如同

is like

有时，部件组合
失去逻辑，结构
游散，汉字结构
如同散落的积木。

Sometimes, the combination of parts loses its logic and wanders off on its own, and the structure of Chinese characters is like scattered blocks.

Diabetic patients have lower grey matter density (Beijing Normal University 2022a study) which leads to a decrease in the efficiency of integration of parts and the inability to form the logical connection of 'wood + eye = phase'. As a result, the phenomenon of stroke separation in Chinese characters.

Diabetic patients have lower grey matter density (Beijing Normal University 2022a study) which leads to a decrease in the efficiency of integration of parts and the inability to form the logical connection of 'wood + eye = phase'. As a result, the phenomenon of stroke separation in Chinese characters.

Diabetic patients have lower grey matter density (Beijing Normal University 2022a study) which leads to a decrease in the efficiency of integration of parts and the inability to form the logical connection of 'wood + eye = phase'. As a result, the phenomenon of stroke separation in Chinese characters.

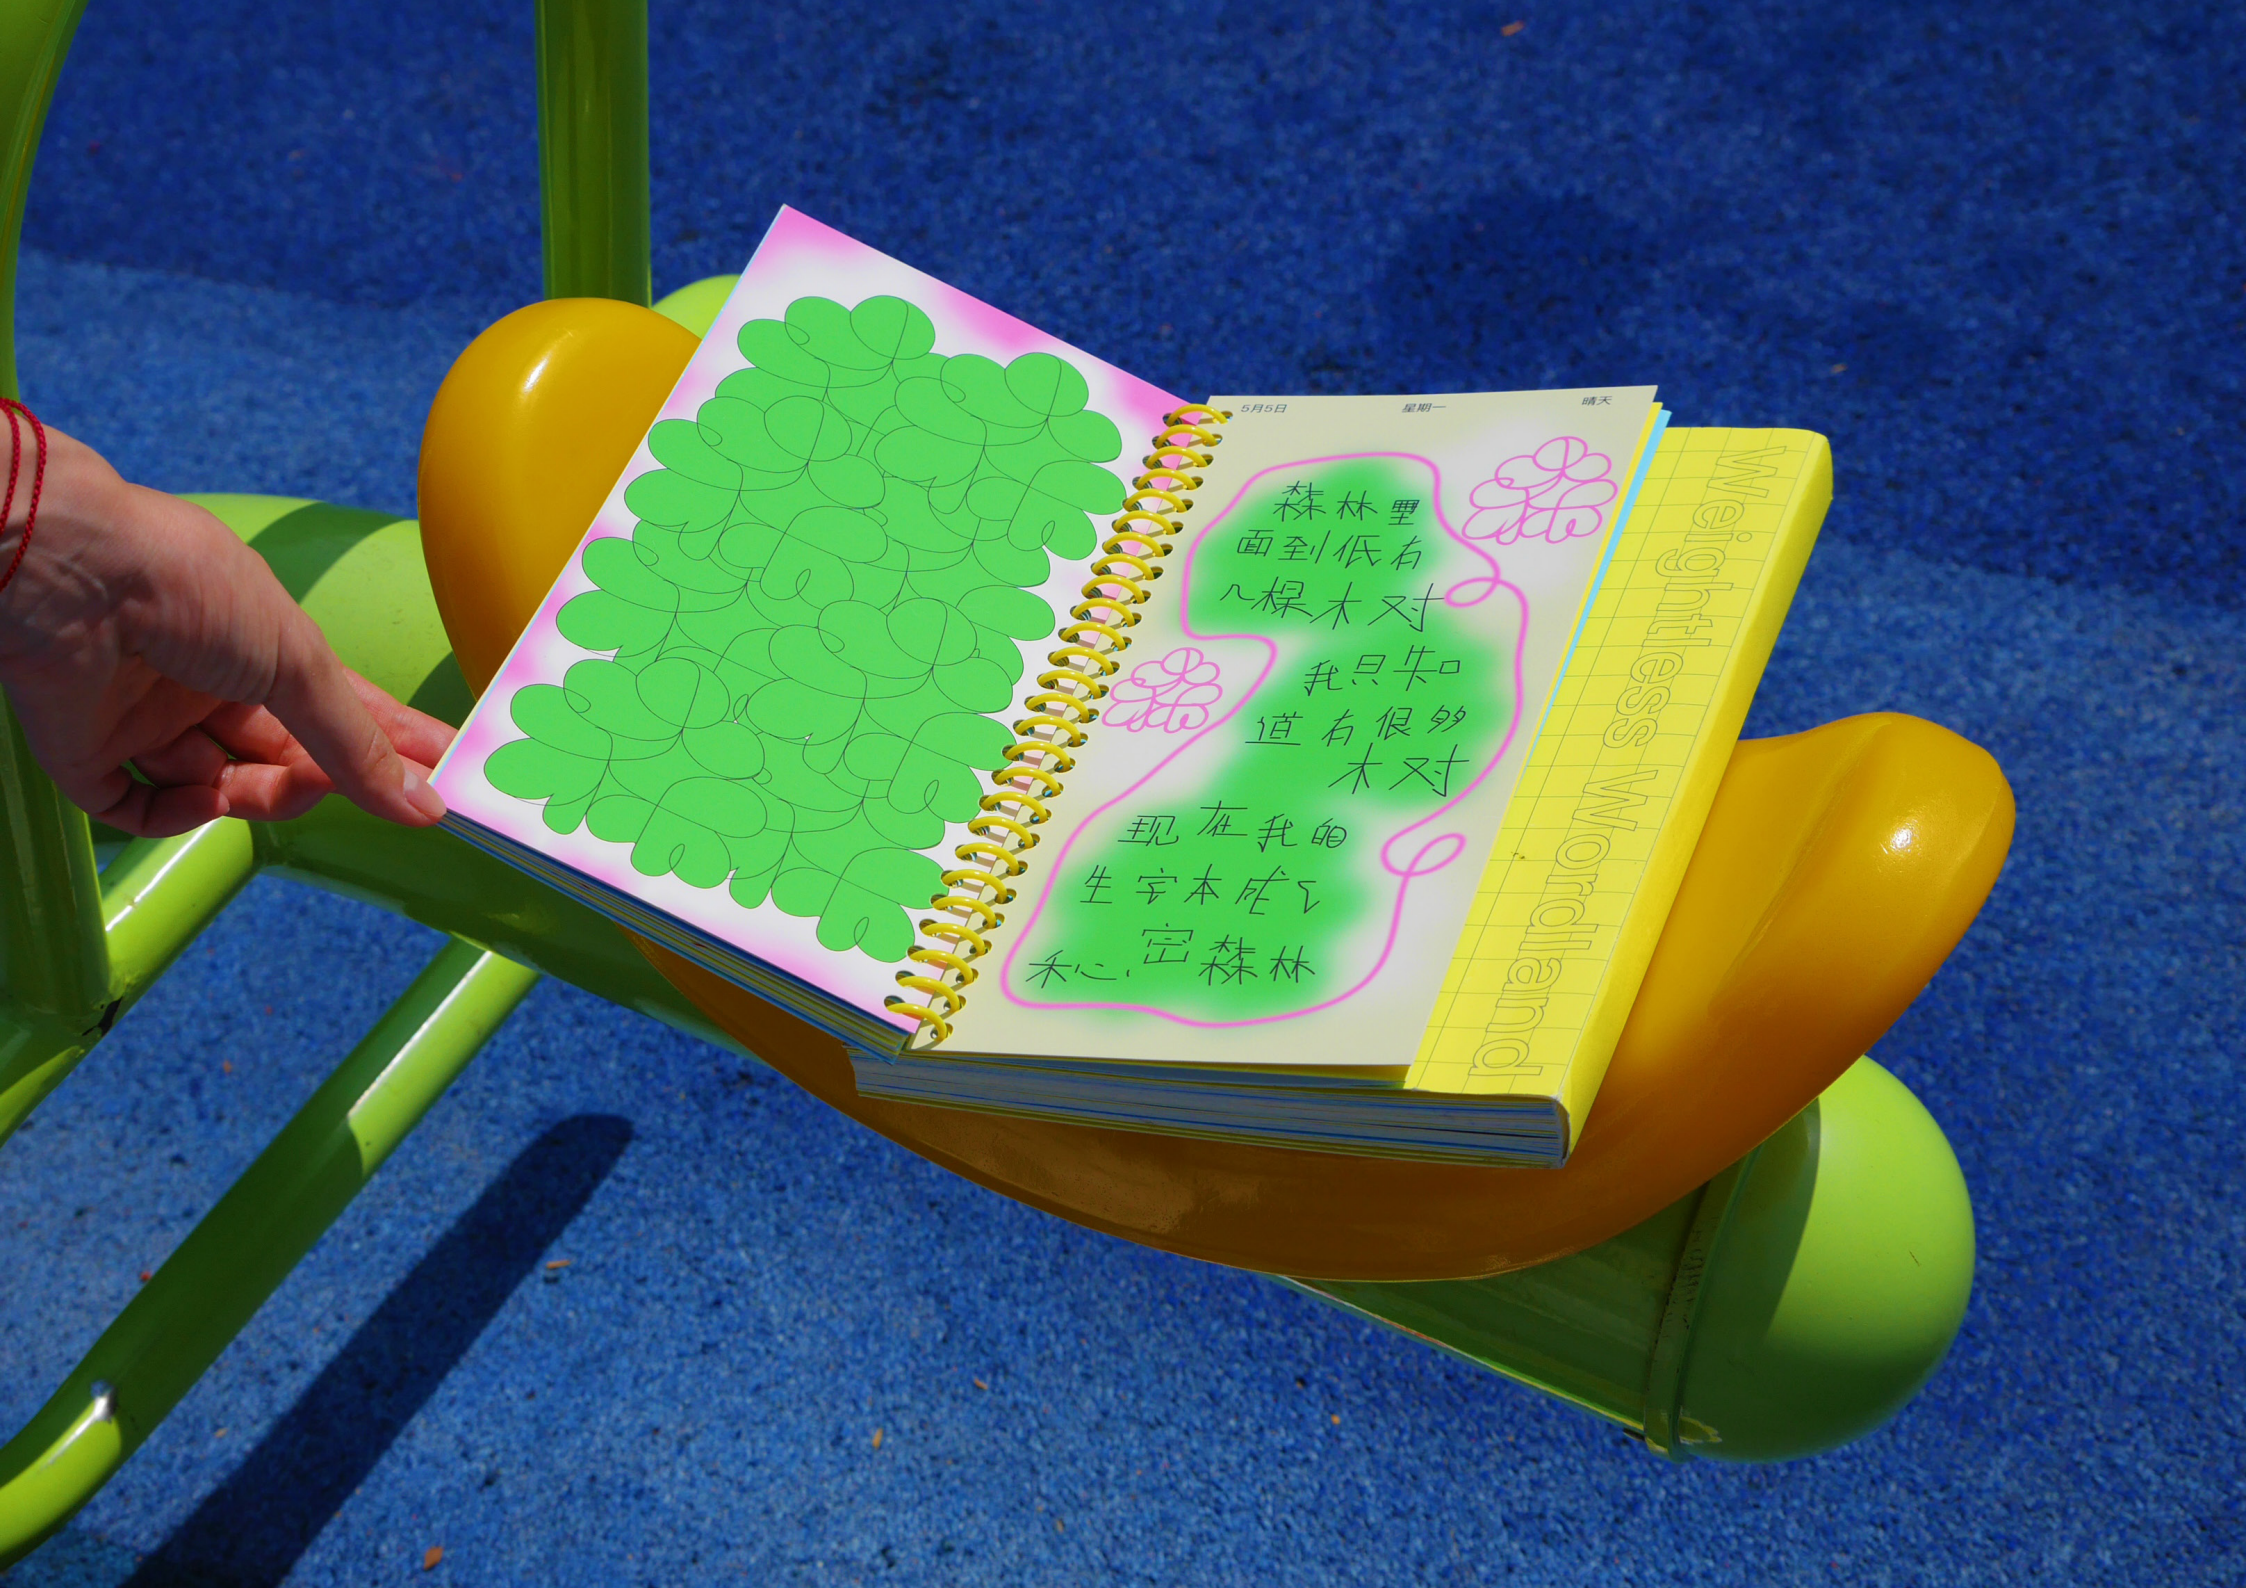

有时，文字密度突然暴增，
像密织的攀爬网。

At times, the density of the text
suddenly skyrockets, like a densely
woven climbing web.

视觉拥挤效应是指当目标物
体周围存在其他物体时，识
别目标物体的难度会增加。
对于阅读障碍儿童来说，这
种效应更为明显。特别是在
面对密集排列的文字时，他
们可能难以将注意力集中在
单个字上，导致整个文本看
起来更加密集。这种视觉处
理缺陷并不造成明显的视觉
困难，但影响了文字信息的
获得及文字在大脑中的加工。

The visual crowding effect is the
increased difficulty in recognising a
target object when other objects are
present around it. This effect is more
pronounced in children with dyslexia,
especially when faced with densely
arranged text, where they may have
difficulty focusing on individual
words, resulting in the entire
text appearing denser. This visual
processing deficit does not cause
significant visual difficulties, but it
affects the acquisition of textual
information and the processing of
text in the brain.
