# Mirror Glaze Cake

Place of origin  
**Tobago**

| Belle Garden to Crown Point  
Approximately 42,000 gallons of crude oil leaked, contaminating nearly 45km of coastline and the nearshore marine areas.

# Jelly Pie & Cheese Cake

Place of origin  
**Huntington Beach**

| Orange County oil spill, Southern California, USA  
Approximately 120,000 gallons of oil leaked into the Pacific Ocean, polluting the coastline of Southern California.

# Honey Cake

Place of origin  
**Gulf of Mexico**

| Tampa Bay, West Coast of Florida, USA  
Large amounts of proliferating sargassum stretch over 8,046km of coastline and weigh around 10 million tons.

## Marble Pound Cake

Place of origin

### Rio-Niteroi bridge

| Guanabara Bay, Rio de Janeiro, Brazil

Approximately 42,000 gallons of oil were spilled. The contaminated area covers more than 2,400km, almost a third of Brazil's coastline.

## Pancake

Place of origin

### Hocking County

| Oron, Ohio

Every single minute, 1,000 gallons of iron-laden, acidic water flow from this abandoned mine, contaminating nearby rivers.

## Ice Cream

Place of origin

### Biarritz beach

| Southwest France

The inadequacy of sewage treatment facilities has led to untreated or inadequately treated sewage flowing into the ocean.

## Permanent Rose

Inspiration

### Corfo lagoon

| Patagonia, southern Argentina

Sodium sulfite

## Code Red

Inspiration

### Red tide

| Dameisha Resort, Eastern Shenzhen

Burgundy blood algae

## Aurora Spill

Inspiration

### Deepwater horizon

| Macondo Prospect, south of Louisiana

The estimated oil spill was approximately 507,000 tons.

## Bubble Foam

Inspiration

### Sea foam

| Marina Beach, Chennai, India

Untreated wastewater and phosphates.

## Blazing Horizon

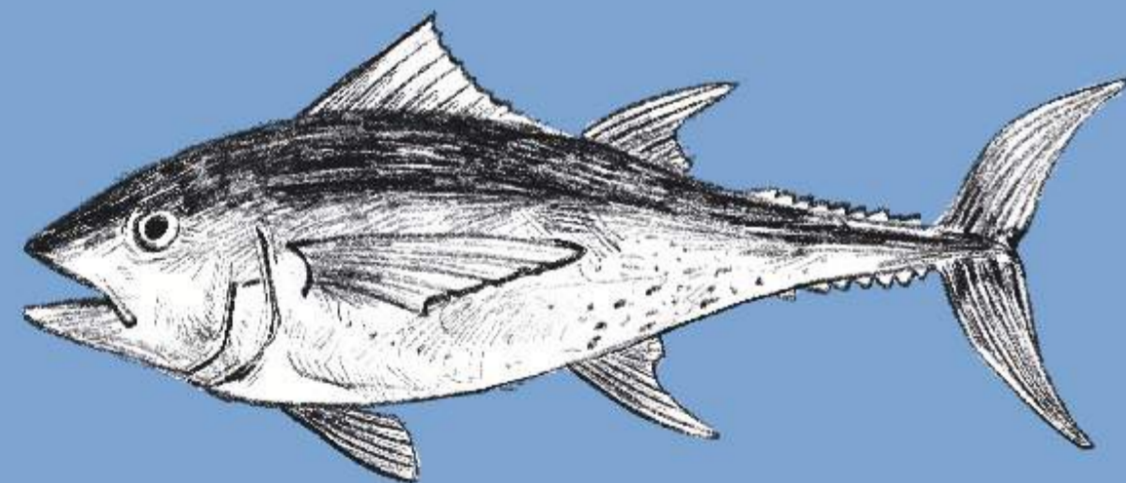

Inspiration

| South of Mauritius

An estimated 1,000 tonnes of oil spilled into the ocean.

Something fishy here.....

## Sign Description

00.0%

Microplastic

% of Samples Positive to Microplastic

0µg/kg

Heavymetal

The detectable heavy metal content per kilogram in this seafood.

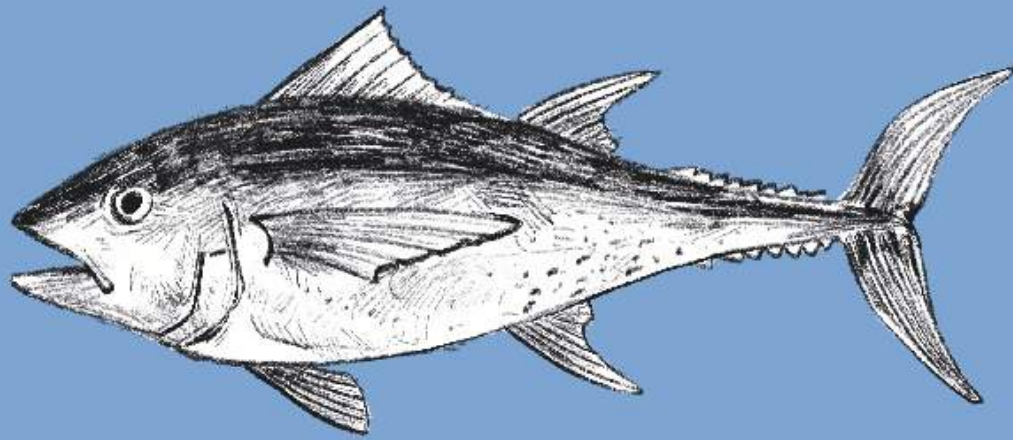

## Specialties

The core idea of FISHY is paying attention to the marine environment.

We use three main types of pollution—oil pollution, heavy metal pollution, and plastic pollution—as inspiration for the cocktails, courses, desserts, and other items on the menu to create a unique and special menu.

In our rapidly developing society, human-induced pollution is continually increasing. We hope that through this menu, we can remind everyone of the impact pollution has on both the ocean and humanity.

**We look forward to your next visit!**

**But seriously,  
don't eat too much seafood.**
