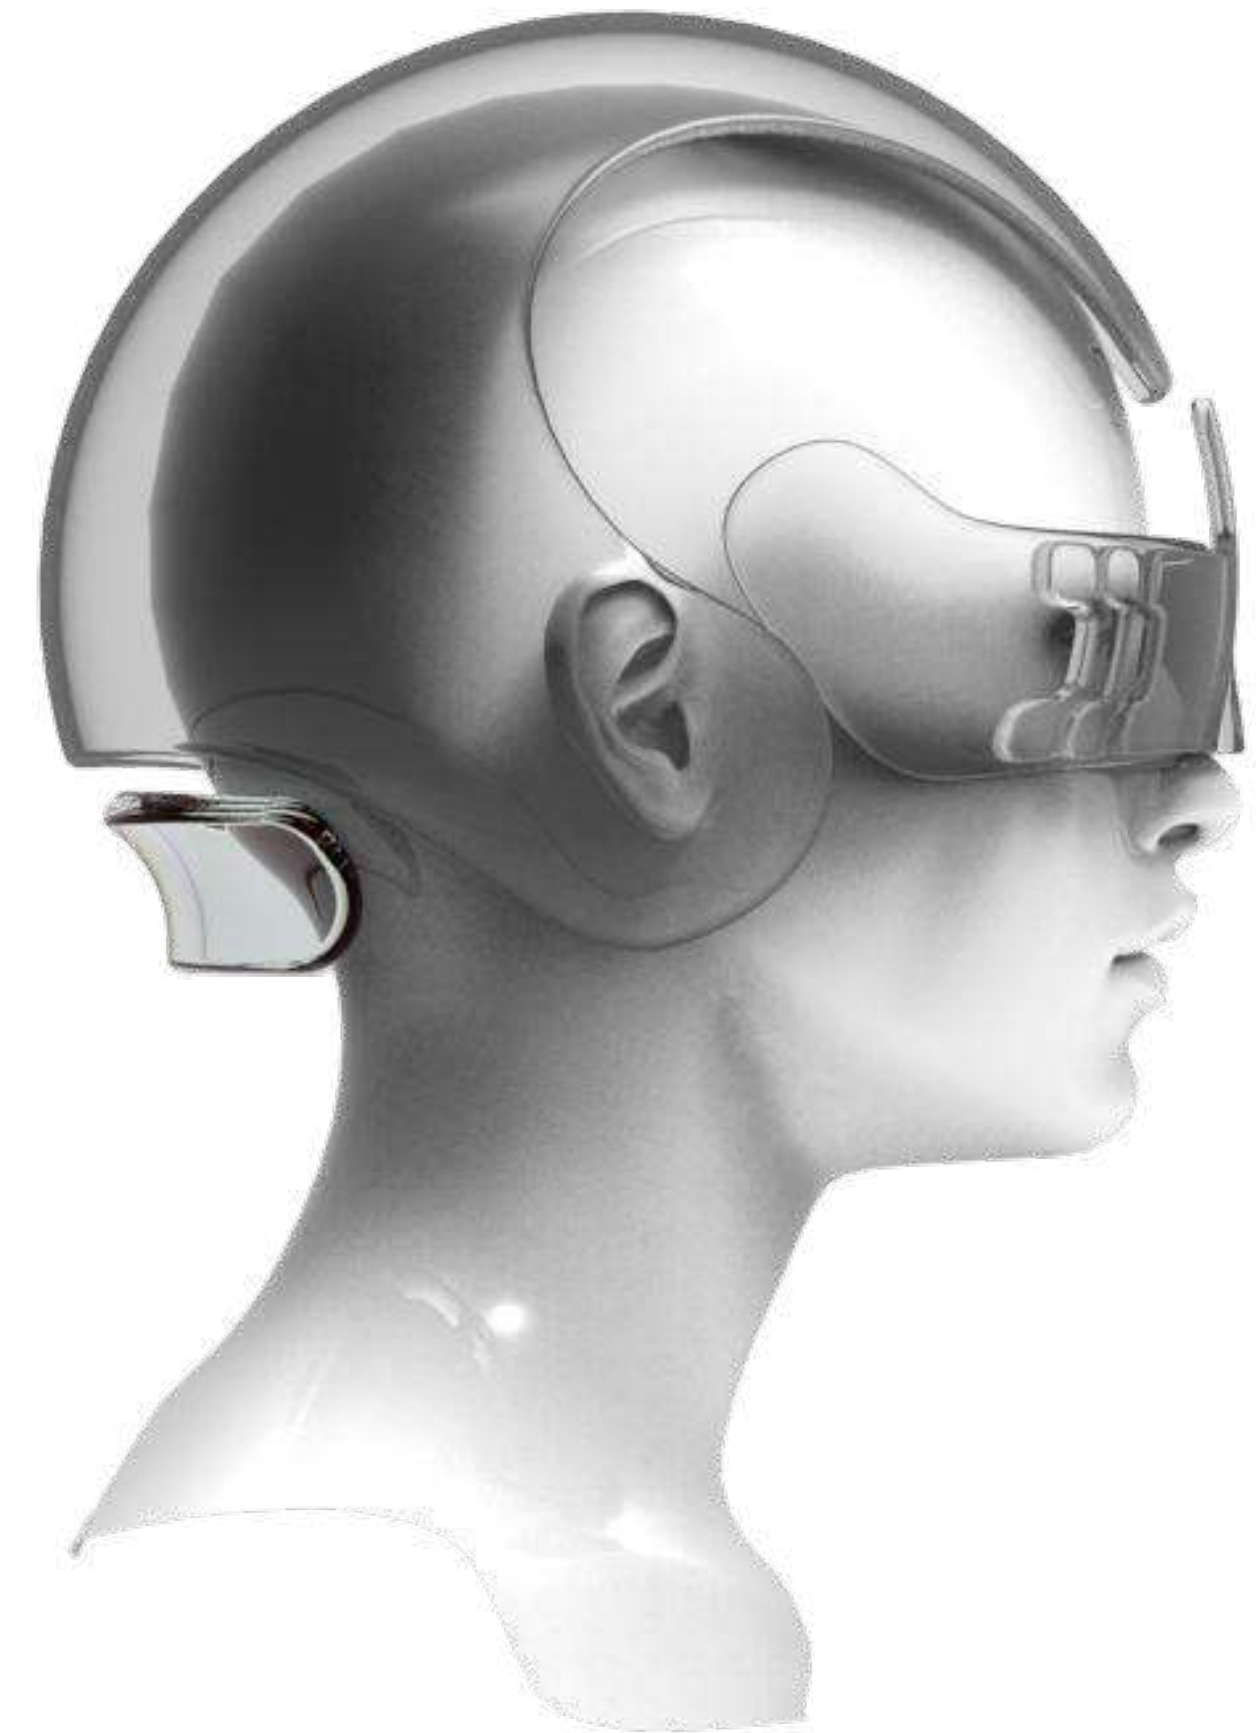

3.0  
Product-3

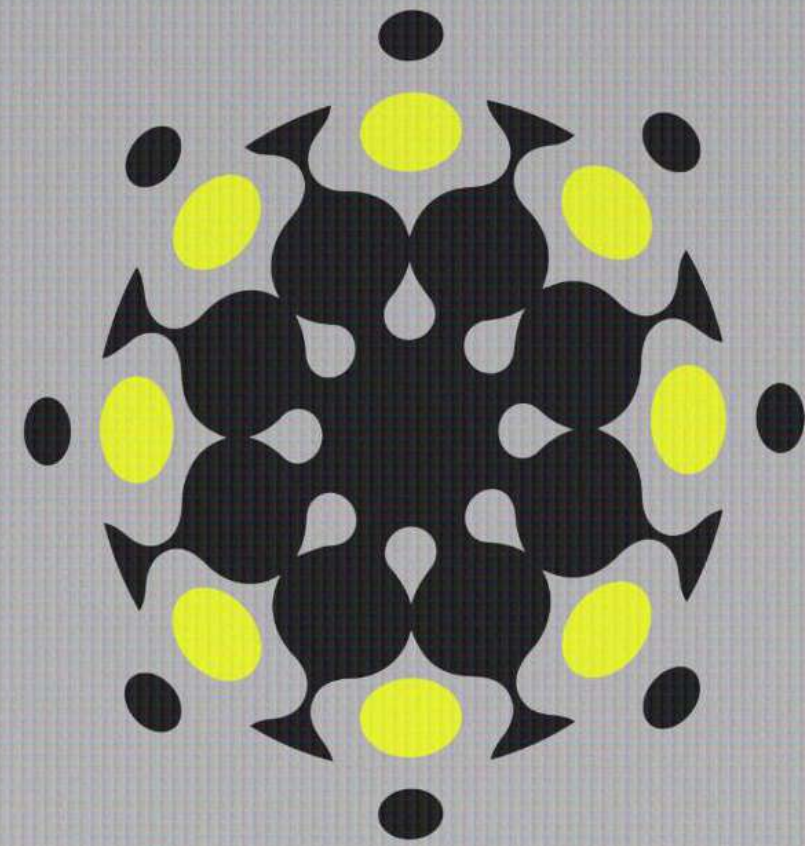

### Brain Electrical Signal Collector:

We have designed an innovative brain electrical signal collector that transforms brain activity into tangible energy. Similar to a helmet and adaptable to all head shapes, this device effectively collects the electric signals generated by thoughts and converts them into electricity. While reading, learning, or solving problems, your mental activity is captured and converted into energy by this device, which can be stored or used directly.

# 3.0 Main Function

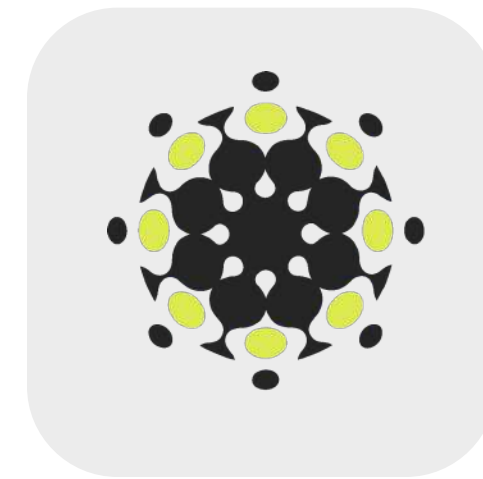

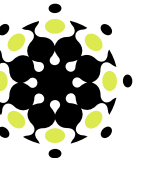

## Introduction

Our newly launched app is a one-stop tool for our company's energy providers and collectors. It offers real-time tracking of energy collection, facilitates vibrant community interactions, and provides an integrated step-by-step guide for the energy collection process. With this user-friendly app, energy collection is made easy as we join together to power the future.

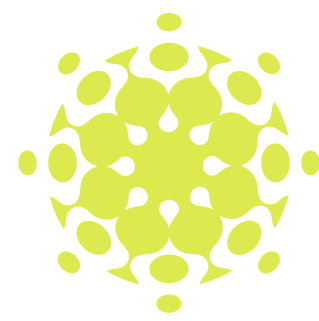

## 1.0 Brief Intor

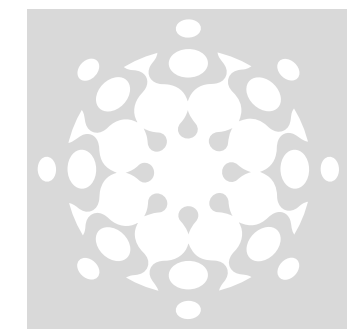

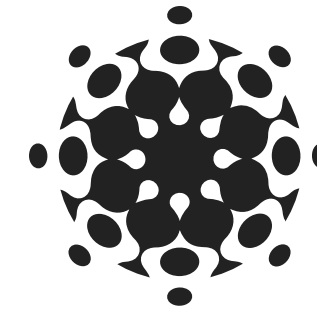

The color applied in our APP strictly follows our brand color. To ensure consistency and brand recognition, we incorporate this color into the design of all elements. More so, this color symbolizes our brand spirit and corporate culture, representing our mission and values.

#DCEA4F

The font used in our APP is Outfit. This font complements our brand style, provides an aesthetically pleasing visual effect, and maintains high readability. The design of the Outfit font is unique and has a strong visual impact, making it highly suitable for digital interfaces. Likewise, this font is applied not only in headers but also in main content areas and menus. To bring rich text layers and unify the visual effect, it is also used in pop-ups, prompts, and feedback.

## 2.1 Color & Typography

## Page Template

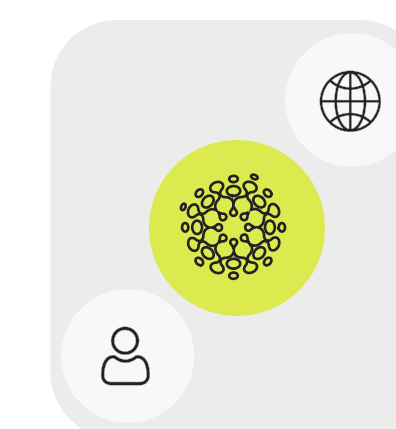

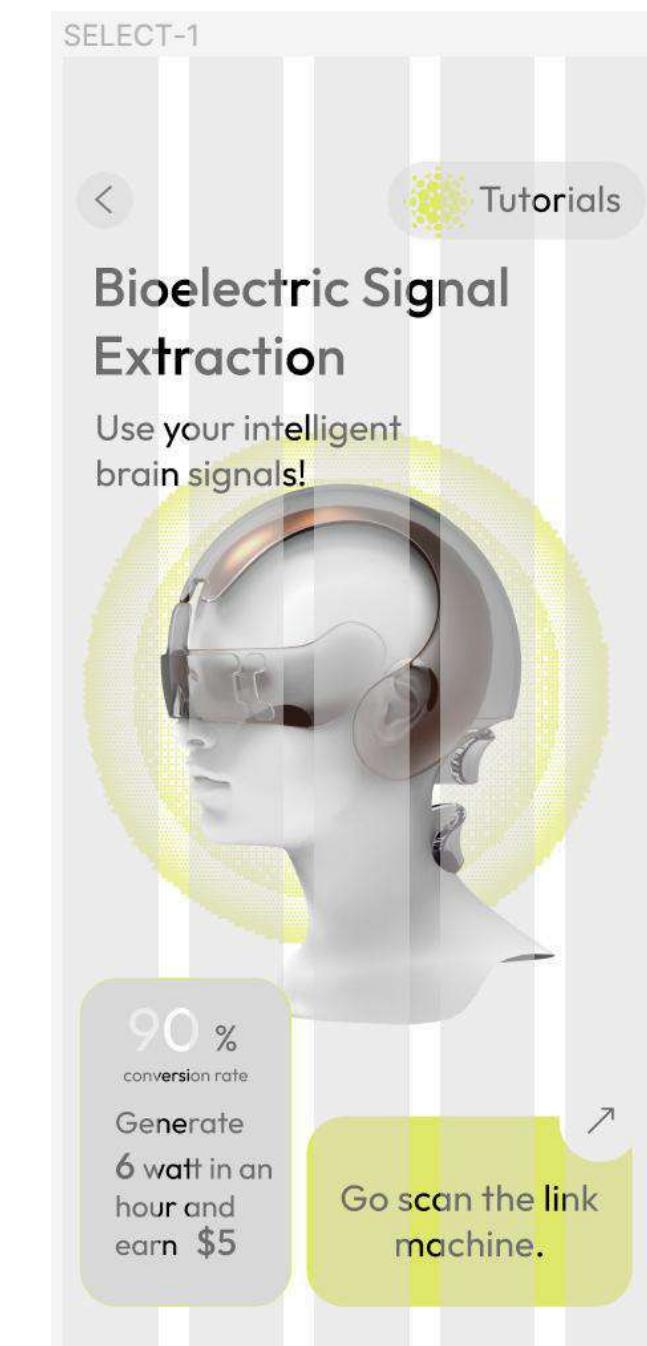

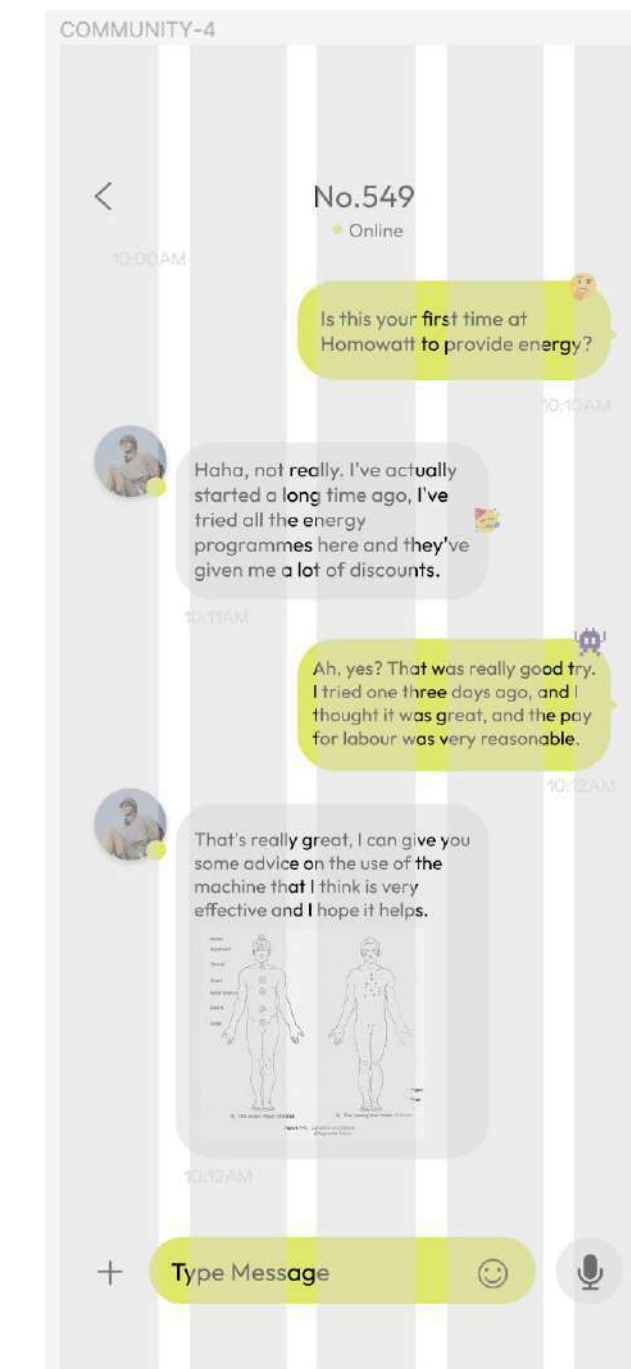

The page template in our APP provides design consistency and usability. Here's a brief explanation:

**Header:** It includes back button, page title, and action keys, designed in accordance with our brand image.

**Main Content:** Contains various elements like text, images, buttons. The use of brand color and font ensures consistency.

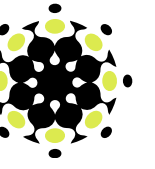

**Footer:** Houses feature keys, notifications, personal settings, aligned with our brand design.

**Note:** User experience is prioritized in our design, with emphasis on clarity and simplicity.

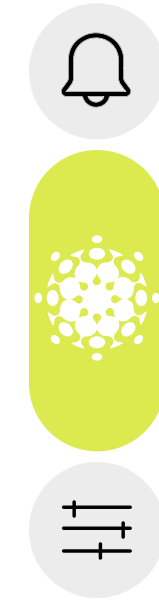

## 2.2 Page Template

## Button

Buttons act as an integral tool in our interface, guiding user interaction and responses. Their design is focused around our brand's color palette and typography, ensuring consistency. They're strategically placed based on their function and importance, whether it's for a call to action or a navigational prompt. As a rule, they always provide clear, concise instructions to streamline and enhance the user experience.

## Personal Information

We see your efforts. In the personal information section, every bit of energy you collect is accumulated and displayed, showing you your contributions and progress. This feature allows you to perceive your growth in real-time, making every effort traceable and filling you with a sense of accomplishment and pride.

## 3.0 Main Function

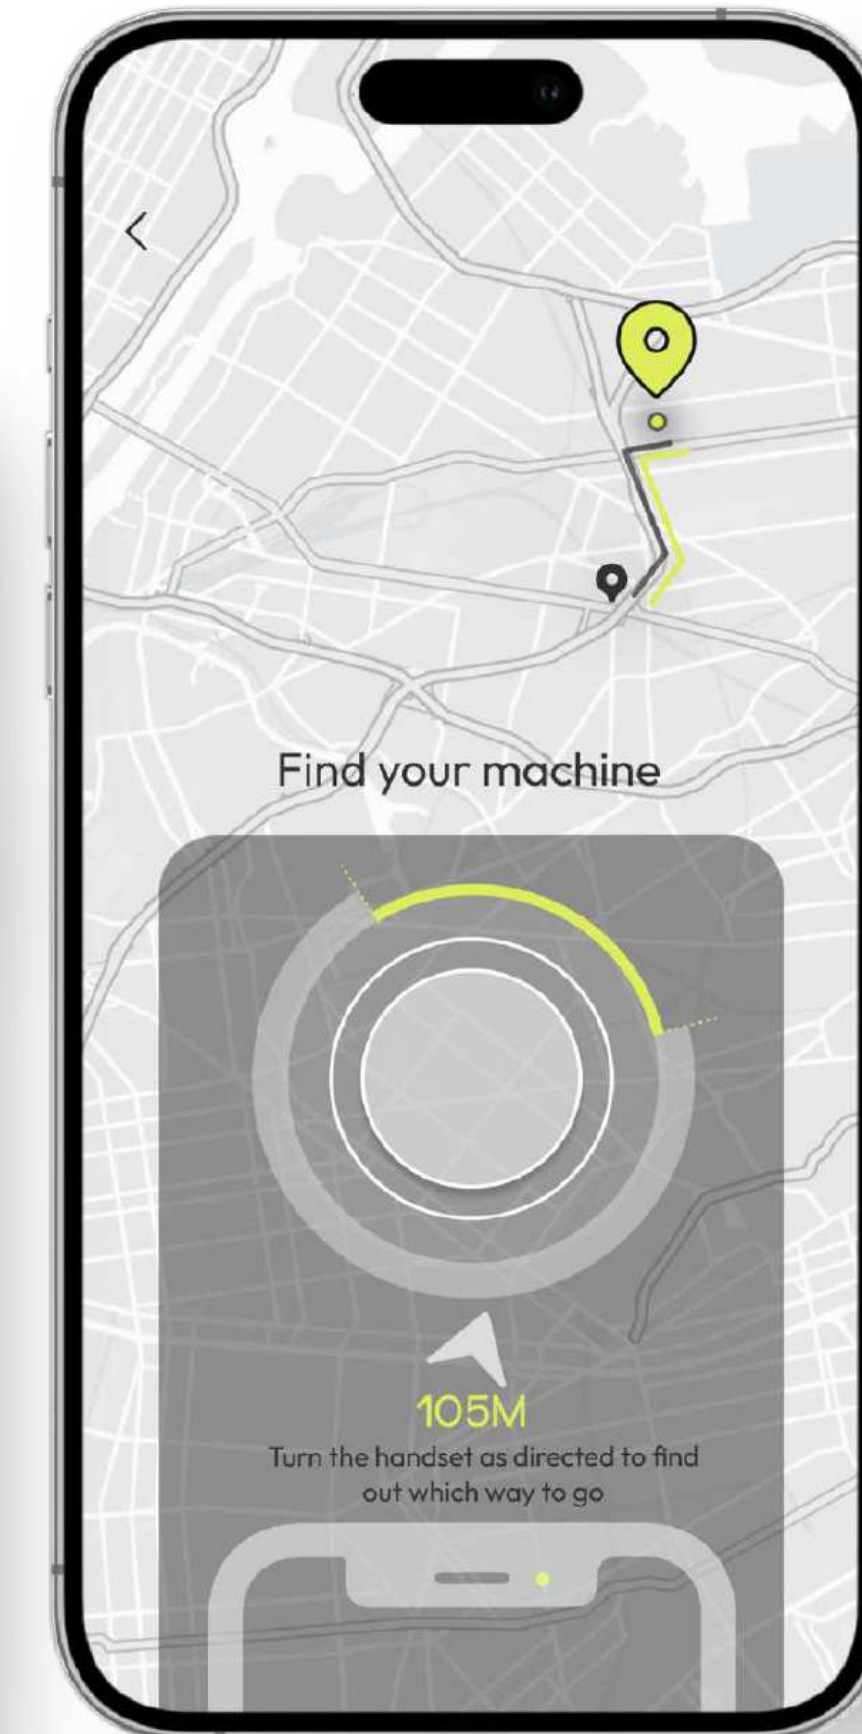

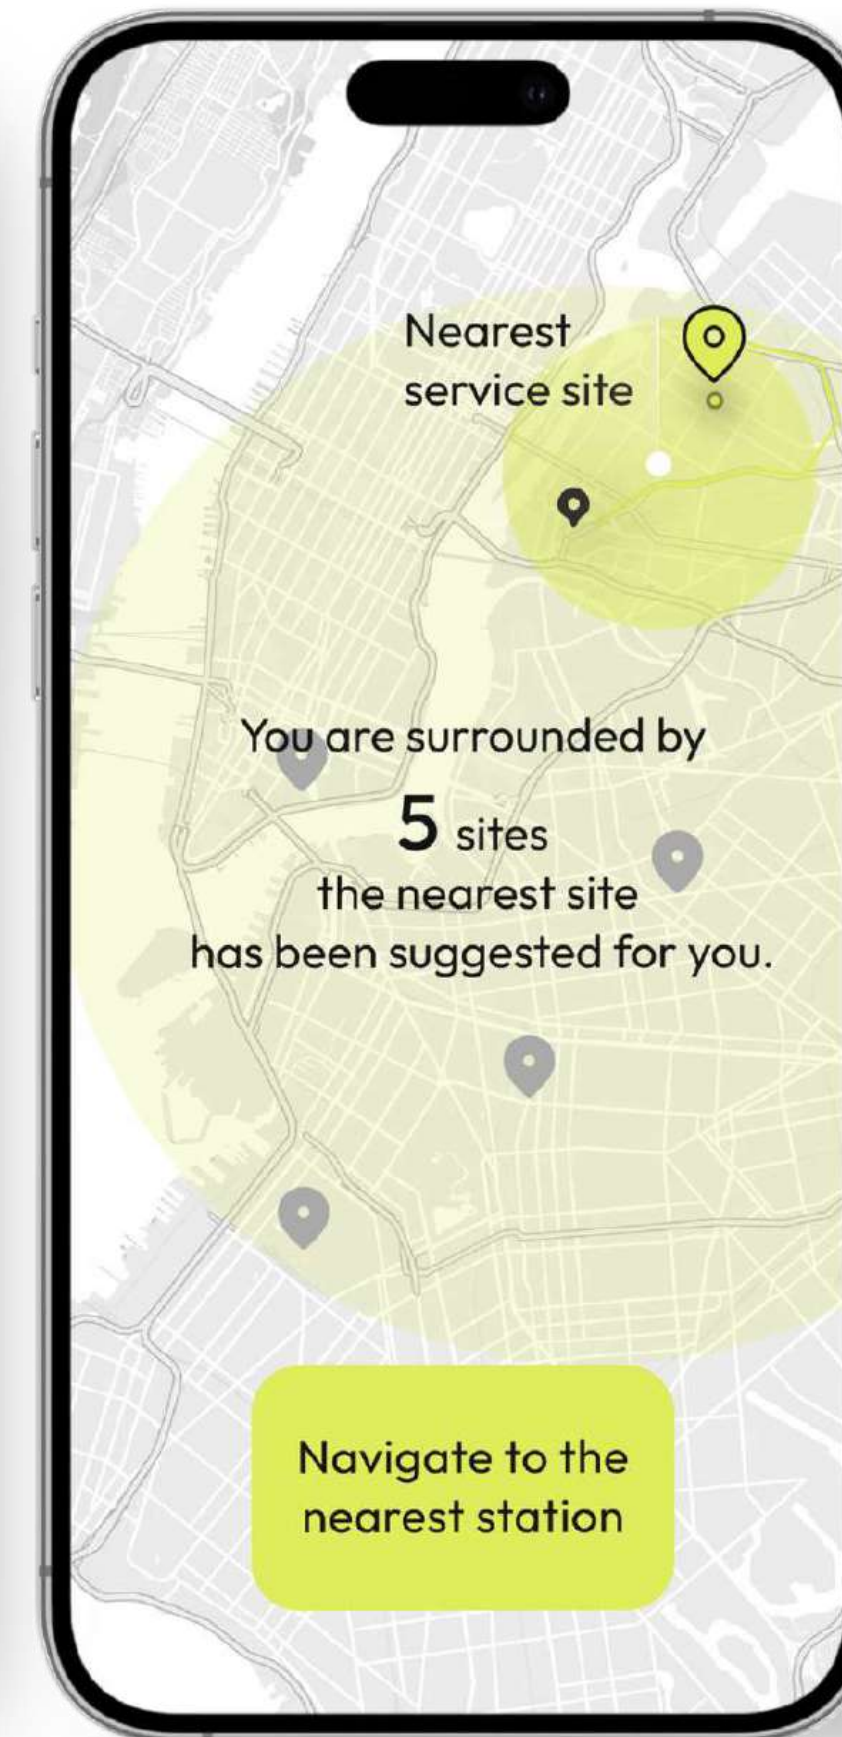

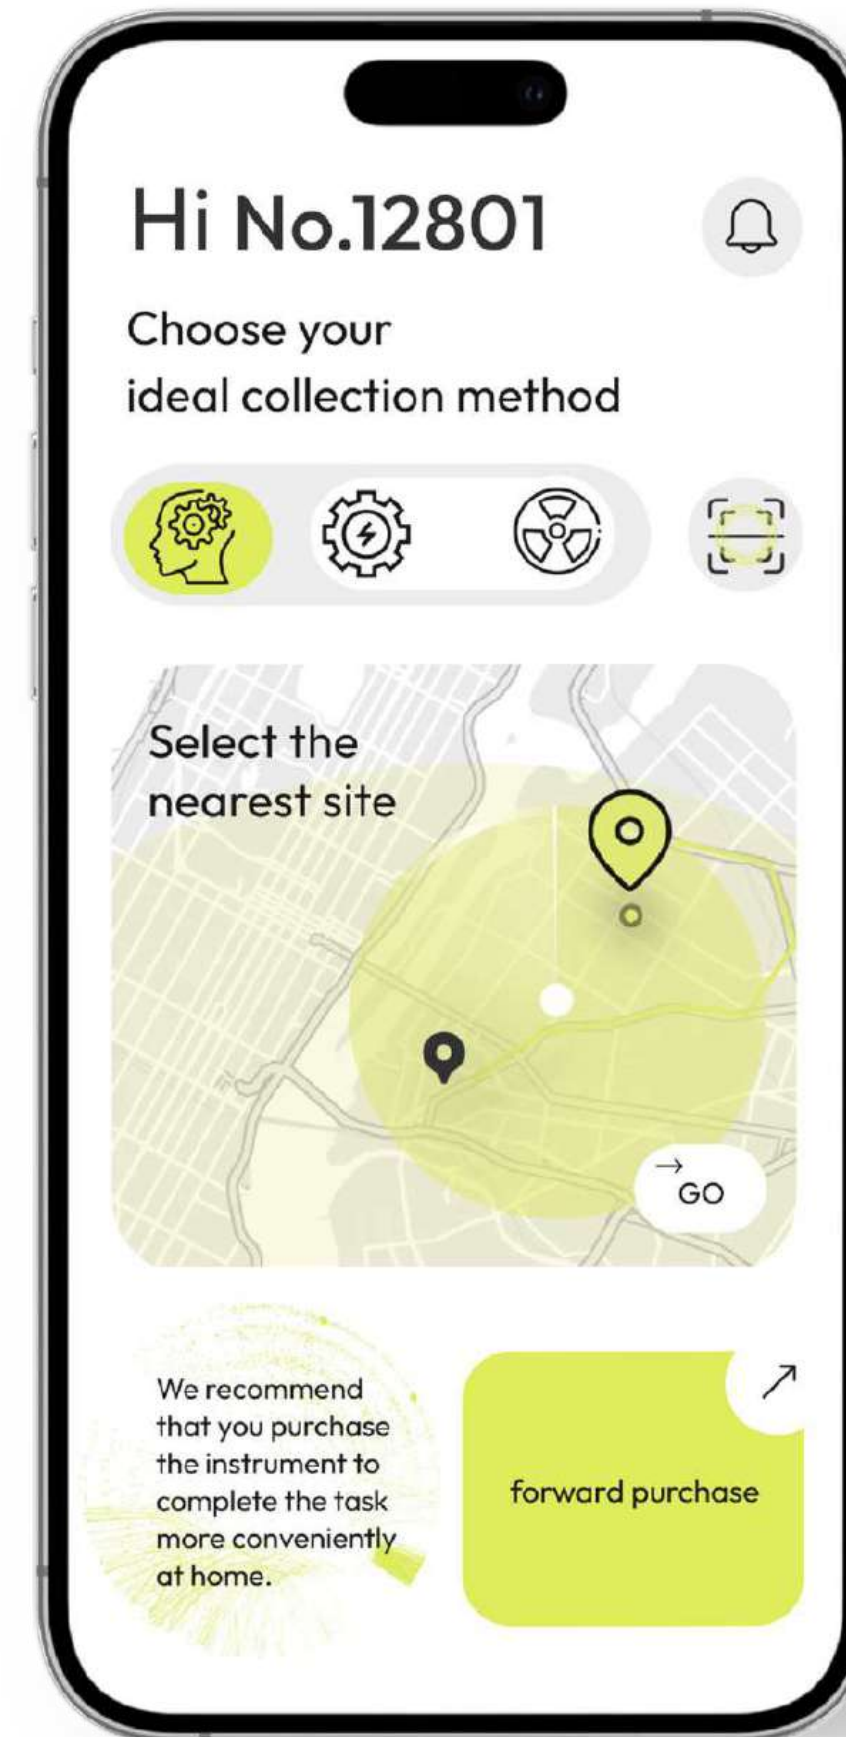

## Energy Collection

We firmly believe that for you, energy collection is not just about task completion, but also a critical channel to realize personal values and aspirations. To ensure a better experience for every energy collector, we provide a comprehensive and user-friendly energy collection process:

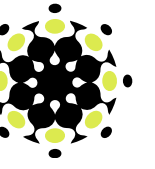

- **Map Navigation:** Our App contains a precise map navigation feature, clearly showing the relationship between your position and the device's. Even in unfamiliar environments, you can easily locate the target device.

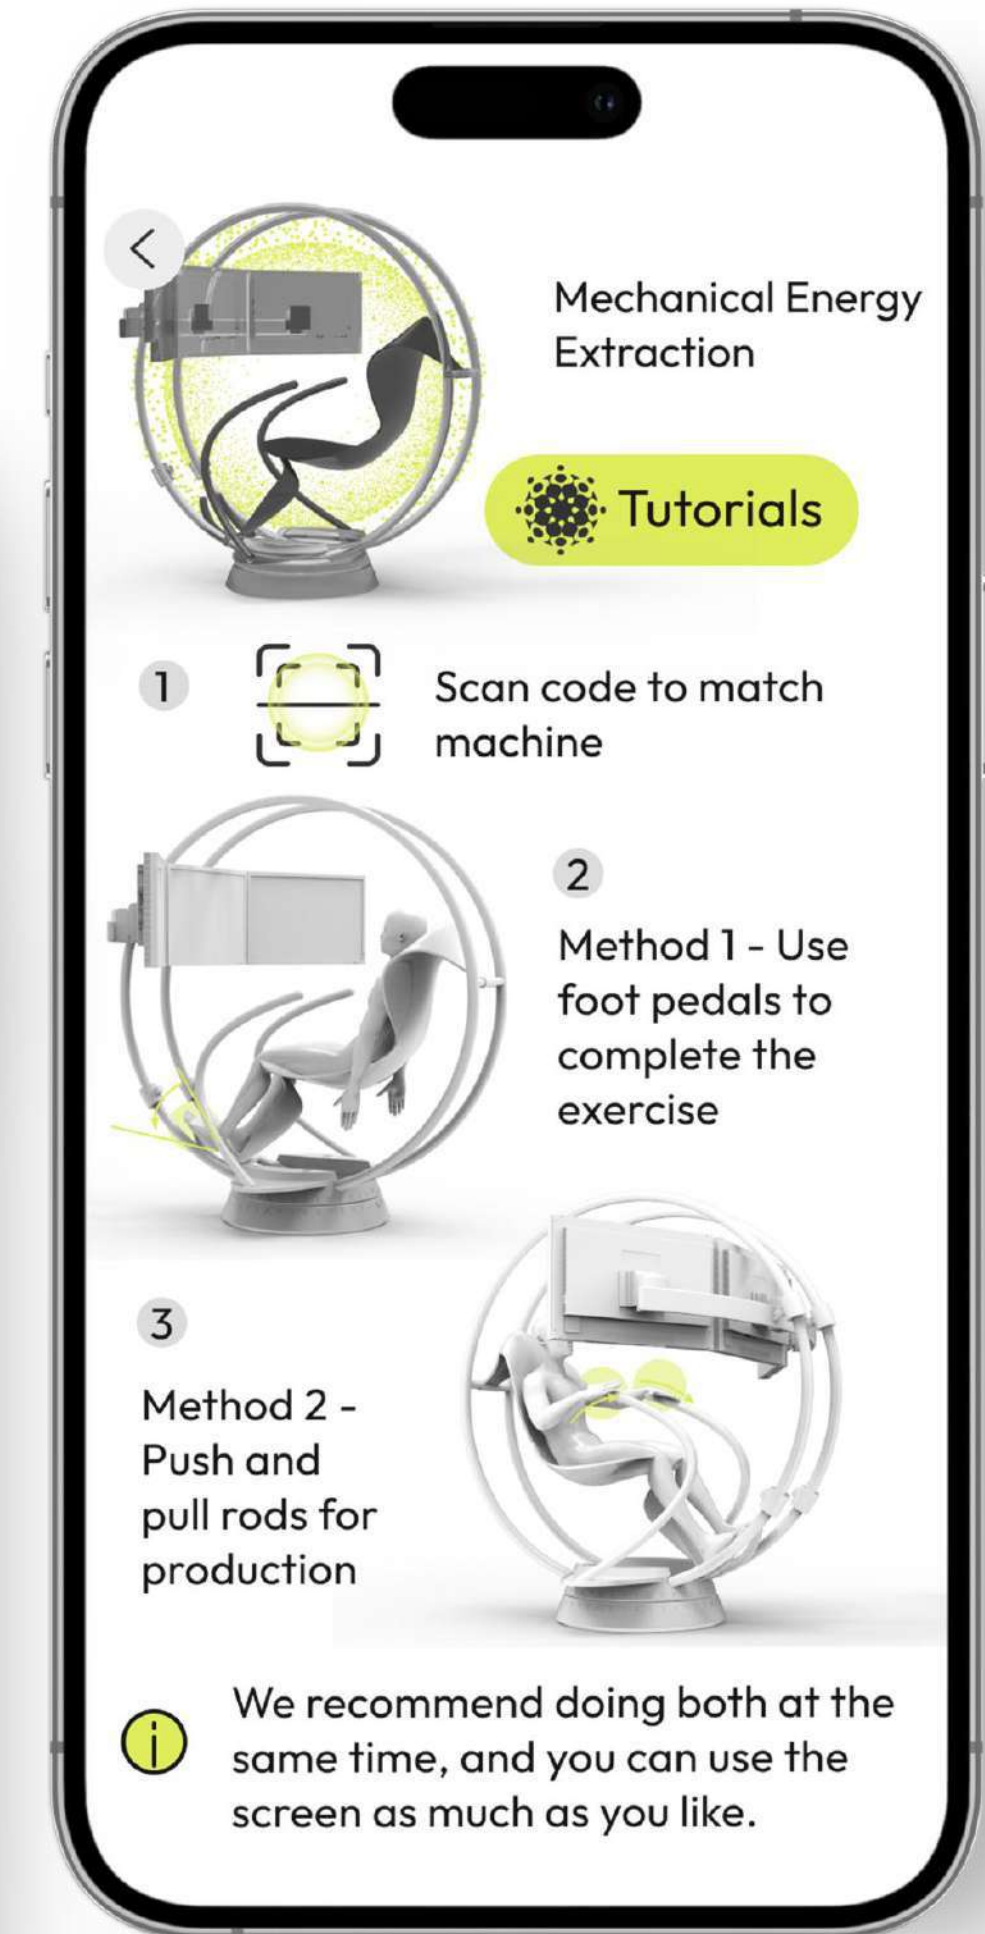

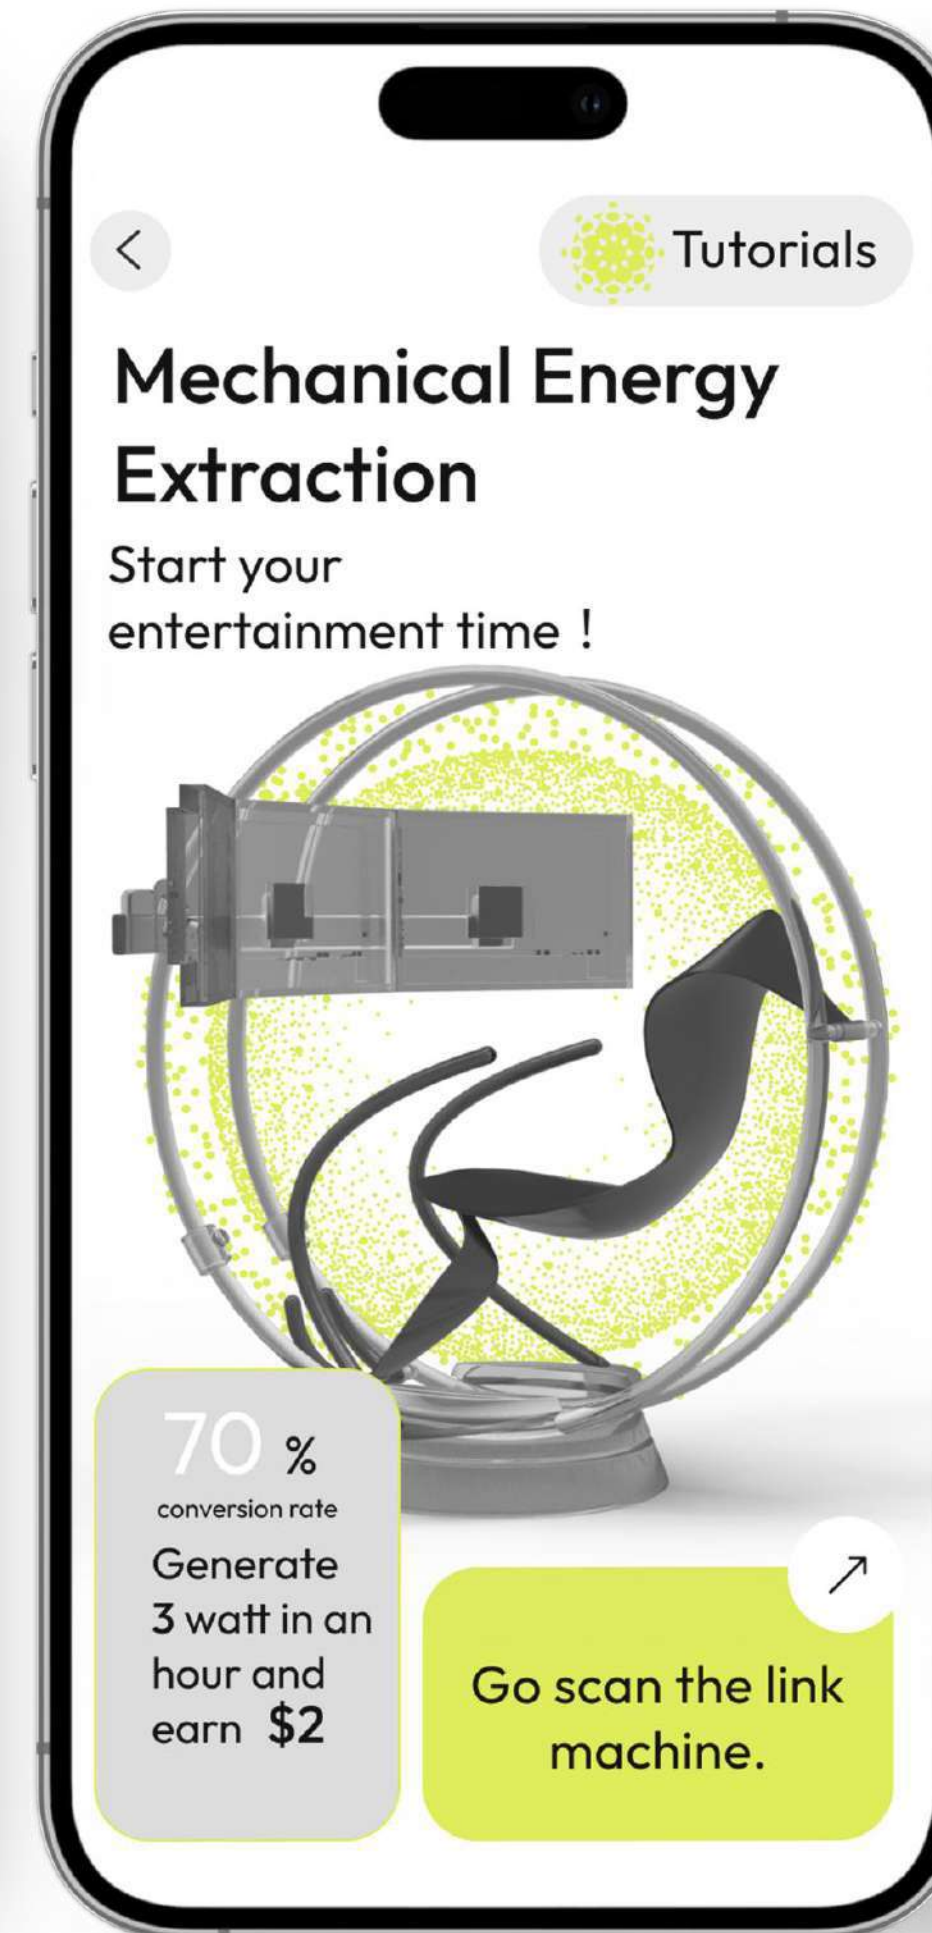

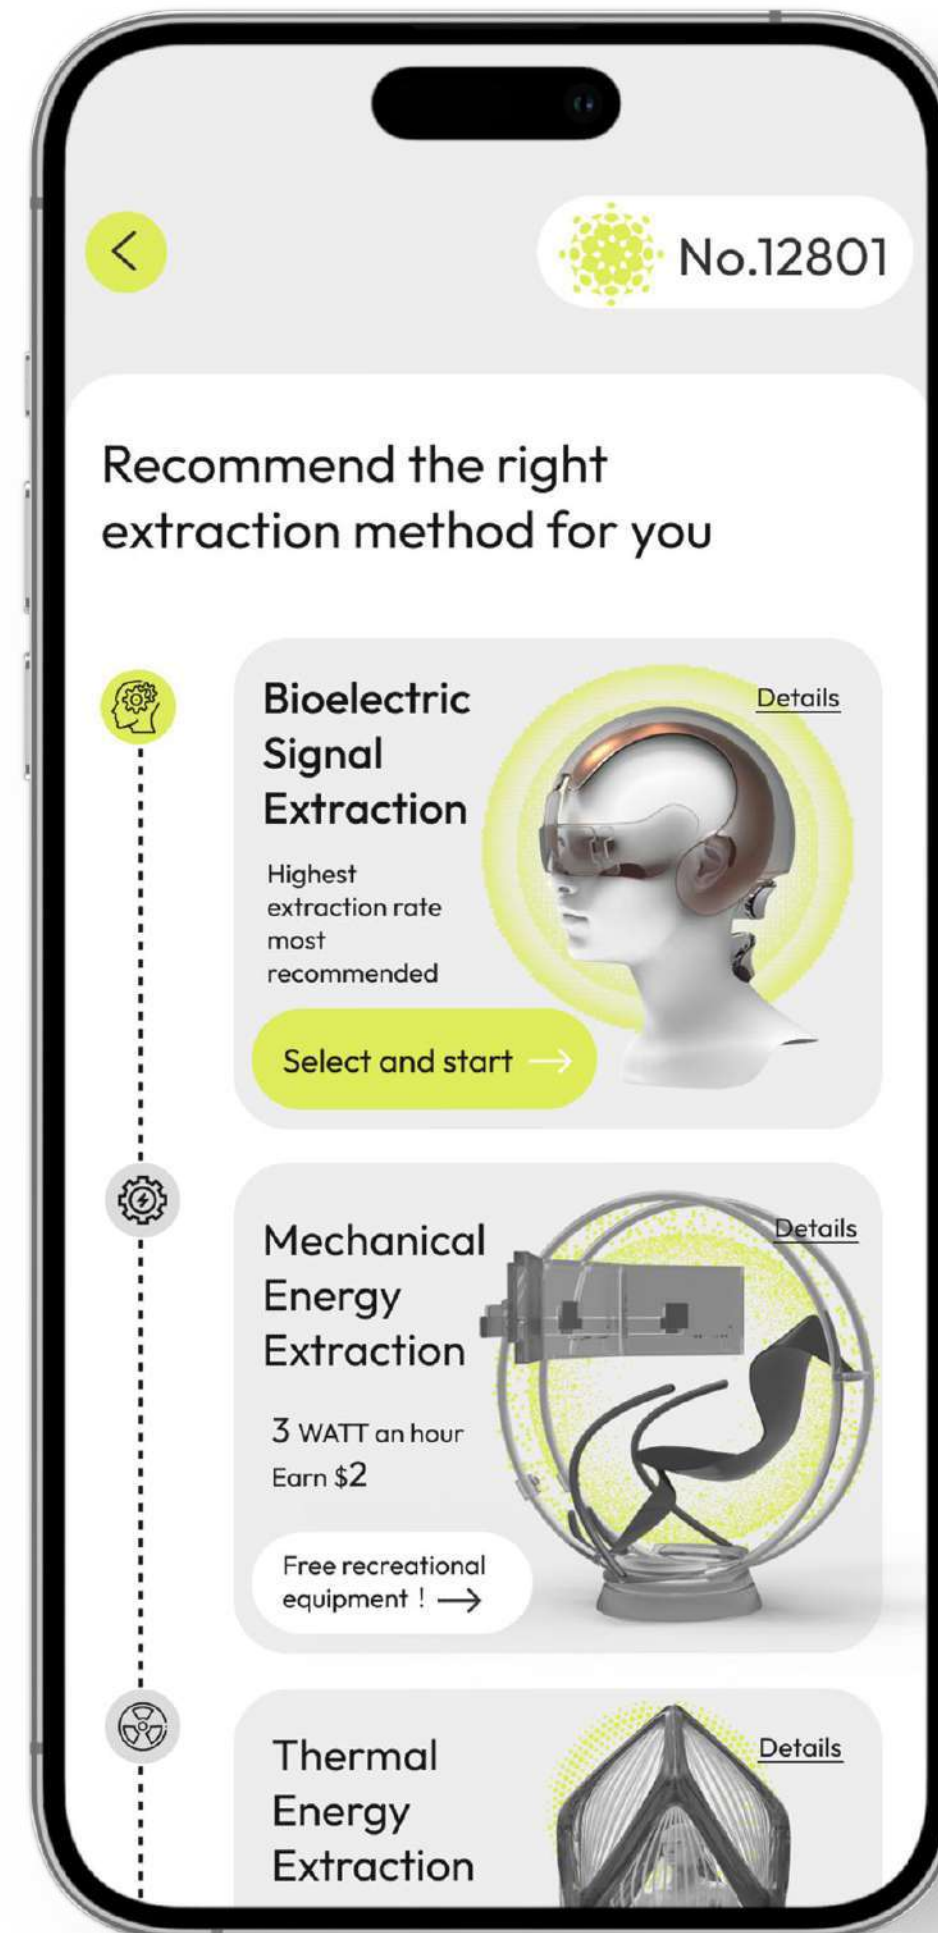

- **Arrival Recognition:** Once you reach the vicinity of the device, the App will automatically recognize and switch to an arrival state. You don't have to set a location, making the journey seamless.

## 3.0 Main Function

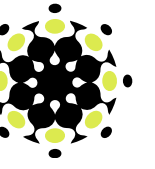

- **Machine Selection:** Inside the App, there's a clear description and condition demonstration for every device, helping you easily understand and choose the most suitable machine for energy collection.
- **Device Usage Guidance:** Once the device is connected, you'll be guided on how to use it optimally. Clear instructions and tips will be provided to ensure you can safely and efficiently collect energy.
- **Device Connection:** Connect to the device at the touch of a button. The straightforward process allows you to start collecting energy more quickly. We're always here to support and guide you.

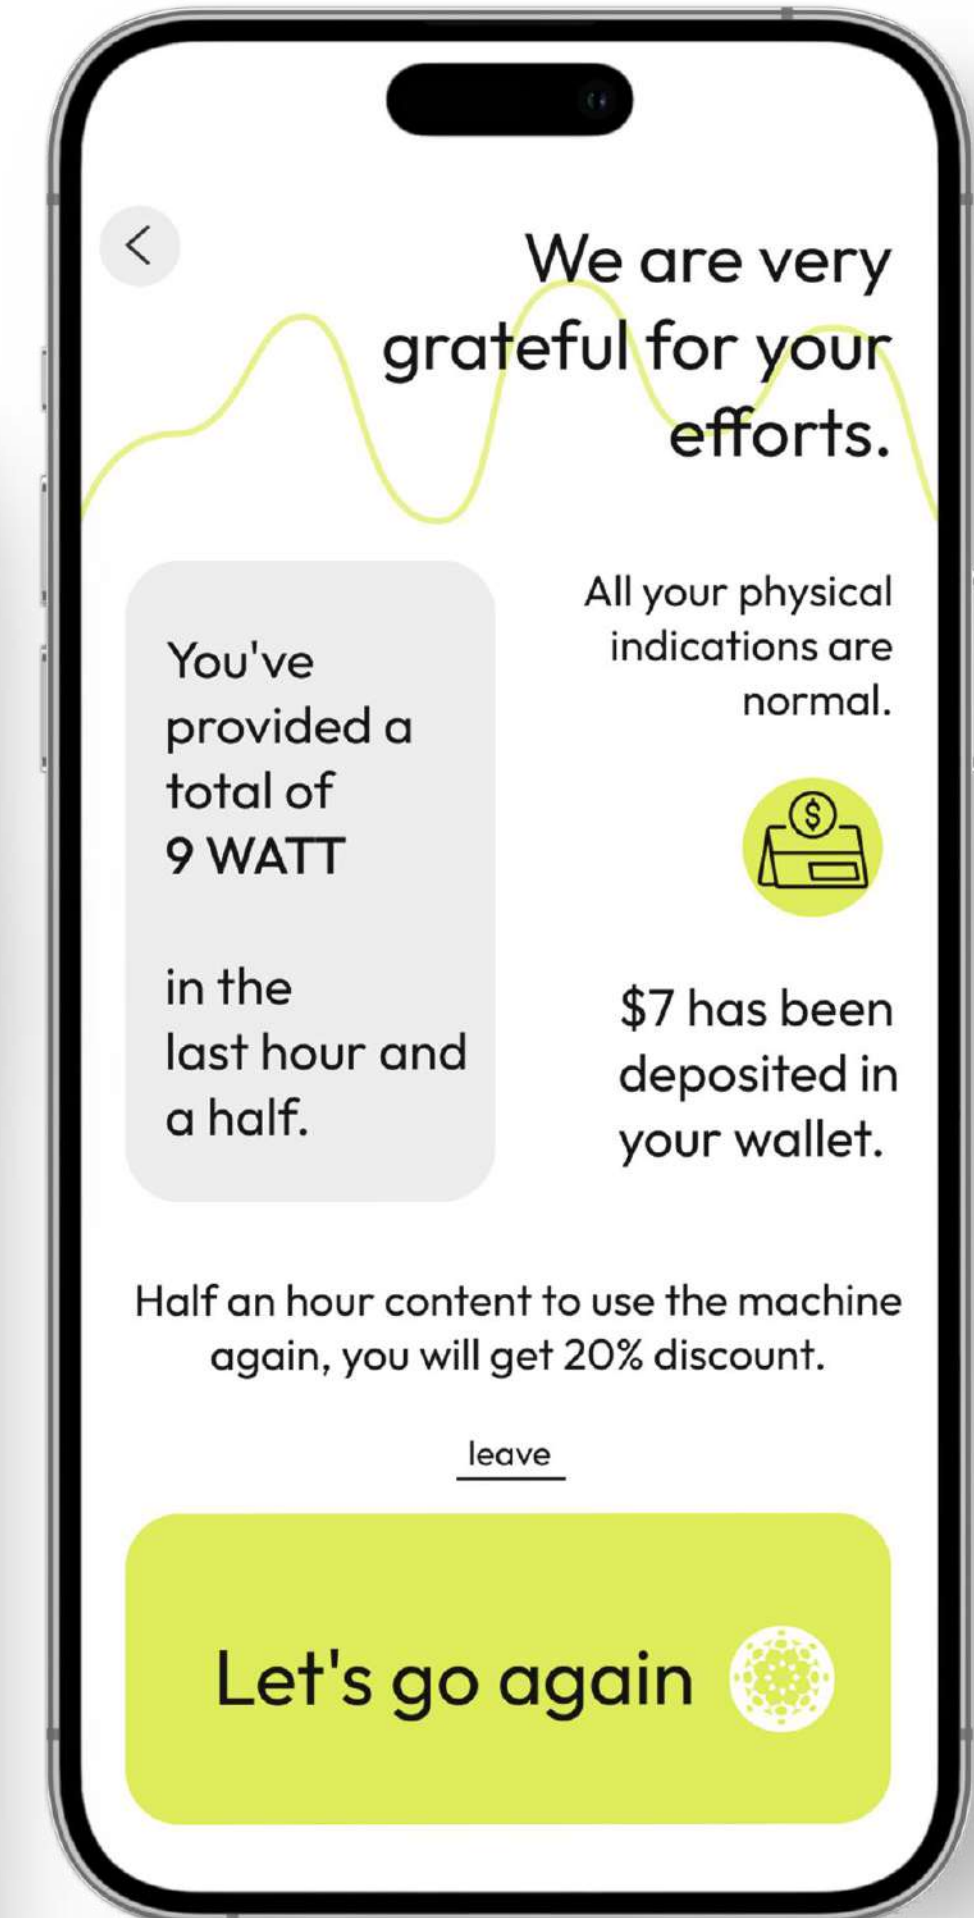

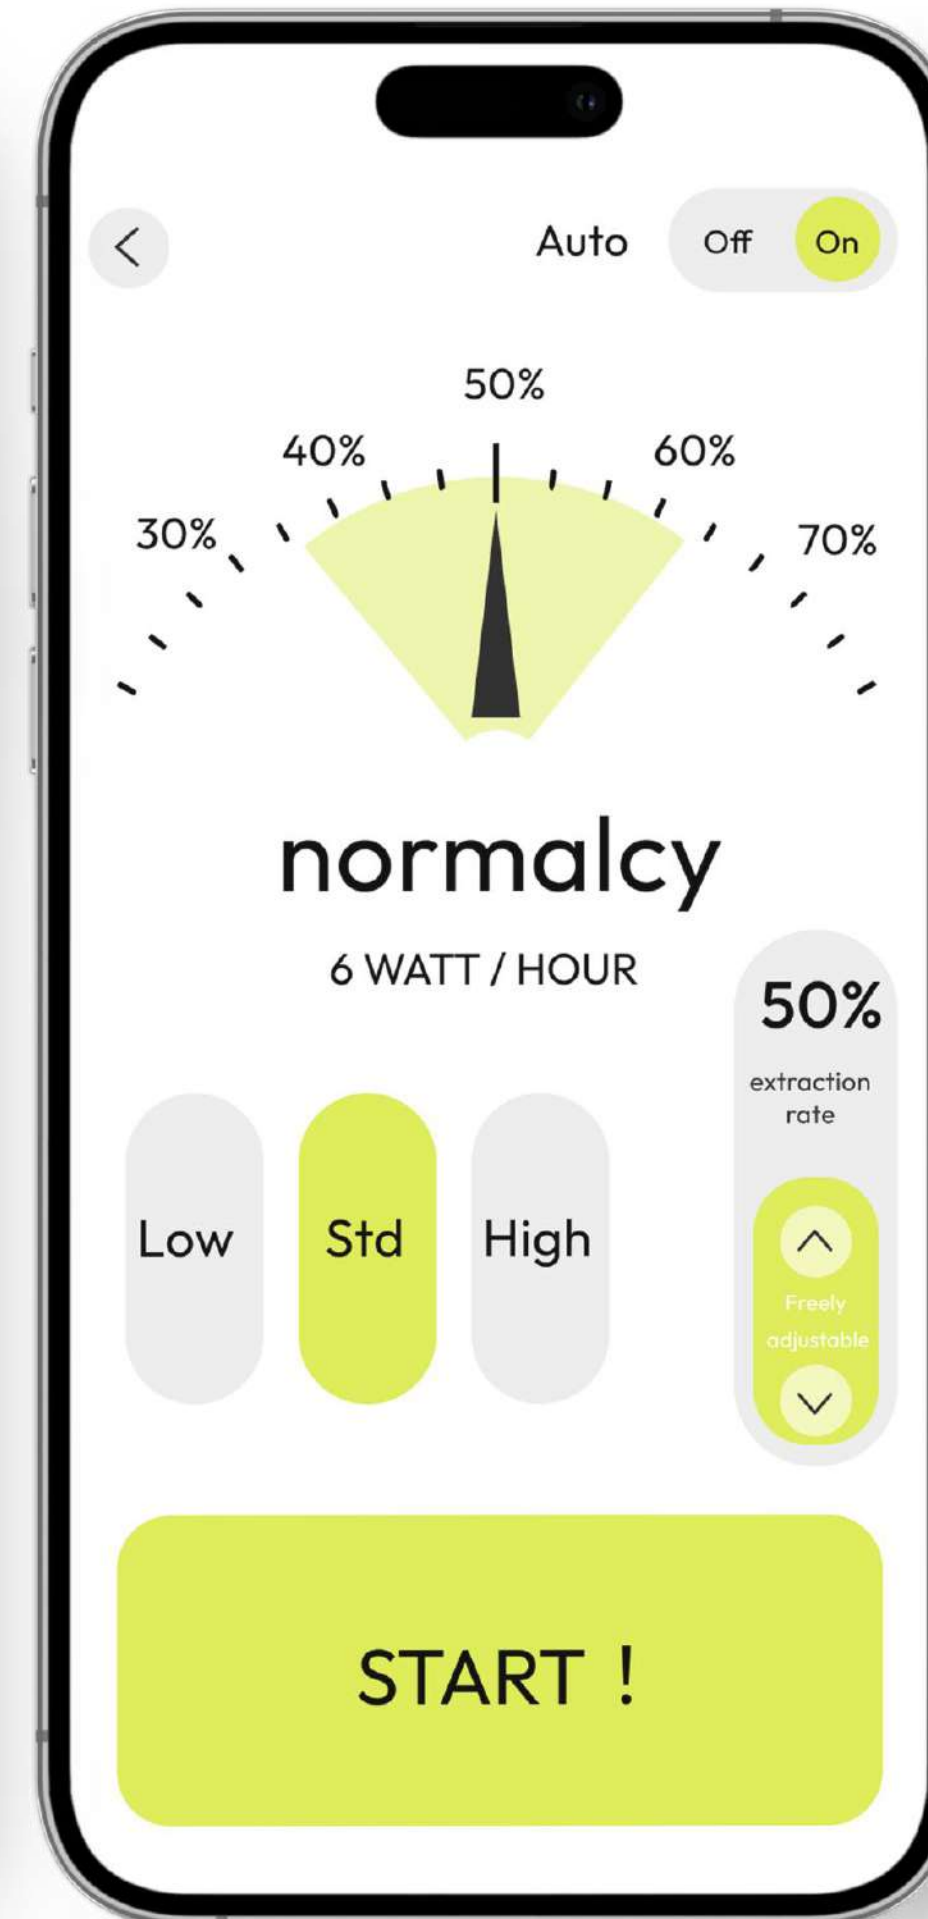

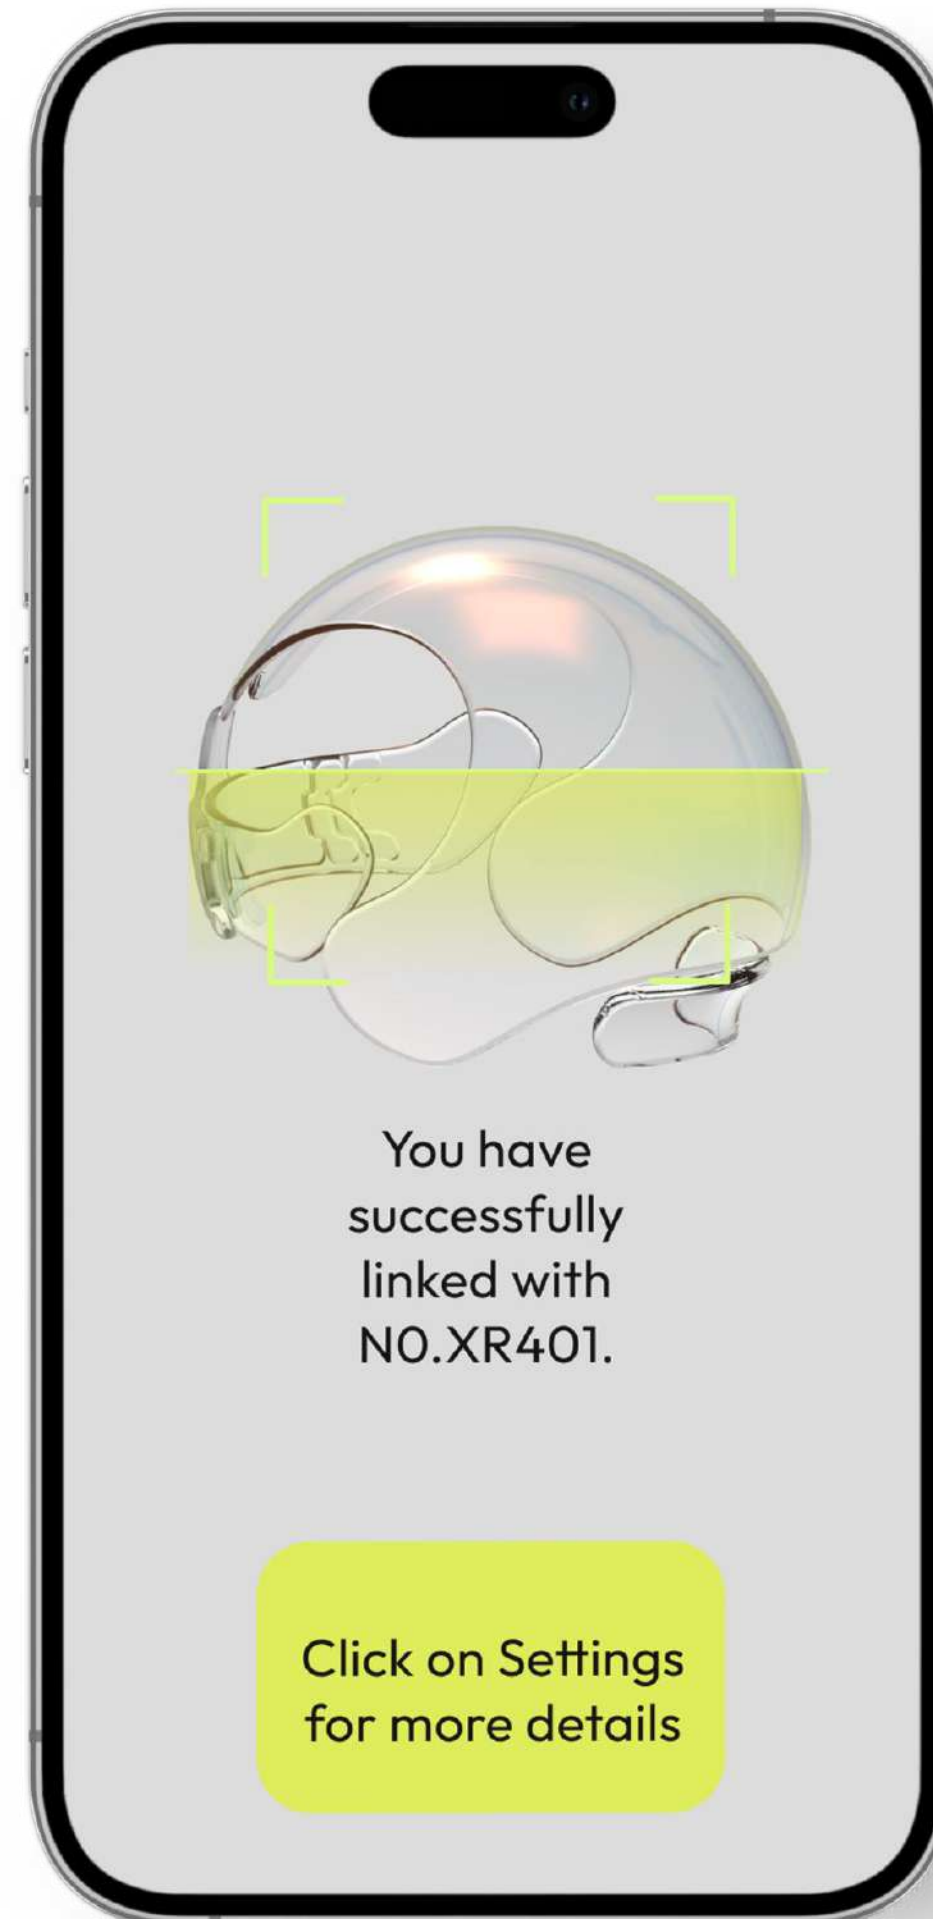

## 3.0 Main Function

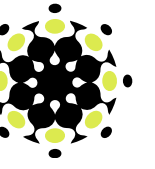

- **Device Connection:** Connect to the device at the touch of a button. The straightforward process allows you to start collecting energy more quickly. We're always here to support and guide you.
- **Setup and Begin Collection:** Once the device is connected and you're comfortable with the usage, you can make personalized settings and start collecting according to your condition, making the collection more tailored to individual needs and comfort.

User guidance brochure

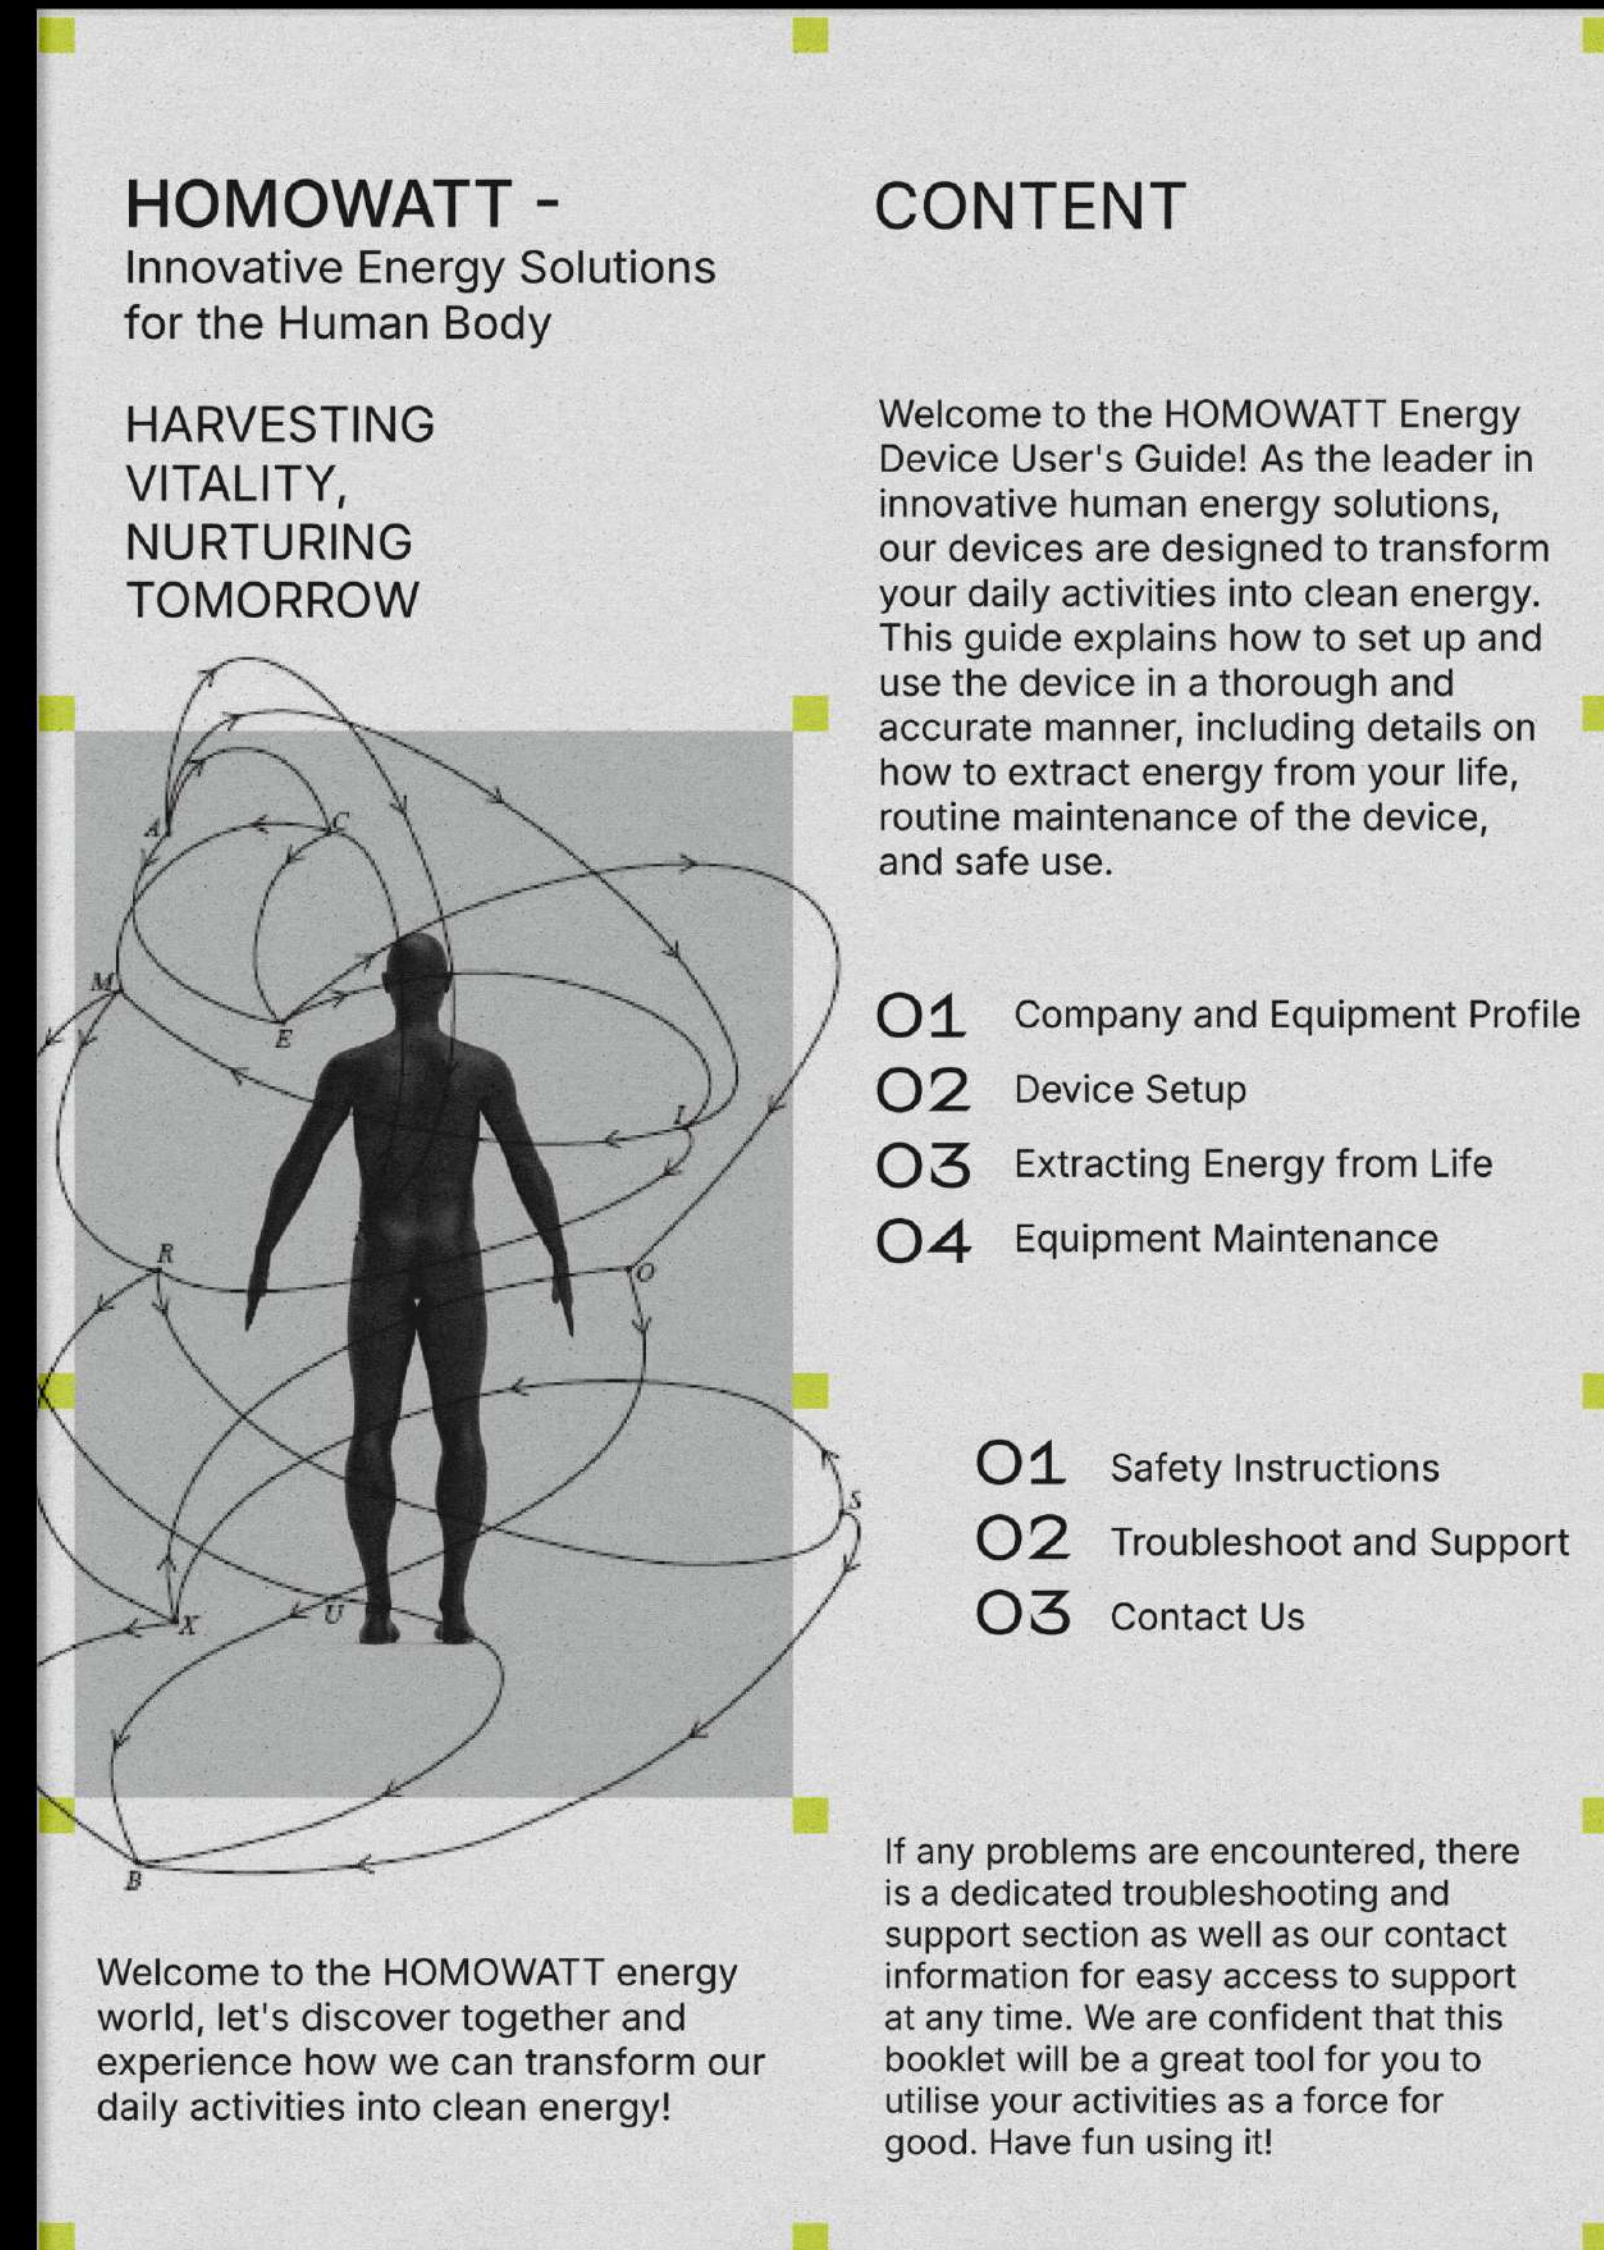

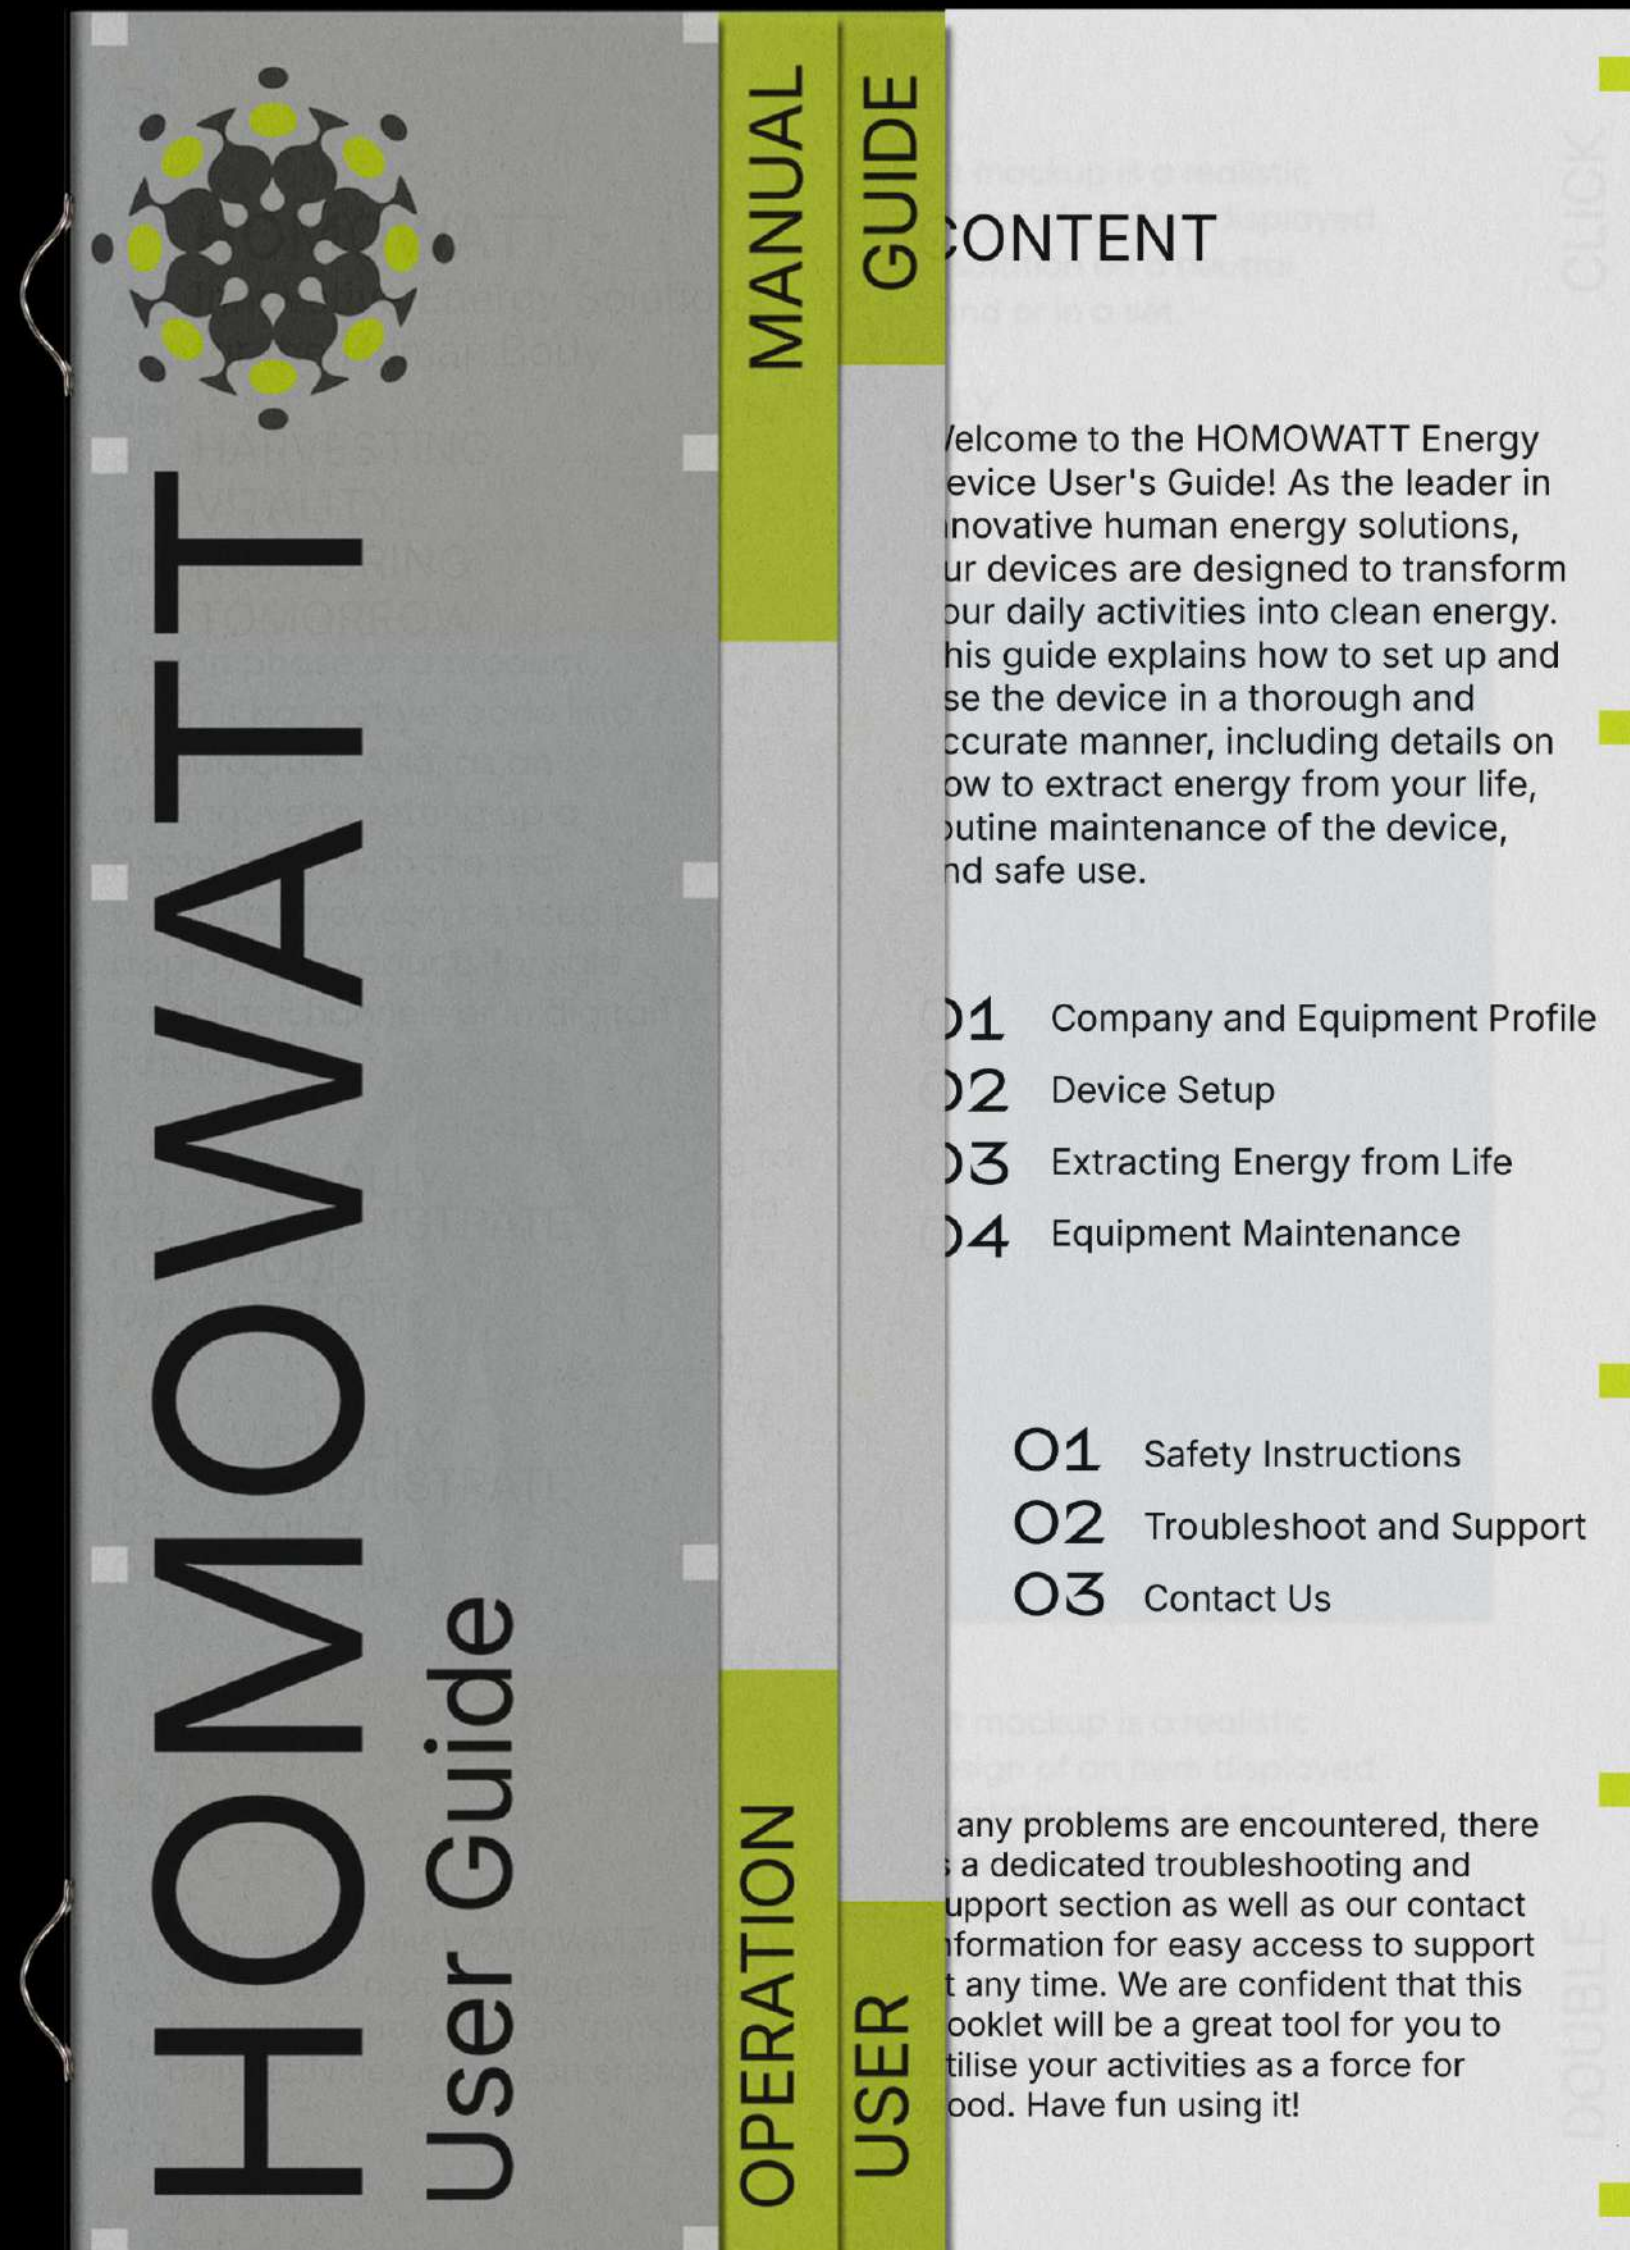

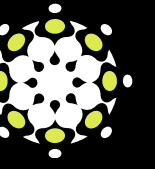

This booklet we have meticulously designed for our audience aims to provide an in-depth reveal of our company. The rich and compelling content starts with an overview of the energy depletion scenario by 2049, followed by our company's founding history.

The most intriguing section reveals a unique fact that humans could be a source of energy extraction. We further delve into three possible methods of energy extraction, and the corresponding three types of collection machines. This booklet also includes detailed instructions on the use of these machines, offering comprehensive guidance and support for users. This isn't merely a corporate document, but rather a roadmap guiding us towards the future, inviting us all to explore and innovate together.

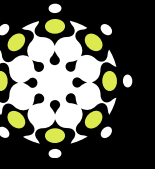

# 1.0 Brief Intro

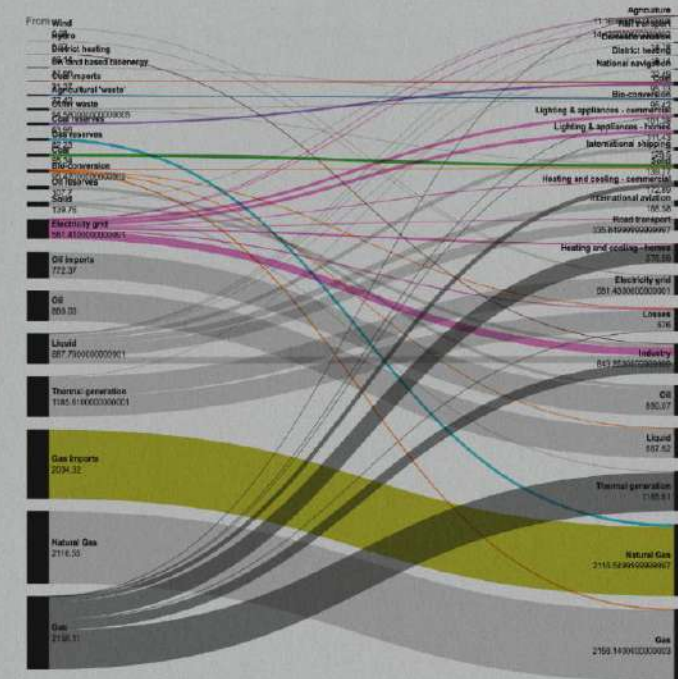

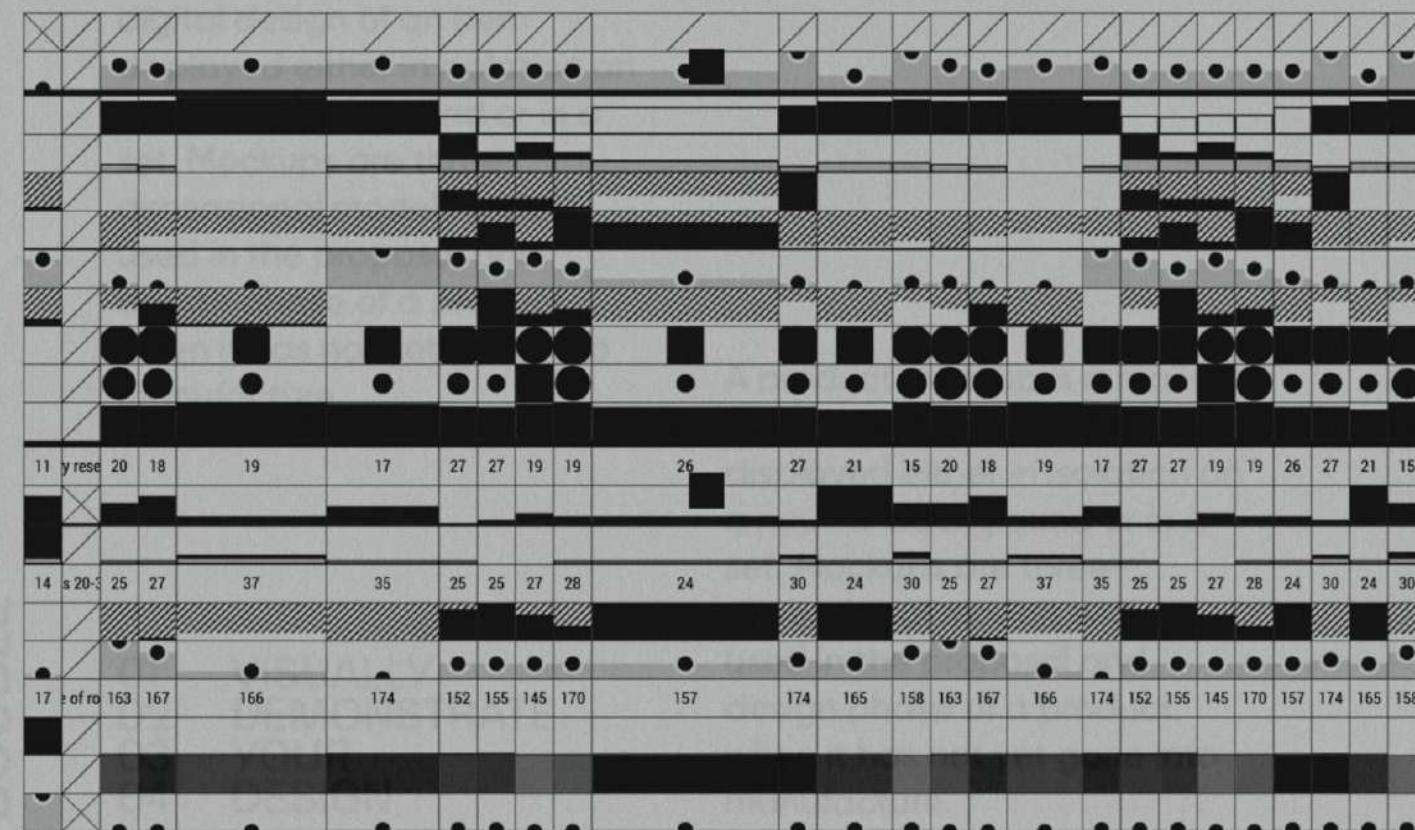

## Company Background and Origin

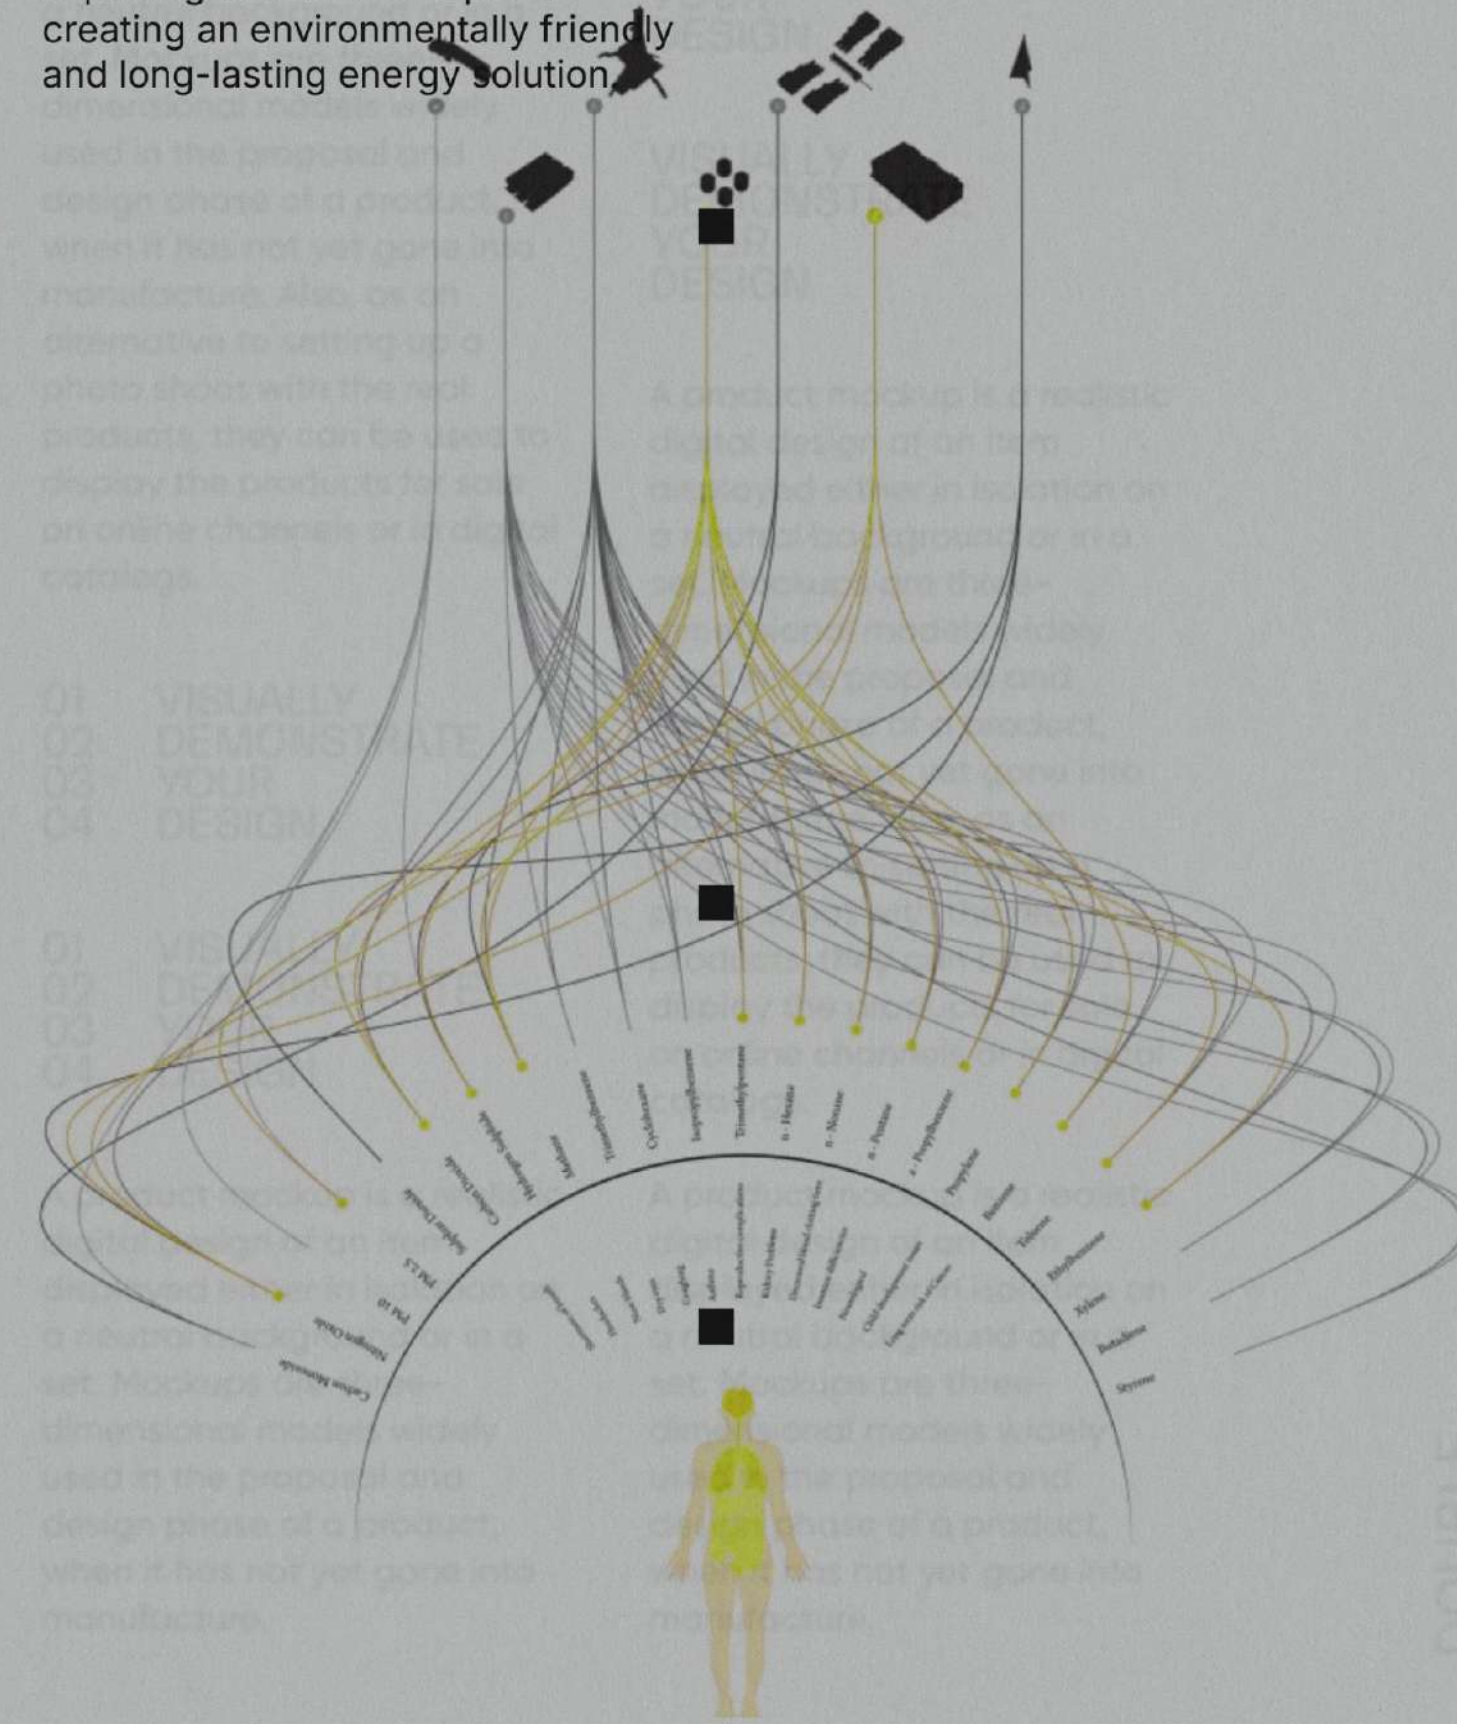

In the new century, the world had faced an unimaginable challenge - the crisis of clean energy, the world's traditional energy sources such as oil, natural gas, coal and so on have been decreasing year after year, and people's needs for environmental protection and renewable energy have become increasingly urgent. Under the persistent energy crisis and pressing environmental problems, HOMOWATT Bioenergy was born.

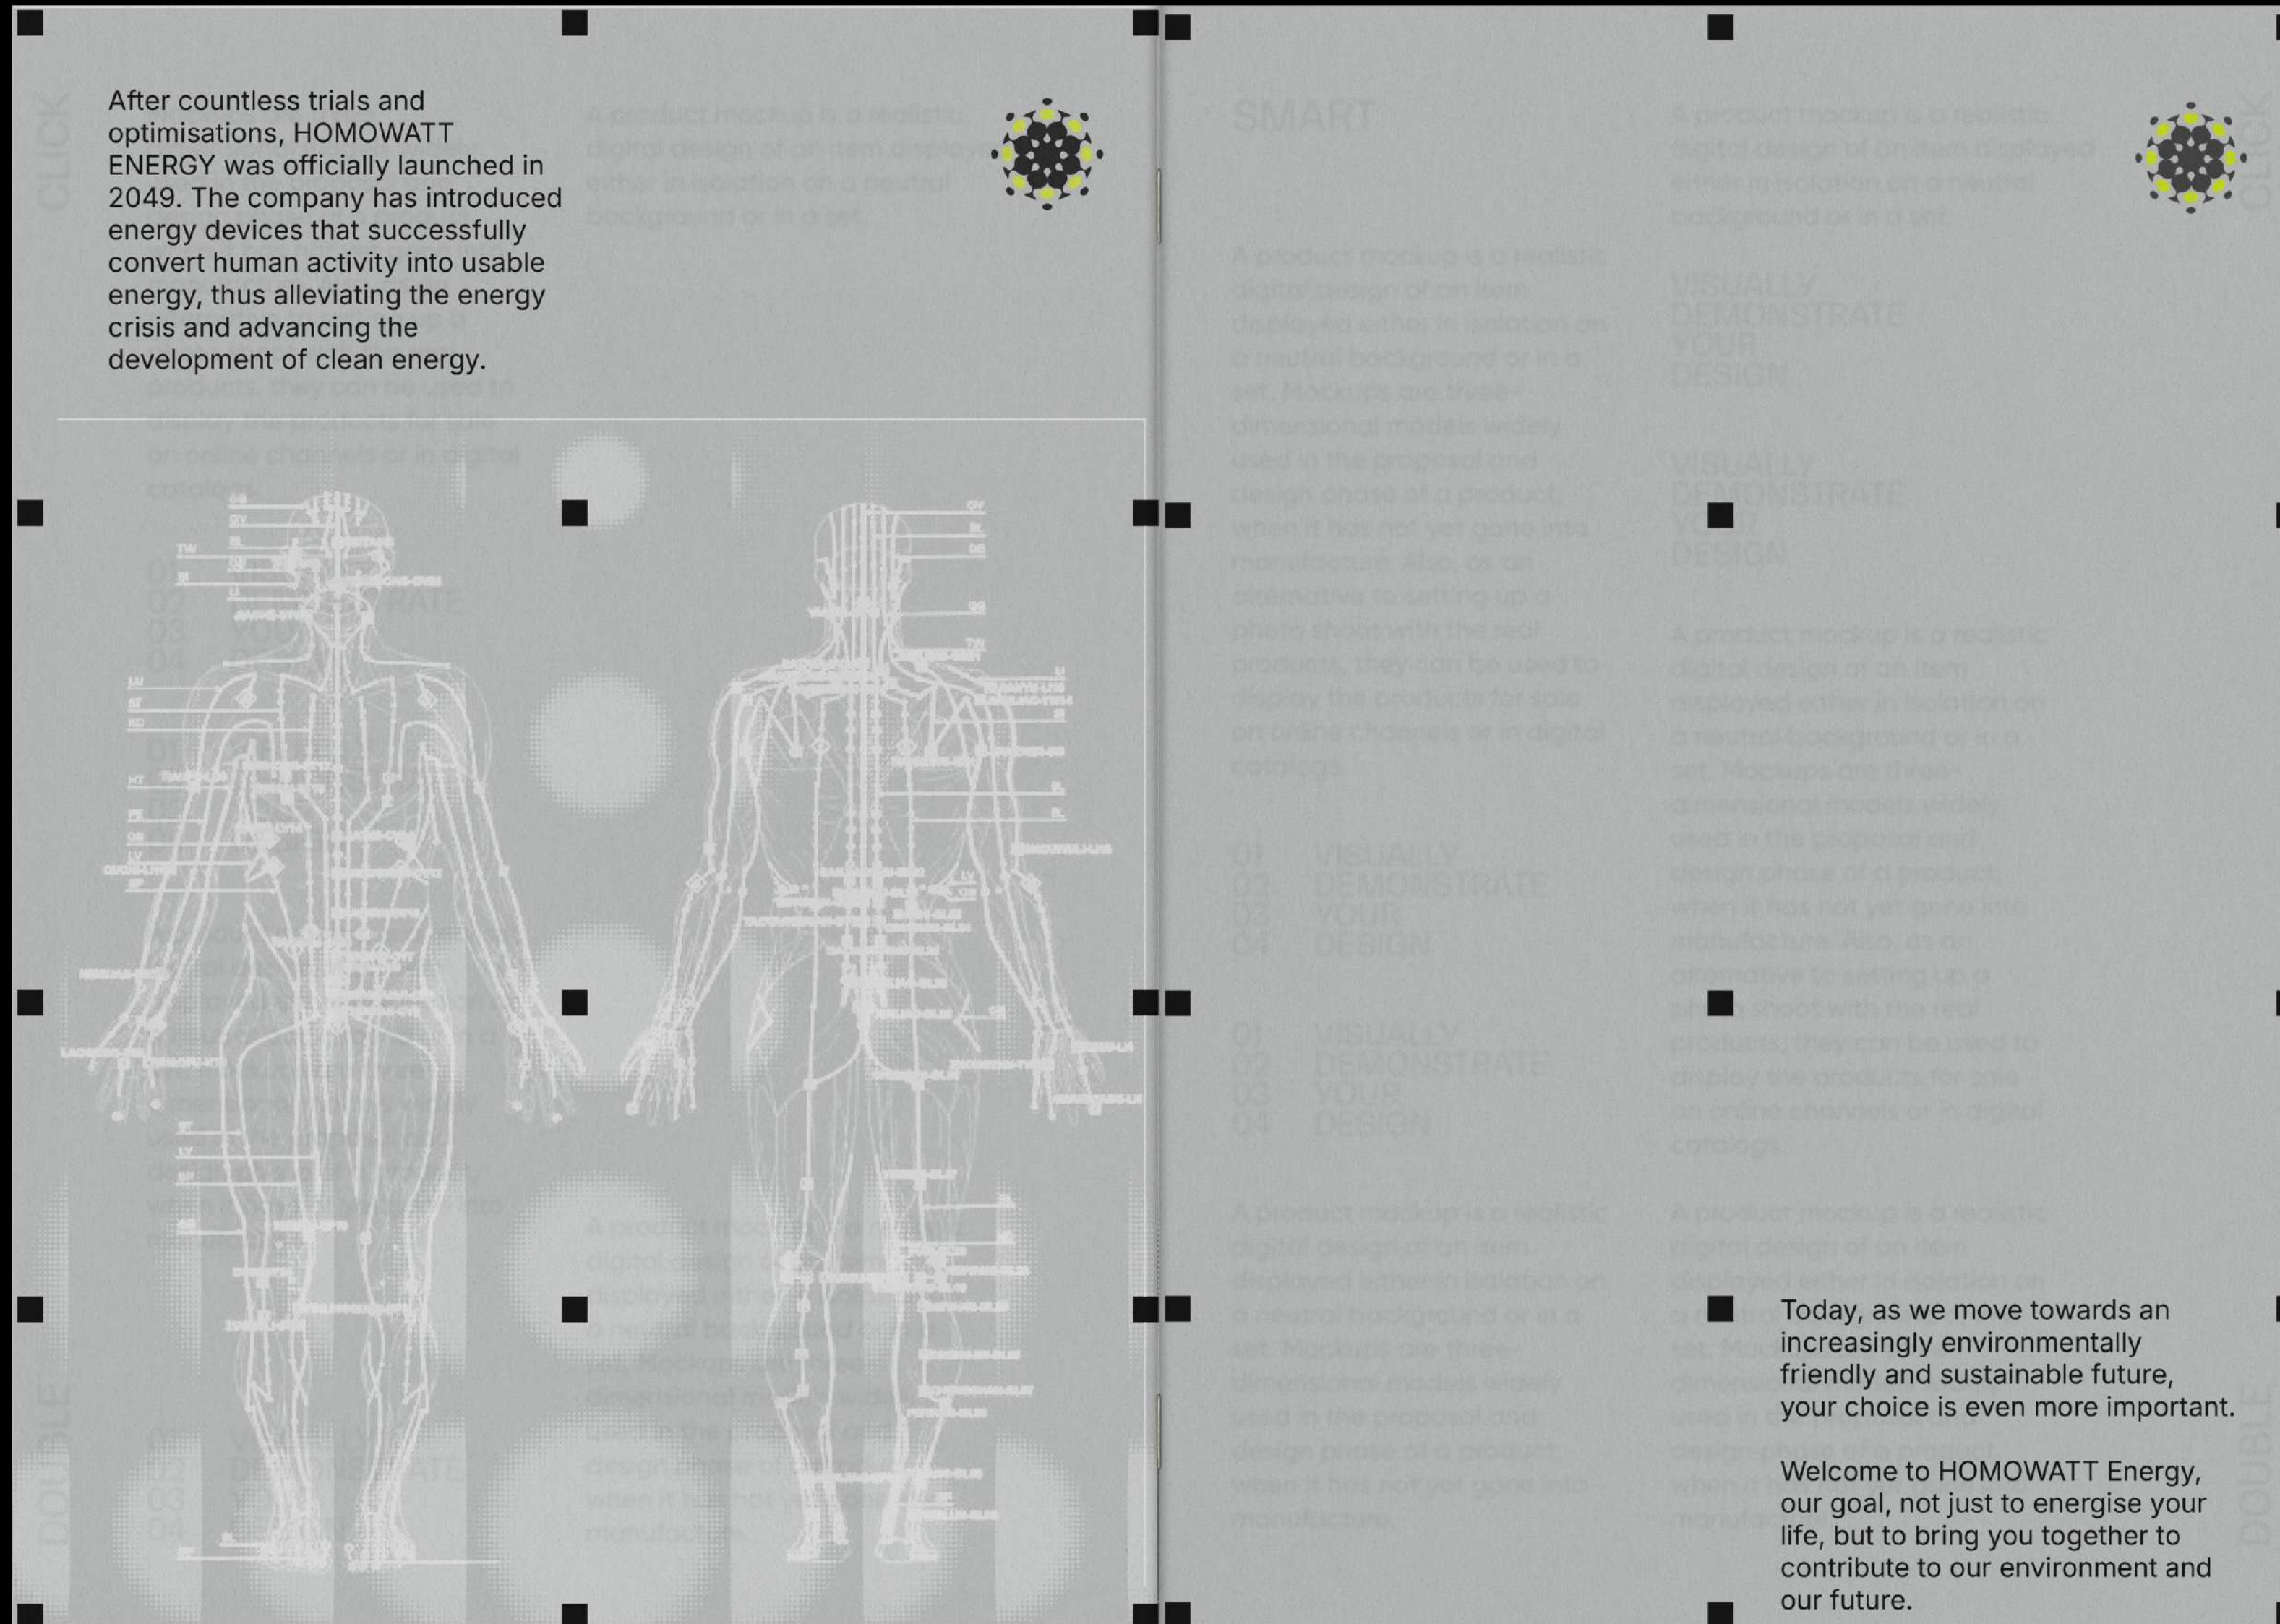

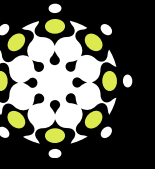

ENERGY FLOW IN 2048

Our founder saw the need and discovered a huge source of energy that was previously underutilised - human energy. He envisioned a device that could easily extract energy from people's daily activities. He wasted no time in exploring this area in hopes of creating an environmentally friendly and long-lasting energy solution.

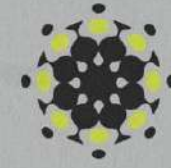

After countless trials and optimisations, HOMOWATT ENERGY was officially launched in 2049. The company has introduced energy devices that successfully convert human activity into usable energy, thus alleviating the energy crisis and advancing the development of clean energy.

A product mockup is a realistic digital design of an item displayed either in isolation on a neutral background or in a set.

## SMART

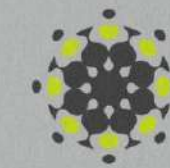

A product mockup is a realistic digital design of an item displayed either in isolation on a neutral background or in a set. Mockups are three-dimensional models widely used in the proposal and design phase of a product, when it has not yet gone into manufacture. Also, as an alternative to setting up a photo shoot with the real products, they can be used to display the products for sale on online channels or in digital catalogs.

Today, as we move towards an increasingly environmentally friendly and sustainable future, your choice is even more important.

Welcome to HOMOWATT Energy, our goal, not just to energise your life, but to bring you together to contribute to our environment and our future.

# USER GUIDE

HARVESTING VITALITY, NURTURING TOMORROW

## Device Installation :

If the device needs to be mounted in a specific location, you will need to follow the steps in the instruction manual. If the device is portable, make sure you have fully charged it or installed the appropriate batteries.

## Switching on the device:

Locate the device's power button and press it. Depending on the model, you may need to wait a few seconds to a minute for the device to boot up.

## Setting user information :

In some cases, the device may need to be personalised to include basic human data such as height, weight, etc. Follow the device's prompts to enter the information.

## Initiate energy harvesting :

Start a daily activity. Your device will automatically collect and convert your biochemical, thermal, mechanical and bioelectric energy.

## Energy use :

Depending on the design of your device, you may be able to use this energy directly from the device or store it in the device for use when needed.

## Equipment maintenance and shutdown :

Ensure that your equipment is cleaned and maintained regularly to ensure optimal performance and longevity. Switch off the appliance when you have finished using it to save additional power consumption.

## Installation and Registration:

First of all, search for the 'HOMOWATT' app in your mobile phone's app shop and install it. After opening the app, you need to register and fill in some basic personal information.

## Device Pairing:

After successfully registering and logging in, you need to connect the app with your Energy device. Enter the 'Device Connection' or 'Device Pairing' interface of the app and follow the instructions.

## Device Settings:

After the device is successfully paired with APP, you can set up the device within APP, including inputting personal height, weight and other data, as well as setting the mode and cycle of energy collection.

## Real-time monitoring:

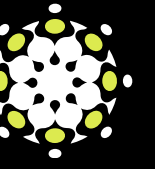

In the main interface of APP, you can monitor the operation of the device in real time, including the current energy collected, energy to be used, and other related information.

## Energy Management:

There is also an energy management module in the APP, users can set the energy usage and priority according to their own needs, and the device will automatically enter standby mode to save energy when the energy is used up.

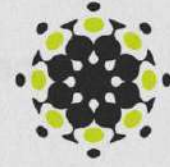

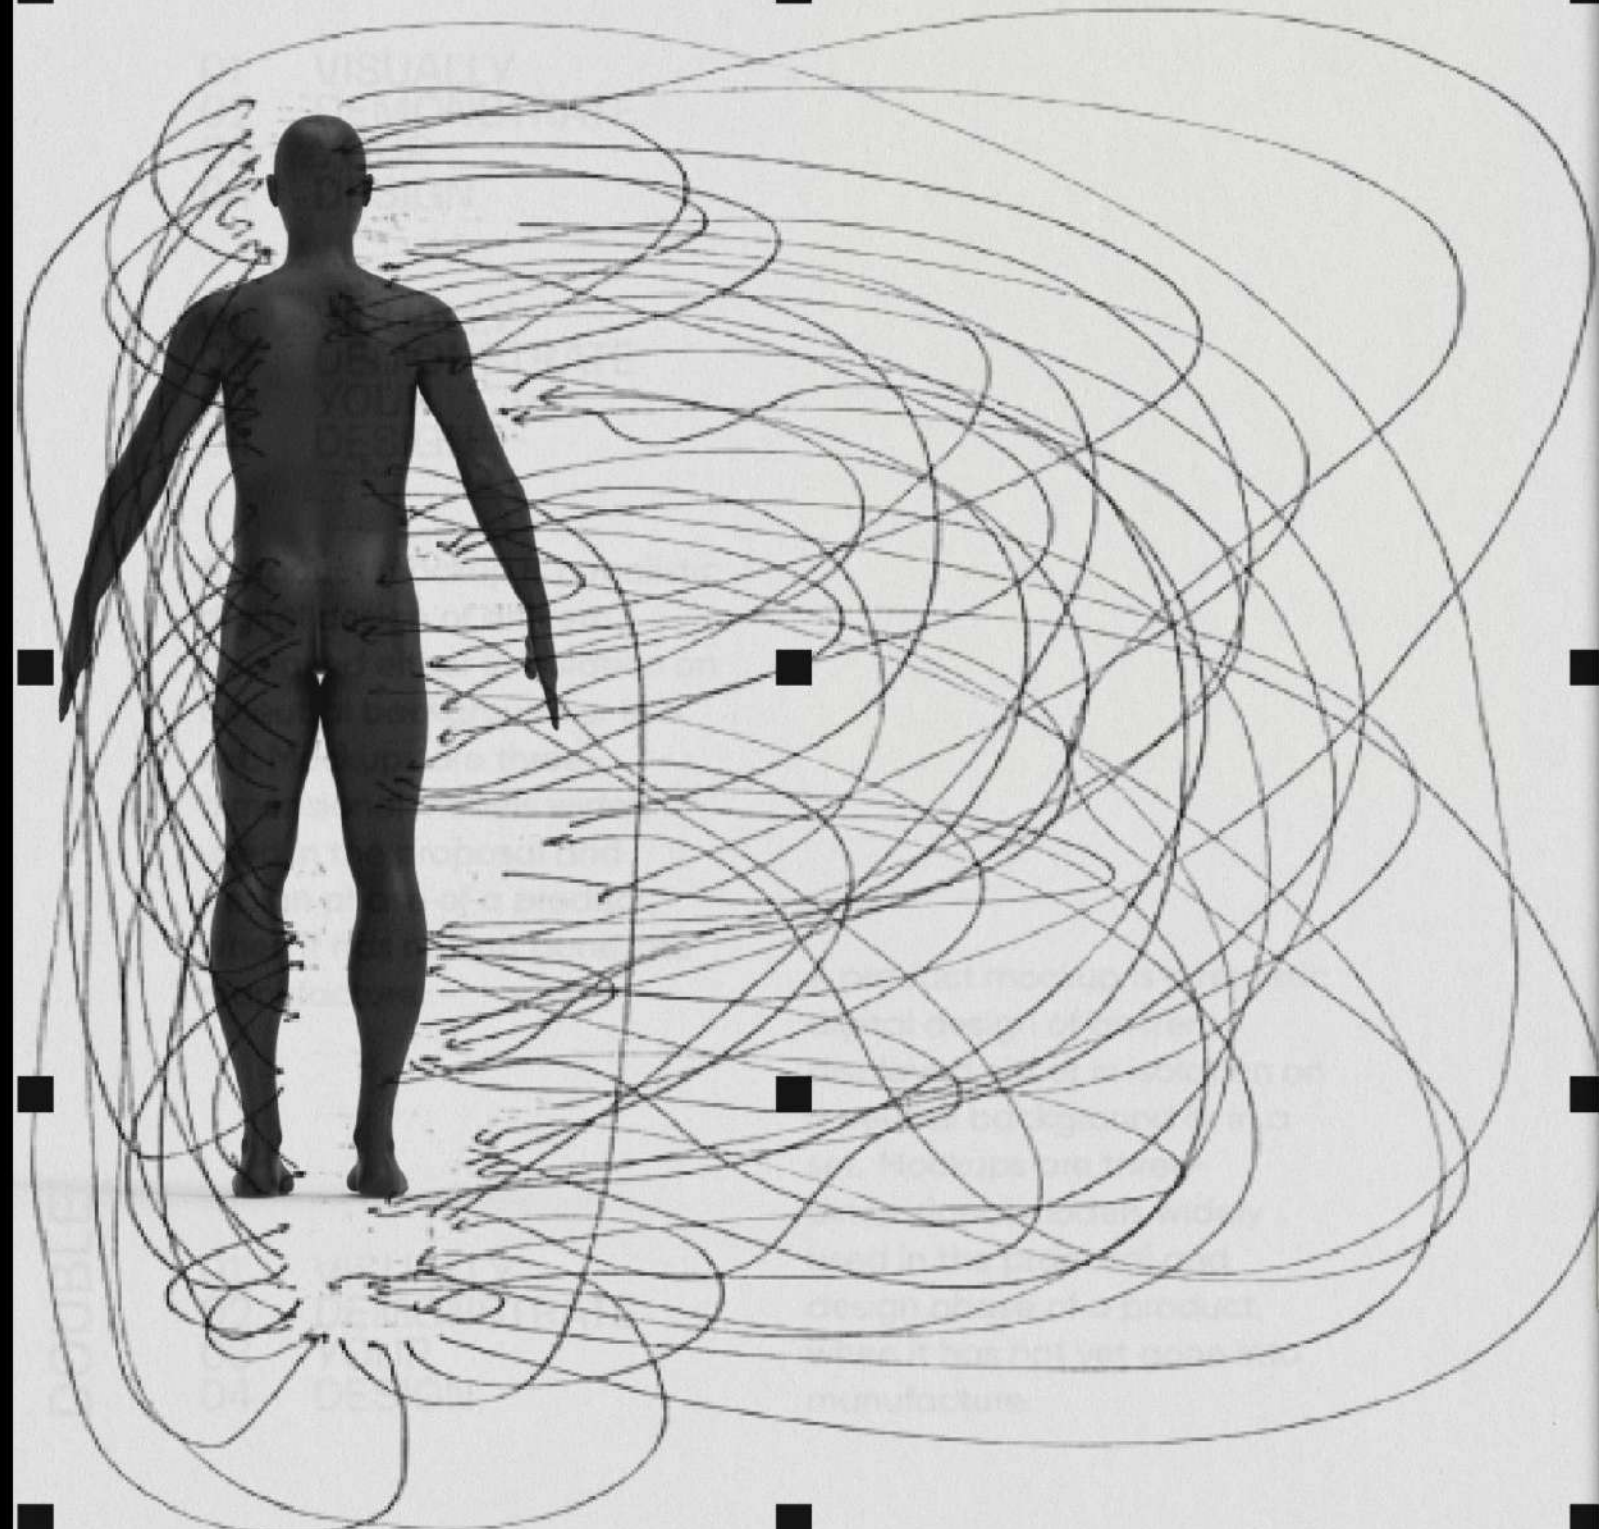

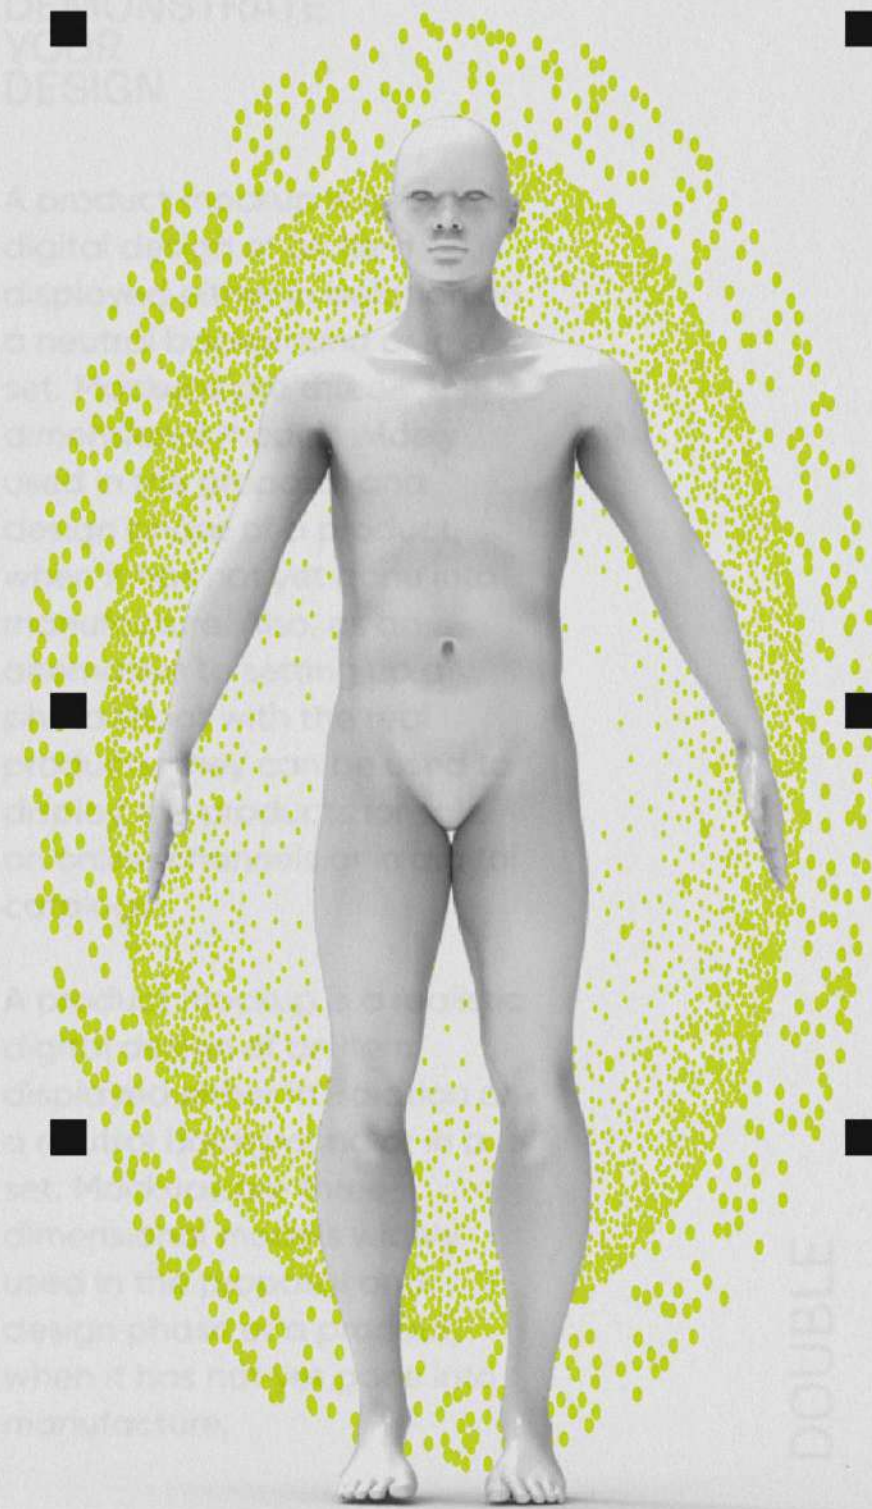

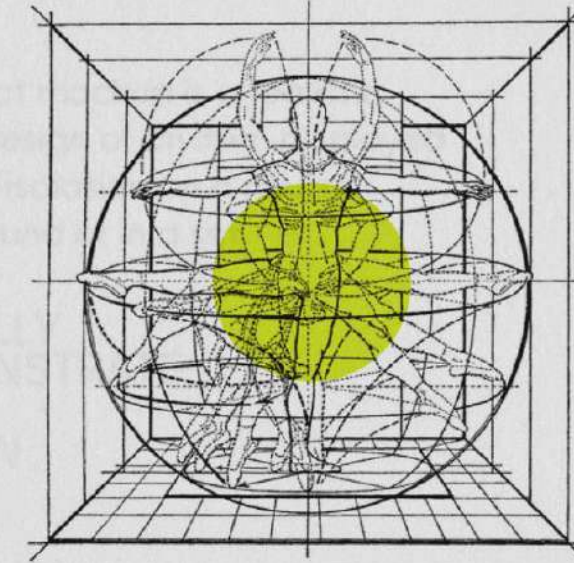

## Every ounce of energy in you.

At Homowatt Energy we take a whole new approach to extracting the human activity of everyday life for you to produce energy. Here is a brief overview of how our equipment extracts and utilises biochemical, thermal, mechanical and bioelectric energy:

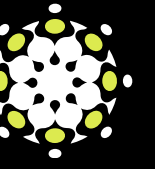

## Thermal Energy

As a thermostatic organism, the human body needs to maintain a constant body temperature and therefore releases a large amount of heat energy. Our products are responsible for capturing and transforming this energy so that it is not released uselessly. Every cell in the human body is constantly undergoing a metabolic process that generates heat all the time. After all, in order to keep our body temperature stable, our body must constantly regulate it by giving off heat. Whether in the cold of winter or the heat of summer, the body needs to maintain a constant temperature of approximately 37°C, and this means that a great deal of heat is invariably released.

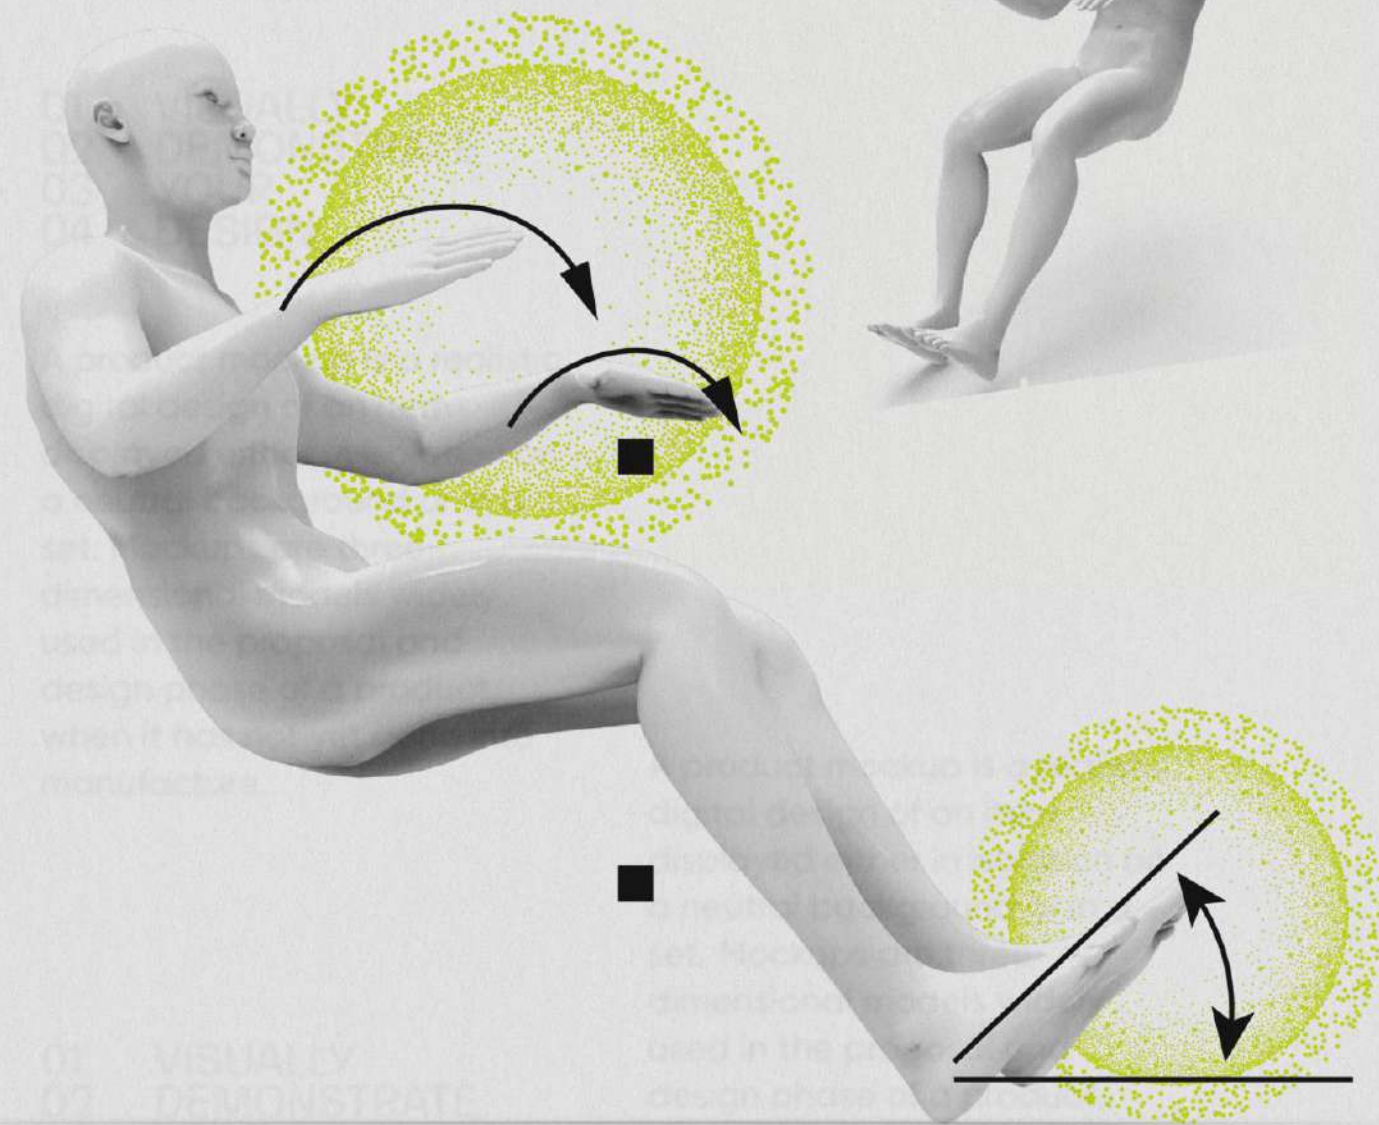

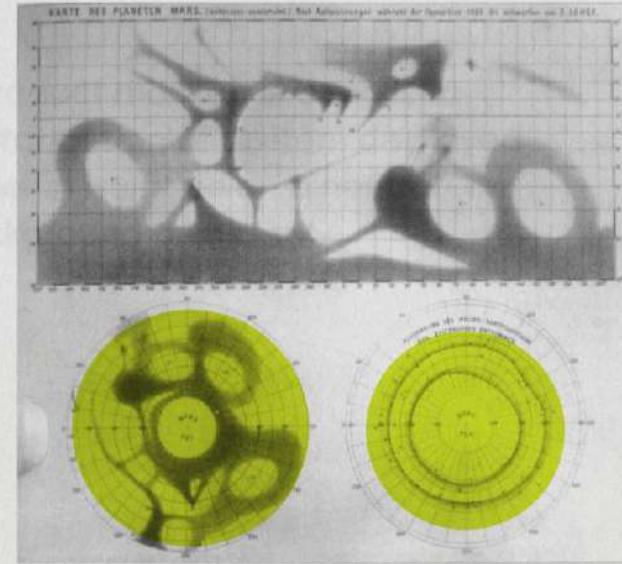

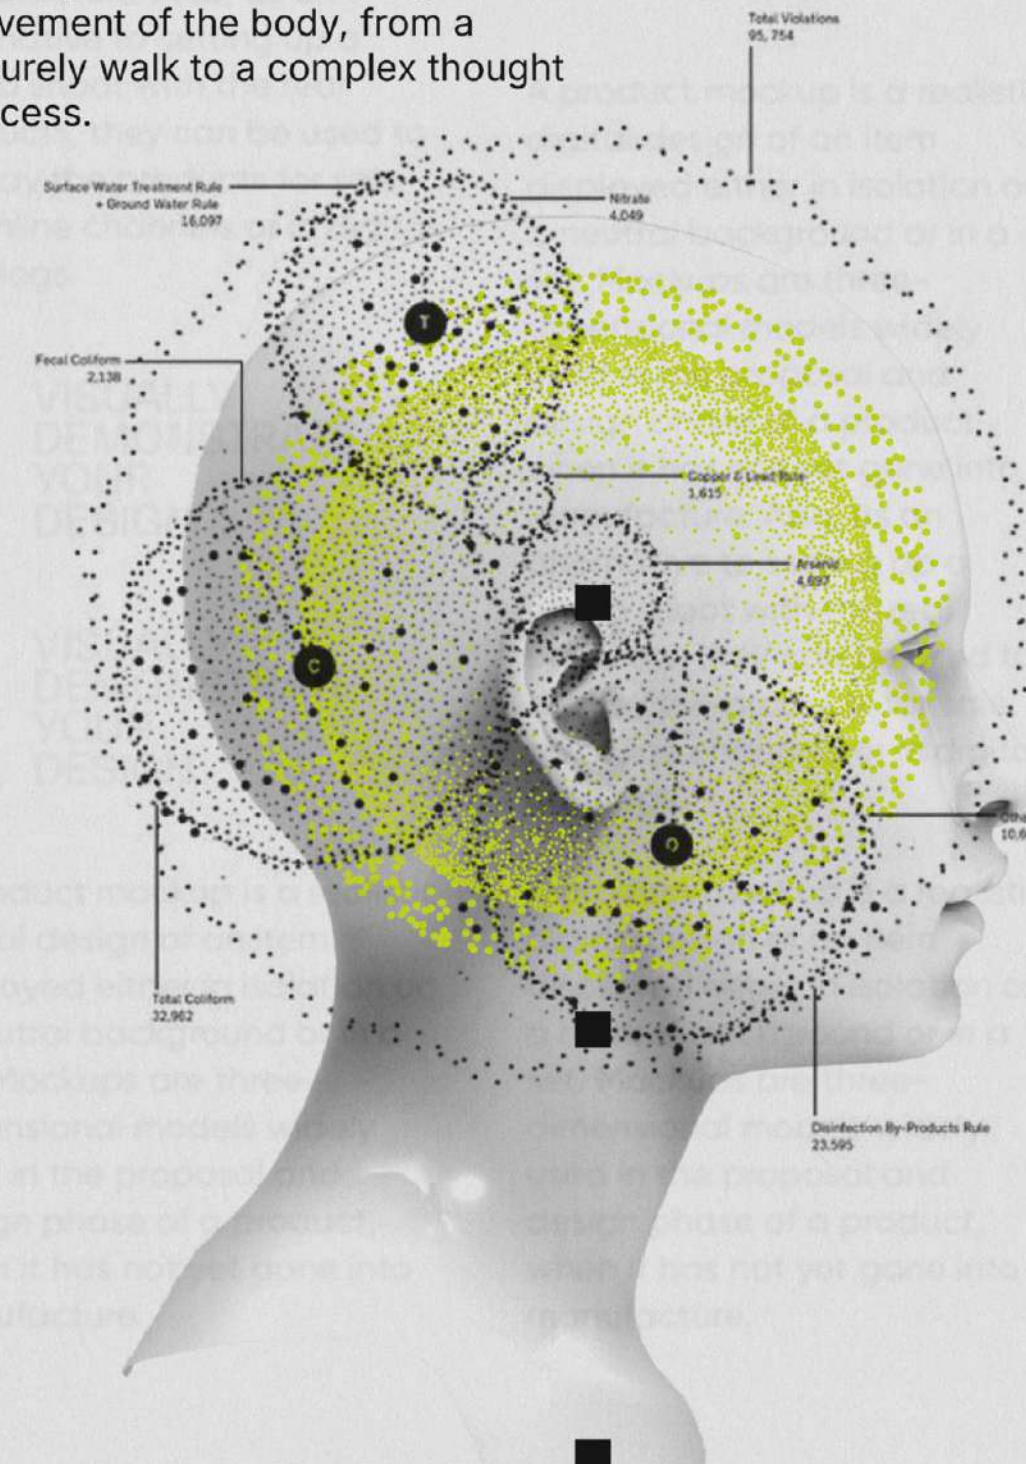

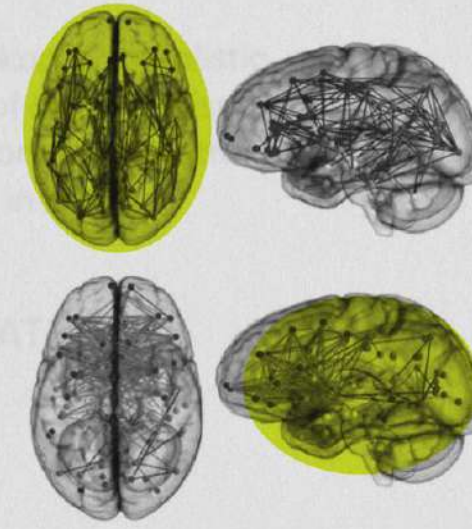

## Mechanical energy

When you carry out daily activities, such as walking or exercising, your body generates mechanical energy that can be captured and converted into electrical energy by the HOMOWATT device. This conversion process can be interpreted as a foot-powered or hand-cranked generator, except that it is far more efficient than traditional power generators, and more portable and easier to use.

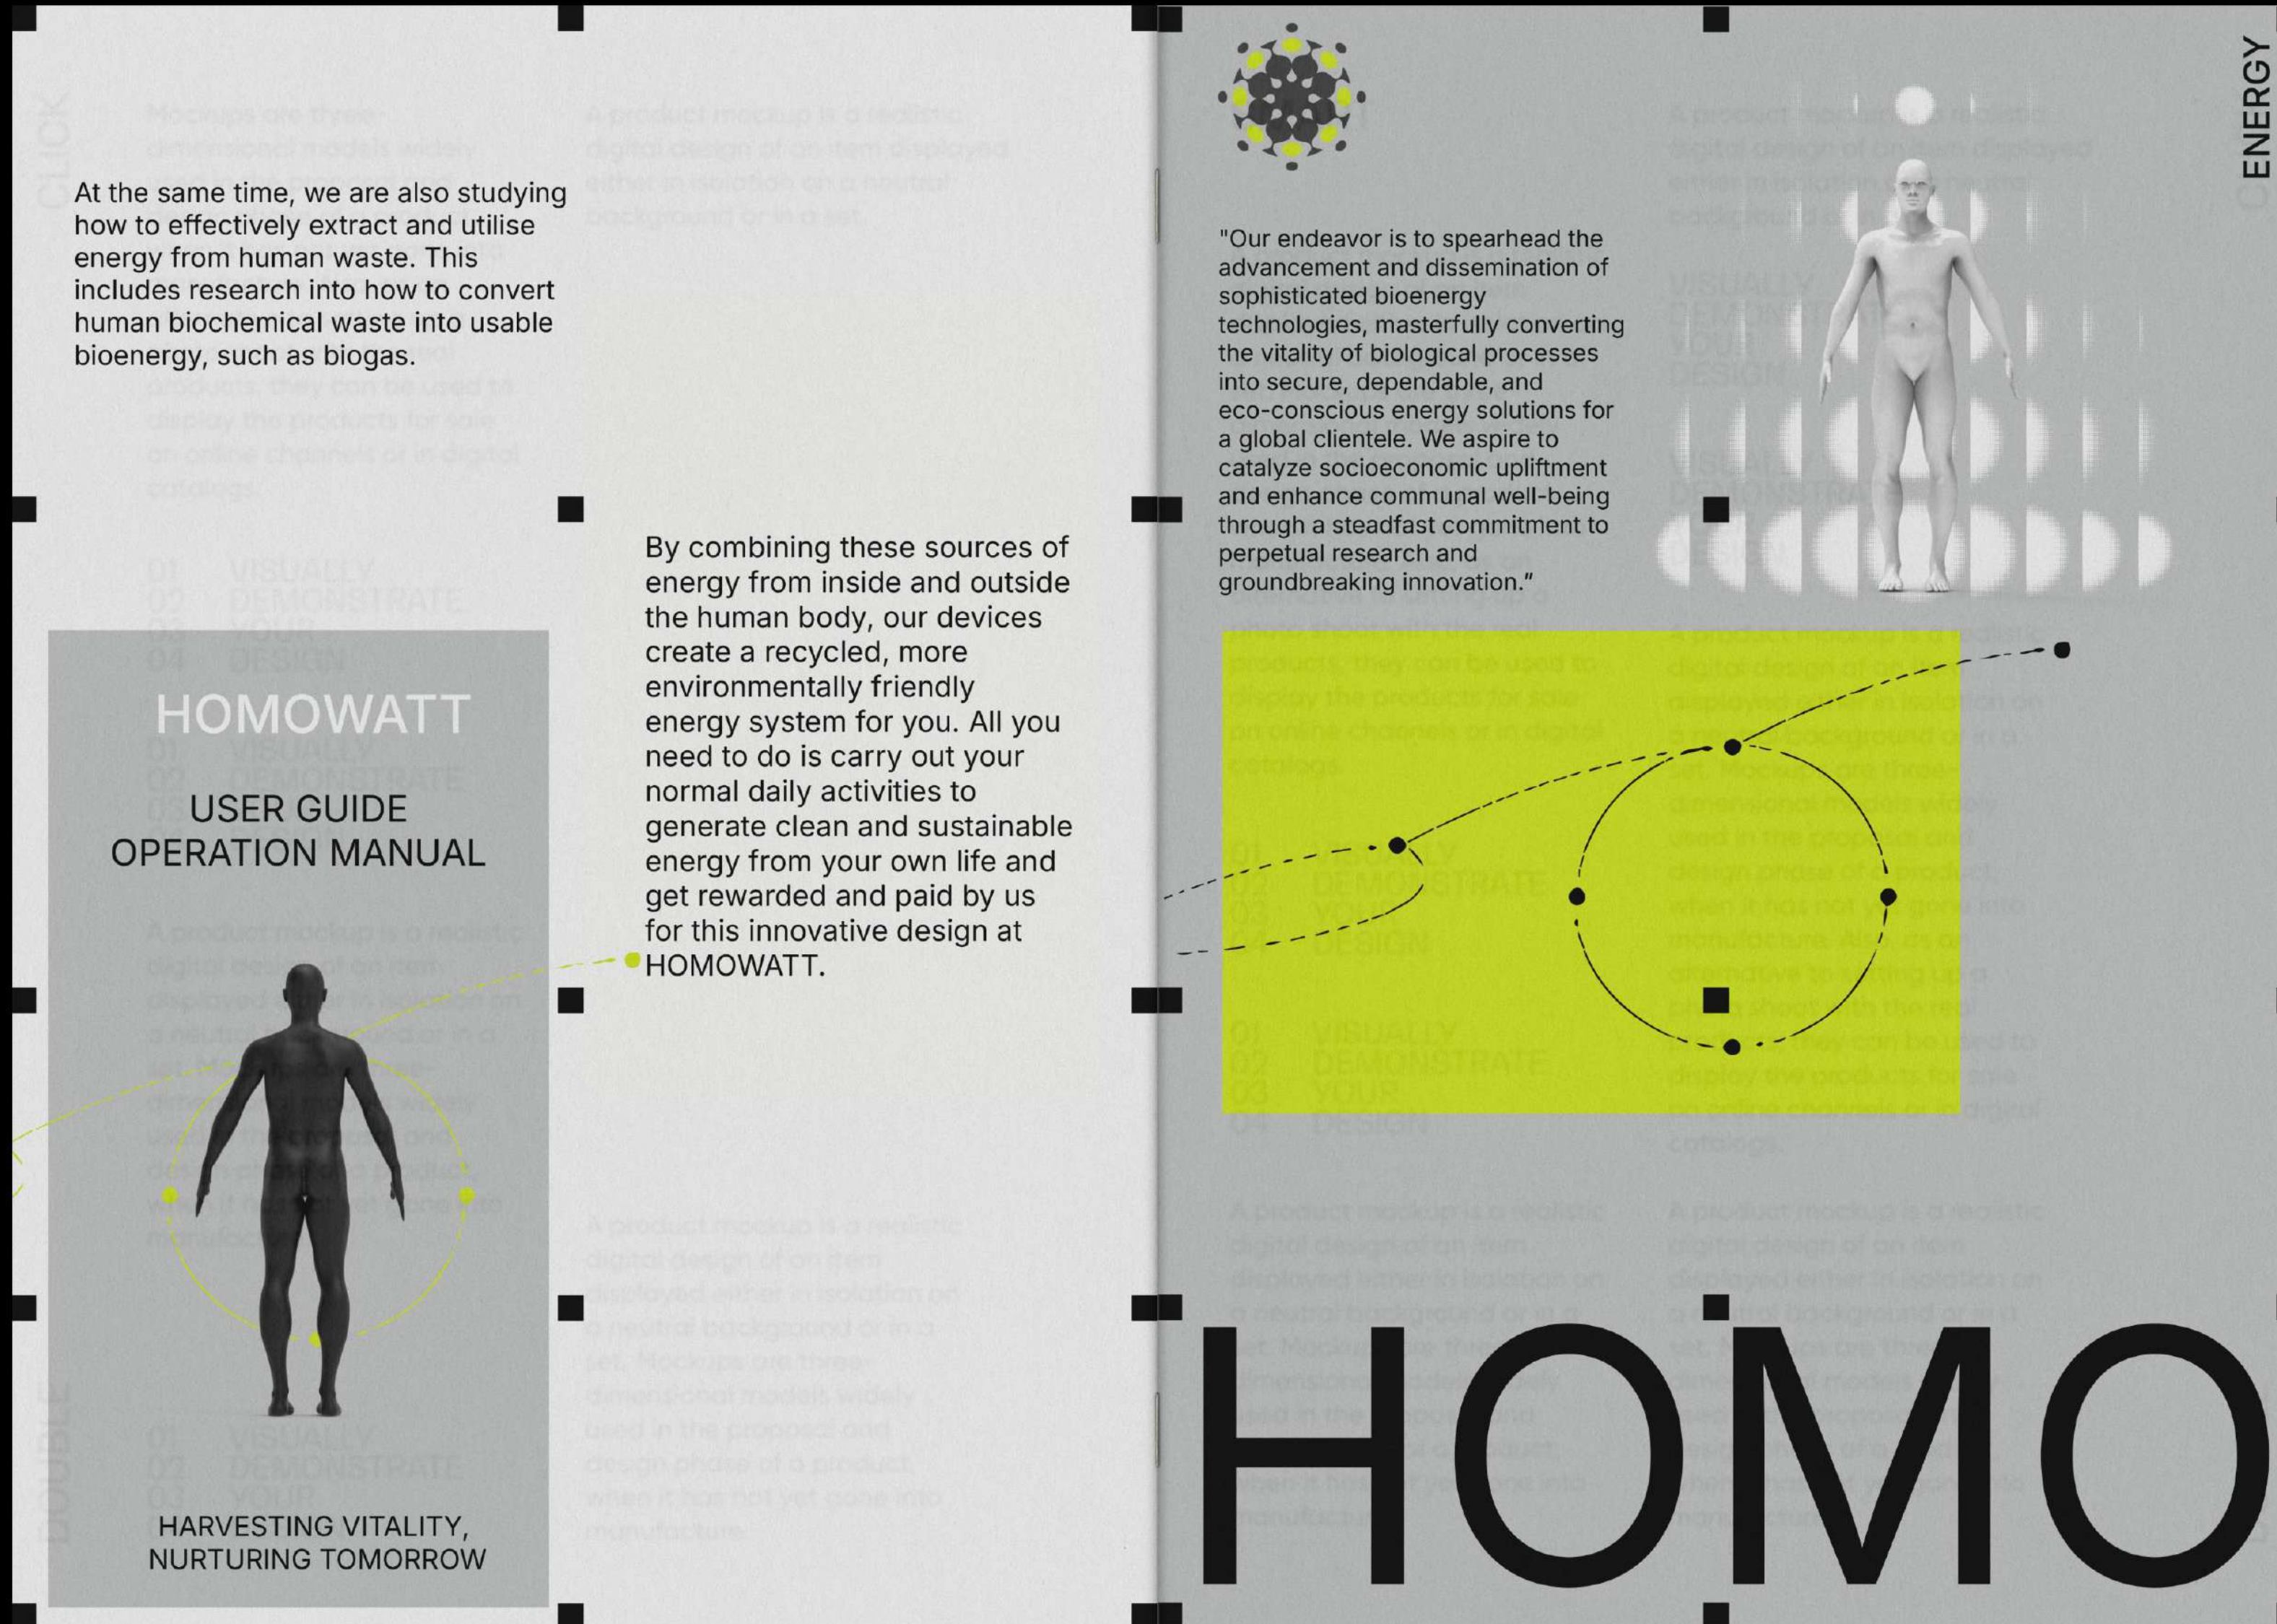

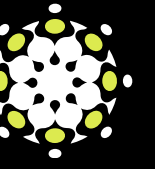

## Bioelectricity

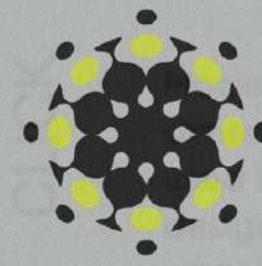

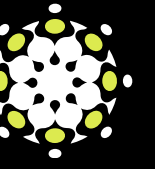

Your brain and nervous system communicate through electrical signals, and although these signals are weak, they can be a very useful source of energy if captured and converted correctly. Electrical signals are a major form of communication in our brain and nervous system. At every moment, our neurons are generating and transmitting electrical signals that are responsible for directing every movement of the body, from a leisurely walk to a complex thought process.

# DEVICE TUTORIALS

HARVESTING VITALITY,  
NURTURING TOMORROW

### Device Installation :

If the device needs to be mounted in a specific location, you will need to follow the steps in the instruction manual. If the device is portable, make sure you have fully charged it or installed the appropriate batteries.

### Switching on the device:

Locate the device's power button and press it. Depending on the model, you may need to wait a few seconds to a minute for the device to boot up.

### Setting user information :

### Initiate energy harvesting :

Start a daily activity. Your device will automatically collect and convert your biochemical, thermal, mechanical and bioelectric energy.

### Energy use :

Depending on the design of your device, you may be able to use this energy directly from the device or store it in the device for use when needed.

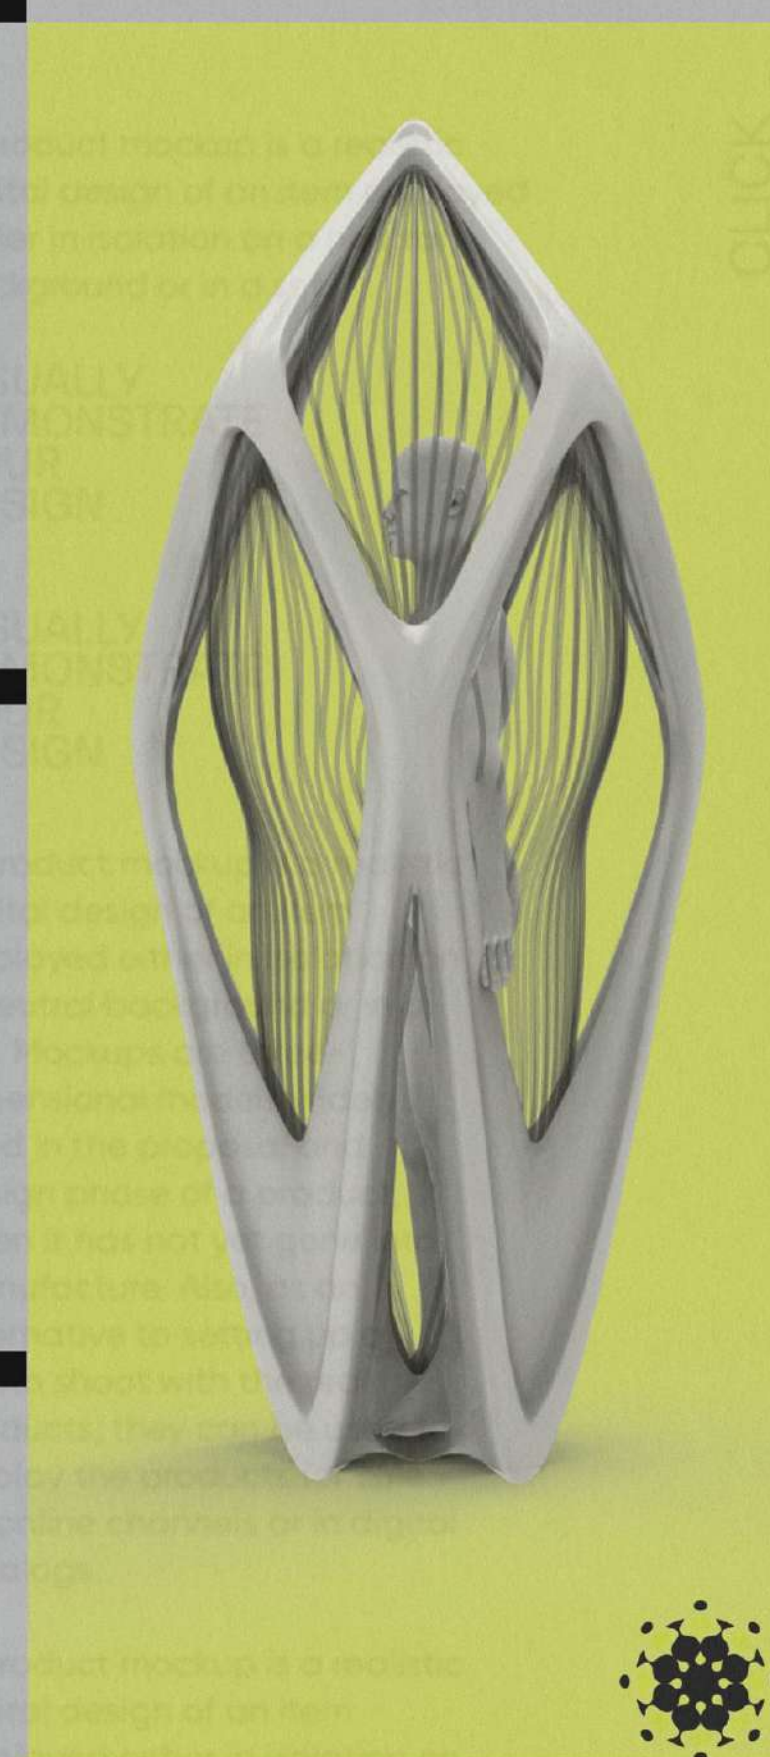

### Equipment maintenance and shutdown :

Ensure that your equipment is cleaned and maintained regularly to ensure optimal performance and longevity. Switch off the appliance when you have finished using it to save additional power consumption.

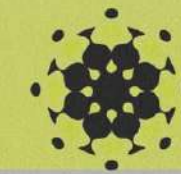

# 01

## Human body heat energy equipment

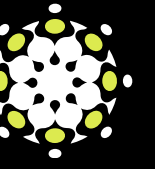

INTRODUCTION: This device provides you with a convenient way to convert your body heat into electricity. Through efficient energy conversion technology, it allows you to generate electricity while standing.

Use: Users just need to stand in the machine, and the device will automatically start collecting and converting your body heat into electricity. You can monitor the process of heat collection and conversion as well as battery charging in real time through the accompanying mobile phone APP.

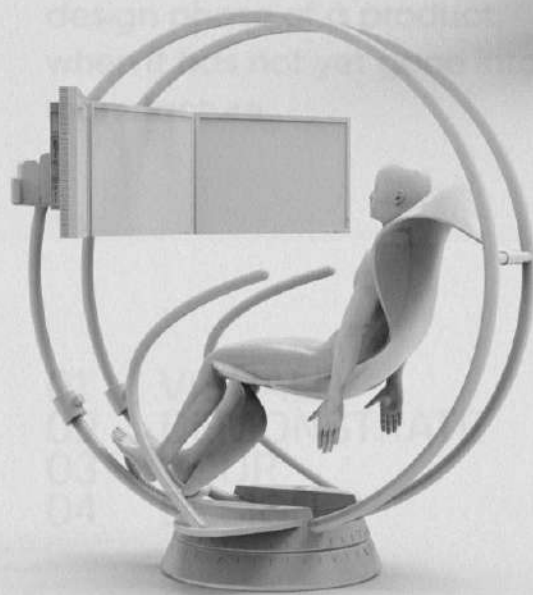

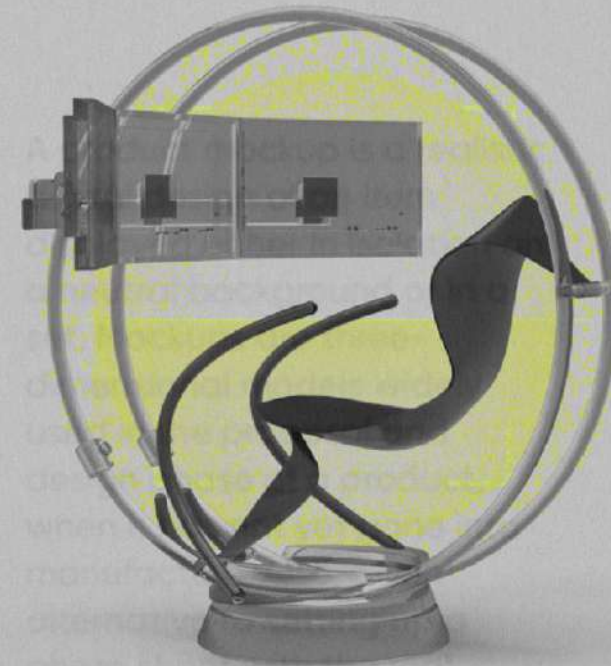

# 03

Mechanical energy hand and foot coordinated movement power generation device

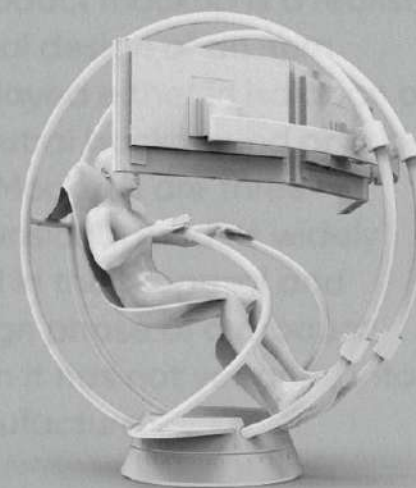

## INTRODUCTION

With this device, every movement you make will be turned into real electricity. Through the co-ordinated movement of hands and feet, it allows you to generate electricity easily, while the attached screen can bring you fun after exercise.

You have successfully linked with NO.XR401.

Tutorials

1 Scan code to match machine

2 Method 1 - Use foot pedals to complete the exercise

3 Method 2 - Push and pull rods for production

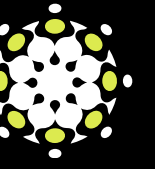

We recommend doing both at the same time, and you can use the screen as much as you like.

## USE

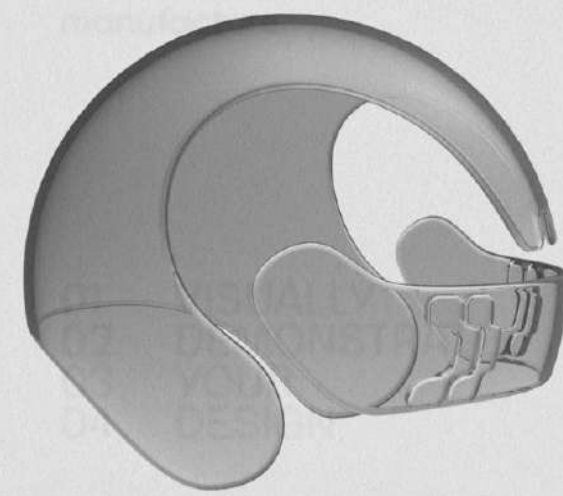

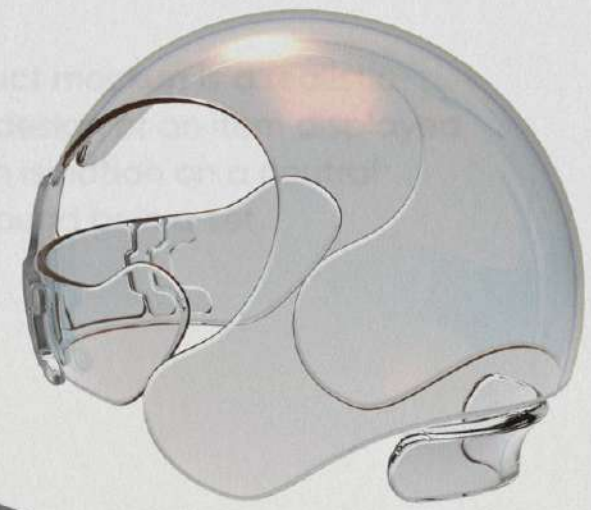

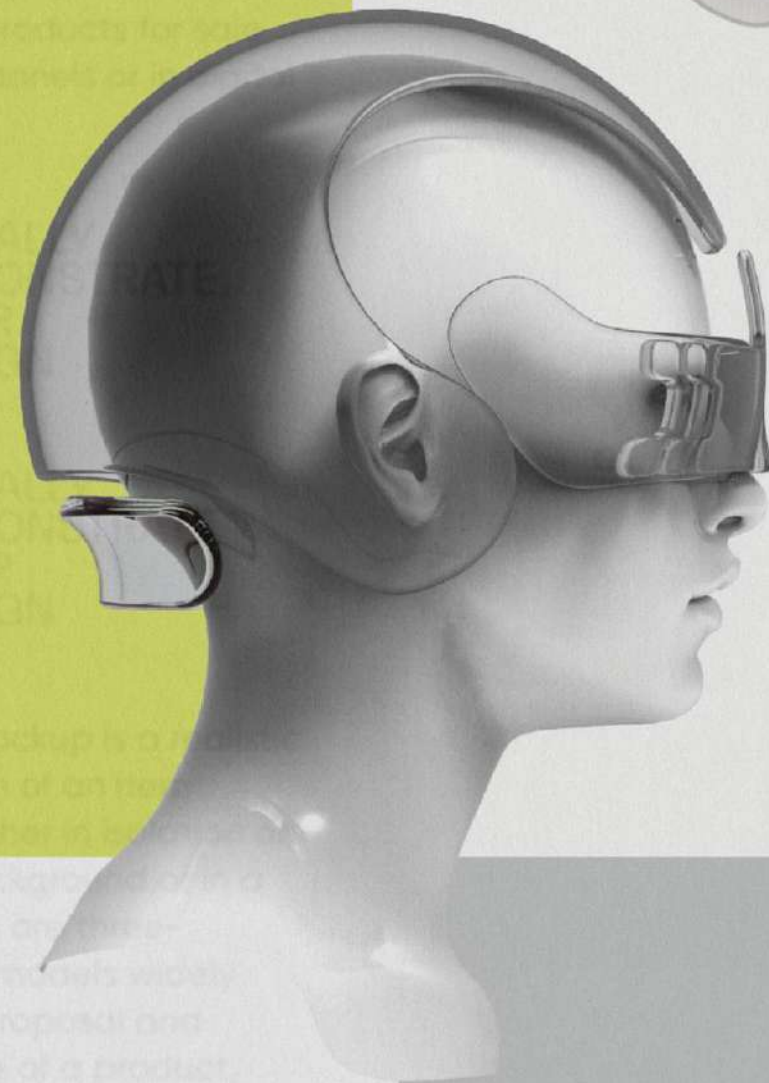

Sit on the device and generate electricity by coordinating your hand and foot movements to drive the device. You can watch videos, fitness guides or exercise data on the screen that comes with the device, making exercise more fun. At the same time, you can also use the mobile phone app to check the power generated and usage in real time.

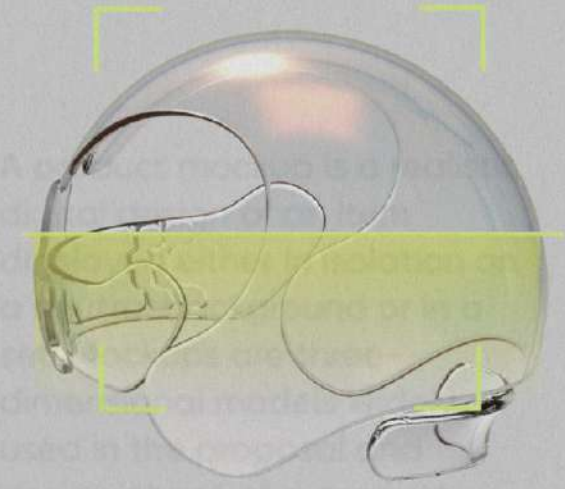

# 02

## EEG Energy Device

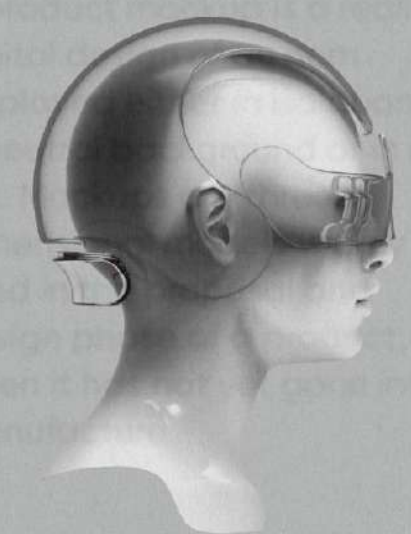

### INTRODUCTION

This device utilises state-of-the-art technology to capture your EEG signals and convert them into electrical energy, powering your thoughts into reality.

You have successfully linked with NO.XR401.

Bioelectric Signal Extraction

Tutorials

1

Scan code to match machine

2

Then wear the machine.

3

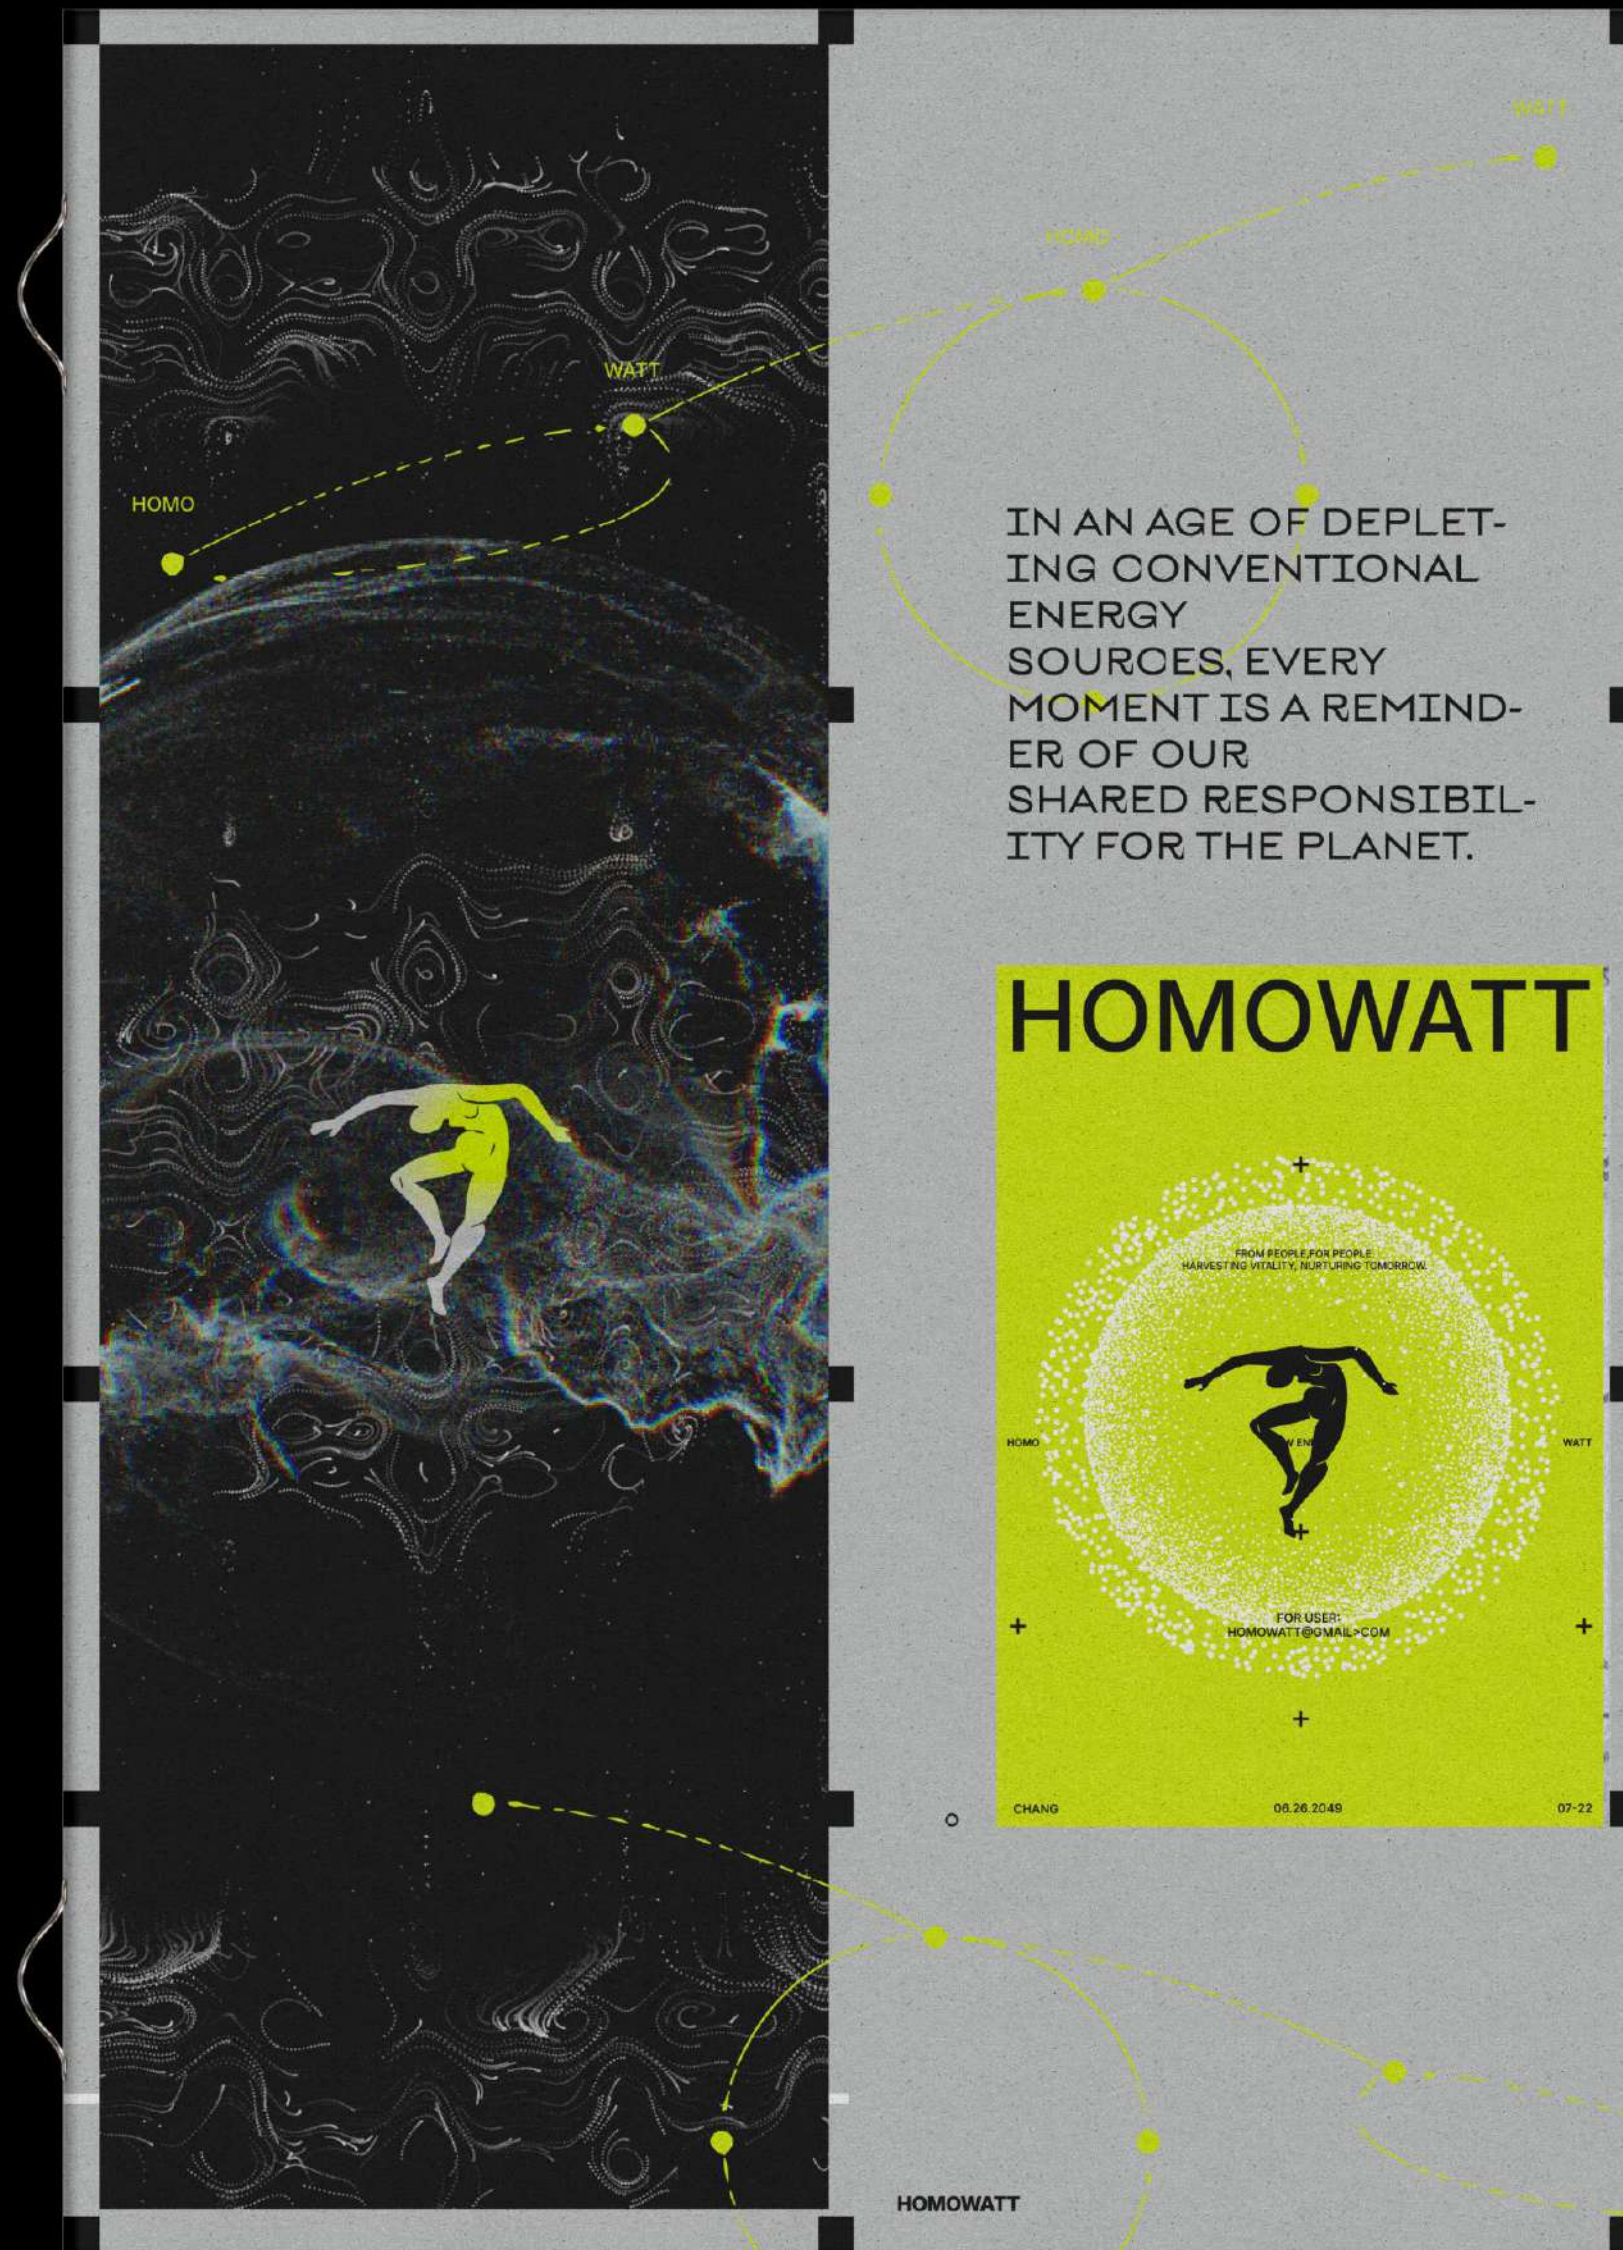

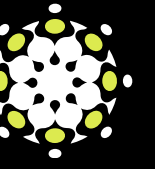

Thinking or working, the machine automatically extracts neural signals.

Best deals for brainiacs, the more you think the more you get.

### USE

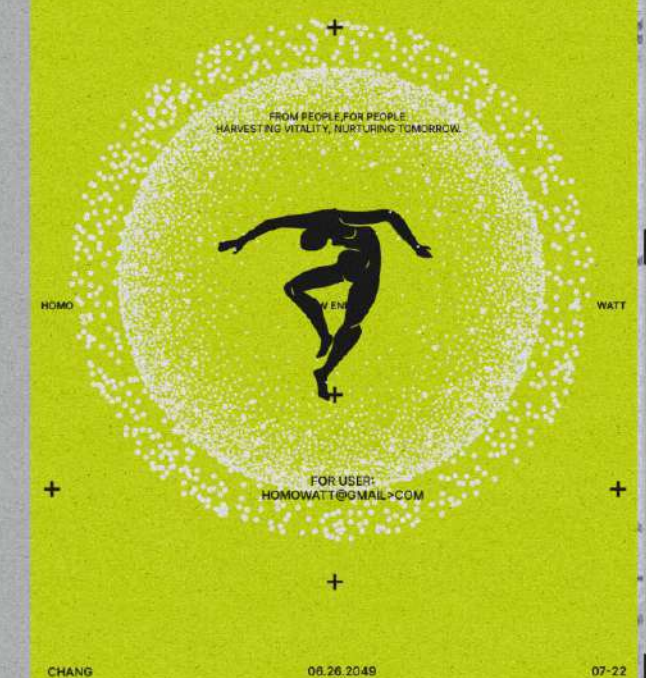

Wear the device on your head and think normally. The device will automatically capture EEG signals and convert them into electricity. You can check the generation and use of electricity in real time through the accompanying mobile phone APP.

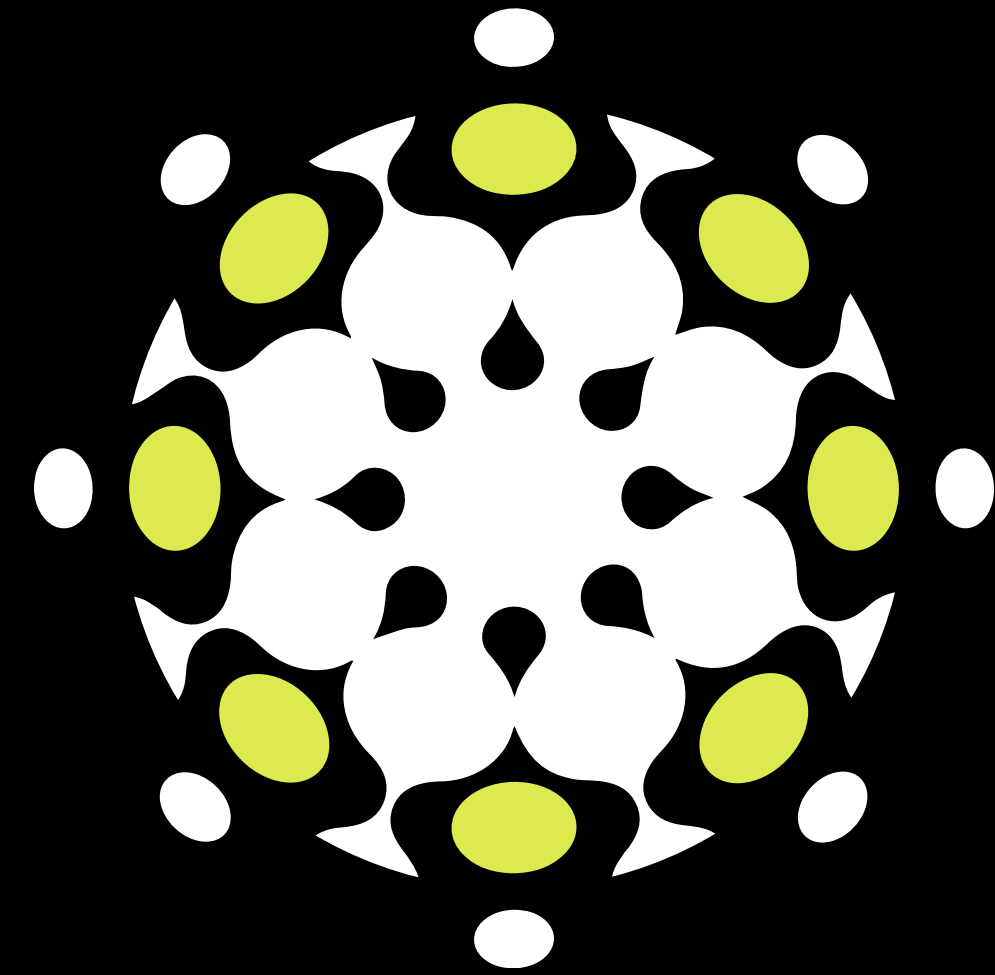

IN AN AGE OF DEPLETING CONVENTIONAL ENERGY SOURCES, EVERY MOMENT IS A REMINDER OF OUR SHARED RESPONSIBILITY FOR THE PLANET.
