(Linen, cotton and wool)

Vegan leather

Echo in the Forest is inspired by the desire to escape modern work pressures and journey into nature. It tells the story of individuals lost in the forest, seeking the essence of survival. As they navigate the unknown, they encounter mysterious, almost supernatural elements that awaken joy and self-discovery. Animal elements are embedded in every small piece, symbolizing nature's quiet presence. This transformative journey allows them to return to daily life with clarity and renewed perspective.
