

MODE OF OPERATION

- Public Gardens – A key feature of Margate Winter Gardens is its broad steps directing you into one of the very few green spaces within the town. As a public space, users have the freedom to use this space to relax, picnic or even take a walk.

- Sun Deck – Better connecting the site with its coastal features, a developed deck would allow users to be more involved with the locally motivated water sports activities.

1:

2:

- Allotment - Into a more contained space, this Allotment provides a little more privacy for those staying or working within the site yet explores the introduction of further activity/green space.

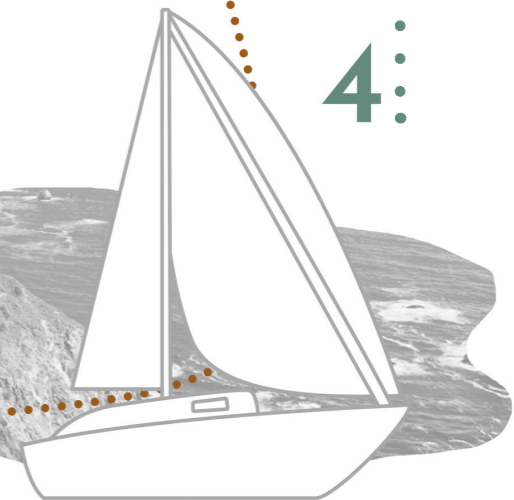

3:

- Main Hall – The hall is the hub of all communal activity within Margate. Housing the original stage, there is initiative to further incorporate the local culture through food, drink and workshops.
